**FIRST AID**: If swallowed, give at least 1.0 gallon of water (6597 ppm peroxyacetic acid by weight). Provide immediate medical attention. Call a poison control center or doctor for treatment advice. If in the mouth, rinse thoroughly with water. If on the skin, wash with soap and water, and before eating, drinking or using tobacco. Remove contaminated clothing and the skin. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Do not breathe vapor or spray mist. Wear protective gloves and goggles. Avoid generating aerosols. Do not mix with other substances. In the commercial environment, surfaces should be exposed to the solution for a period of not less than 40 seconds unless a longer time is specified by the governing food processing authority. After thorough draining, rinse surfaces with a disinfected water rinse free of pathogenic bacteria or sterile water. This product when used per label directions is effective against Bacillus subtilis, B. cereus, Clostridium sporogenes, Bacillus anthracis, and Salmonella enterica. Use immersion, coarse spray or circulation techniques as appropriate to sterilize the food packaging material. Surfaces should be exposed to the sanitizing solution for a period of not less than 19 seconds unless a longer time is specified by the governing food processing authority.

**PRODUCT CLASSIFICATION/ USE**: Non-refillable container. Do not reuse this container to hold materials other than pesticides or instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative. This product is intended for use on stainless steel, glass, polyethylene, polypropylene, and aluminum surfaces. If product is intended to be used on any other surface, it is recommended that you apply product to a smaller test area to determine the safety of the product on that surface.

**PHYSICAL AND CHEMICAL HAZARDS**: This product in its use solutions is compatible with stainless steel, glass, polyethylene, polypropylene and aluminum surfaces.

**TOTAL**: 100.0%

**ACTIVE INGREDIENTS**: Peroxyacetic Acid, Sodium Peroxide

**DIRECTIONS FOR USE**

**COMMERCIAL STERILIZATION**: Environmentally friendly acid sanitizer is recommended for use on stainless steel, glass, polyethylene, polypropylene and aluminum surfaces. The product is effective against Bacillus subtilis, B. cereus, Clostridium sporogenes, Bacillus anthracis, and Salmonella enterica. Use immersion, coarse spray or circulation techniques as appropriate to sterilize the food packaging material. After thorough draining, rinse surfaces with a disinfected water rinse free of pathogenic bacteria or sterile water. This product when used per label directions is effective against Bacillus subtilis, B. cereus, Clostridium sporogenes, Bacillus anthracis, and Salmonella enterica. Use immersion, coarse spray or circulation techniques as appropriate to sterilize the food packaging material.

**PUBLIC HEALTH USES**: Non-refillable container. Do not reuse this container to hold materials other than pesticides or instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative. This product is intended for use on stainless steel, glass, polyethylene, polypropylene and aluminum surfaces. If product is intended to be used on any other surface, it is recommended that you apply product to a smaller test area to determine the safety of the product on that surface.
