HYPE-WIPE®
DISINFECTING TOWEL WITH BLEACH

Hospital Cleaner – Disinfectant Kills C. diff spores in 4 Minutes

Ready-to-use towelettes saturated with 1:10 dilution of stabilized bleach and detergent solution. Contains at least 500 ppm bleach at expiration with proper storage. Meets OSHA, NCCLS, CDC blood-borne pathogen standards for disinfection.

Active Ingredient: Sodium Hypochlorite 0.04%
Other Ingredients: 99.96%
Total: 100.00%

CAUTION: Keep Out of Reach of Children. Read and follow directions and precautions on back panels.

Available Chlorine: 0.9% EPA Reg. No. 70560-1, EPA Est. 70560-IN-1
Towel: Folded 9" x 12" Net Wt. 12.2 grams (excludes towel)

DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. (1) Remove all gross filth and heavy soil from surfaces to be disinfected. Gloves should be worn. (2) Open pouch, remove towelette, use towel and excess liquid to wipe surface. (3) Allow solution to remain on surface for at least two minutes to inactivate a broad range of microorganisms. Leave wet for four minutes to kill C. diff spores. See front panel for specific pathogen kill times. (4) Rinse: Some equipment and surfaces such as stainless steel may require rinsing; follow those specific manufacturers’ directions.

SPECIAL CLEANING PROCEDURE BEFORE DISINFECTING AGAINST C. DIFF SPORES: Fecal matter/waste must be thoroughly cleaned from surfaces before disinfection by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as right to left or left to right, on horizontal surfaces, top to bottom, on vertical surfaces, to minimize spreading of spores. Restrooms are to be cleaned last. Do not re-use soaked cloths.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HEPATITIS B VIRUS (HBV) AND HEPATITIS C VIRUS (HCV) ON SURFACES: OBJECTS SOILED WITH BLOOD/BODY FLUIDS on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling inanimate surfaces objects with blood or body fluids, and in which the surfaces/objects soiled with blood or body fluids can be associated with the potential for transmission of HBV and HCV.

INFECTION MATERIALS DISPOSAL: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

PERSONAL PROTECTION: Wear appropriate barrier protection such as gloves, gowns, masks or eye coverings. *STORAGE: Towelettes must be stored in a cool, dry area at room temperature (68° – 77°F) away from sunlight and heat. DISPOSAL: Discard used towel and empty pouch in trash.

PRECAUTIONARY STATEMENTS: Physical and Chemical Hazards: Do not use this product with materials that may be damaged by bleach solutions. Do not use this product with ammonia, acids (such as vinegar), rust removers, toilet bowl cleaners, or heavy metals such as copper and iron. Will corrode aluminum. CAUTION: Avoid contact with eyes. If in eyes, rinse eyes with water for 15-20 minutes. Seek medical guidance.
