ACID SANITIZER FP™

ACID SANITIZER FP™ is for use on food contact, non-porous surfaces in institutional food handling and processing facilities. Food contact, non-porous surfaces include: stainless steel, aluminum, brass, copper, glass, porcelain, plastic, porcelain coated metal, and ceramic. It is not intended for use on food contact, porous surfaces. This product can be used as a sanitizer for non-food contact, non-porous surfaces. Not for use on food contact, porous surfaces.

**PRODUCT INFORMATION**

**ACID SANITIZER FP™**

**PRODUCT DESCRIPTION**

ACID SANITIZER FP™ is a multi-purpose, no-rinse, acid-based cleaner designed for use in food handling and processing facilities. It is effective against a wide range of microorganisms, including bacteria, viruses, and fungi. The product is formulated to be mild on hands, non-toxic, and biodegradable.

**INSTRUCTIONS FOR USE**

1. **Preparation**: Dilute the required amount of ACID SANITIZER FP™ into the water to be used for sanitation. The recommended dilution is 1:100, which means 1 ounce of ACID SANITIZER FP™ per 100 gallons of water.

2. **Application**: Apply the diluted solution to the surfaces to be sanitized using a spray, mop, or cloth. Ensure the surfaces are thoroughly wetted with the solution.

3. **Contact Time**: Allow the solution to remain on the surfaces for at least 1 minute. This is the minimum time required for the product to effectively sanitize the surfaces.

4. **Rinse**: After the contact time, rinse the surfaces with clean, potable water to remove any residue.

5. **Drying**: Allow the surfaces to air-dry or use a dry cloth to remove excess moisture.

**SAFETY PRECAUTIONS**

- Avoid inhaling the fumes of the product and wear protective clothing and gloves when handling it.
- Keep out of reach of children.
- Store in a cool, dry place.
