ZINC OMADINE® ZOE DISPERSION MILDEWCLIDE

ACTIVE INGREDIENT: Zinc, 2-pyridinethiol-1-oxide........37.6% Other Ingredients.............62.4% Total.................100.0%

KEEP OUT OF REACH OF CHILDREN

STORAGE AND DISPOSAL: Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE: Do not freeze. Keep container tightly closed when not in use. Do not store with strong oxidizing agents or strong (concentrated) acids.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinseate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable container. Do not re-use or refill this container. For use after disposal, call 1-800-564-6911. Do not reuse or refill. Note to physician: Probable mucosal damage.

GENERAL DIRECTIONS: For treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

CHEMICAL HAZARDS: Do not store or mix with strong oxidizing agents or strong (concentrated) acids. In case of contamination do not reseal container. If possible, isolate container in open or well-ventilated area. Fumes caused by contamination may be hazardous.

DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. We recommend that users contact Arch Chemicals Technical Service for formulation assistance.

APPLICATION: Use is a mildewcide for the Dry Film Preservation of Flooring and Other Non-Porous Surfaces. The product is added to the dry film preservation system during application. It is designed to provide protection against the growth of algae, bacterial slime, mildew, and other fungi. It can be added to the system during the formulation procedure. For example, the dry film can be protected against the growth of algae, bacterial slime, mildew and other fungi by the addition of 12,760 ppm of this product. (Add 12.7 lbs. of this product to 100 gallons of water.)

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish. Do not discharges effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water or Regional Board of the EPA.

The Dry Film Preservation of Flooring and Other Non-Porous Surfaces: Reduces microbial growth, thereby extending the life of the dry film preservation system. It is designed to provide protection against the growth of algae, bacterial slime, mildew, and other fungi. It can be added to the system during the formulation procedure. For example, the dry film can be protected against the growth of algae, bacterial slime, mildew and other fungi by the addition of 12,760 ppm of this product. (Add 12.7 lbs. of this product to 100 gallons of water.)

The application of this product is intended for use in the following environments: Food Contact Adhesives, Caulks, Sealants, Grouts and Patching Compound. (Add 2550 ppm of this product and for bacterial control add 10,100 ppm of this product. (Add 2.55 lbs. of this product to 100 lbs. of grout/patching compounds to control fungi.)

The application of this product is intended for use in the following environments: Food Contact Adhesives, Caulks, Sealants, Grouts and Patching Compound. (Add 2550 ppm of this product and for bacterial control add 10,100 ppm of this product. (Add 2.55 lbs. of this product to 100 lbs. of grout/patching compounds to control fungi.)

For the Dry Film Preservation of Aqueous Latex and Other Types of Architectural and Industrial Non-Marine Paints and Coatings Including: Add up to 12,760 ppm of this product to enhance the growth of algae, bacterial slime, mildew, and other fungi. It can be added to the system during the formulation procedure. For example, the dry film can be protected against the growth of algae, bacterial slime, mildew and other fungi by the addition of 12,760 ppm of this product. (Add 12.7 lbs. of this product to 100 gallons of water.)
