FIBERGLASS BOTTOMKOTE AQUA

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: FIBERGLASS BOTTOMKOTE AQUA provides a hard, scuffable finish that will give permanent protection from algae, slime, barnacles, sea turds, and other forms of fouling. FIBERGLASS BOTTOMKOTE AQUA is perfect for use on either casting or performance boats, and for those who want a little extra speed, the surface can be extra-slicked to achieve a smooth mouse, high-speed finish. FIBERGLASS BOTTOMKOTE AQUA is also low in Viscous Organic Content (VOC) which limits heavy emission into our atmosphere, with the added benefit of easy clean-up with soap and water. FIBERGLASS BOTTOMKOTE AQUA is a mixture of Interlux® Technology, which uses the latest in industrial superhydrophobic technology, in a water-based coating that provides long-lasting, hard, durable finish that bonds to metal, wood, and other substrates without the use of solvents.

COMPATIBILITY: FIBERGLASS BOTTOMKOTE AQUA 331 can be applied over most antifouling paints as long as the old coating is lightly sanded and is in good condition. When applying over conventional antifouling paints, thoroughly sand with 80 grit wet-or-dry sandpaper if applying over a self-polishing type antifouling paint, thorough sanding is required. Self-polished coatings should be removed prior to application of FIBERGLASS BOTTOMKOTE AQUA.

V.O.C.: Less than 150 grams per liter

THINNER: Interlux® Conditioner 6516

COATS REQUIRED: 2 coats

DANGERS REQUIRED: 2 coats

CLEAN UP: Soap and water: Be sure to observe proper disposal procedures for all antifouling paints

DANGERS TIMED: Touch Dry - 2 hours

DANGERS DRYED: 77°F (25°C)

DANGERS LAUNCHED: 48 hours

NOTE: If either hull or air temperature falls below 77°F (25°C) during the 16 hour dry time extend the dry time by a minimum of 48 hours without applying

Do not apply at the air or water temperature if it is raining. It is not immediately after application allow to dry for a minimum of 24 hours (48 hours @ 77°F 25°C) after it has stopped raining, prior to launch or re-coating.

APPLICATION SYSTEMS

Suit thoroughly (do not mix). Apply at least 2 coats (2 oz. dry weight) of FIBERGLASS BOTTOMKOTE AQUA by brush, roller, or sprayer. Do not apply this product by using a spray gun.

PRACTICALLY PAINTED SURFACES - GOOD CONDITION: Remove all loose paint, rust, and contamination by sanding the entire surface with 80 grit sandpaper. Wipe with a clean dry cloth to remove dust. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE AQUA. Allow to dry for 7 days. See compatibility section for additional information.

PRACTICALLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® Fiberglass Primer 259 for fiberglass and epoxy systems. Interlux® Paint Prep 150 for wood and metal by sanding with abrasive sheets to metal to remove all paint. Follow application instructions for new construction systems. When painting in salt conditions, sand any imperfections and repaint with Interlux® Intermix® Sanding and Filling Compound 417-418MSPRSand and work clean. Sanding does not remove contamination.

NO SAND SYSTEM: Prepare surface as described above. Apply one thin, continuous coat of Interlux® 412 200. Follow label directions for re-coating. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE AQUA allowing a minimum of 6 hours between coats.

BARE FIBERGLASS - SANDING SYSTEM: Prepare surface as described above. Sand the entire surface with 80 grit sandpaper until a flat, matte finish is obtained. Wipe off sanding residue with Interlux® Fiberglass Sanding Compound 417-418MSPRSand and work clean. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE AQUA allowing a minimum of 6 hours between coats.

BARE WOODS - Remove any surface contamination by sanding with Interlux® Special Stipple 216. Sand entire surface with 80 grit sandpaper. Wipe off sanding residue with Interlux® Marine Compound 417-418MSPRSand and work clean. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE AQUA. Follow Interlux® Conditioner 6516 (100:1 mixture) for wood and metal. Apply at least 2 coats covering at least 6 hours between coats. Fill any imperfections with Interlux® Seam Compound 30 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact Interlux® Technical Service Department at 1-800-488-7568 for details on how to properly prime underwater metal. Do not use on aluminum.

NOTE: Keep from freezing. Color difference may occur between actual paint and color swatch on front of can.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if inhaled. Avoid contact with skin, eyes, or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirts, long pants, and shoes. May be fatal if swallowed or inhaled. Do not breathe dust, vapor or spray mist. While spraying and/or sanding, boat surface, water, face mask and respirator shall be approved by the Mine Ventilation and Safety Administration and by the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash hands. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by a poisons control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin or clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible.
- Call a poison control center or doctor for further treatment advice.

If by eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

If in eyes:

- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for further treatment advice.

Other:

- Have the product container with you when calling a poison control center or doctor for guidance.

ENVIRONMENTAL HAZARDS: This material is toxic to fish. Do not apply directly to water by cleaning of equip- ment or disposal of wastes. Do not allow paints and solvents to enter streams, ponds, lakes, or aquifers. Contains no solvents, petroleum coke, or other solvents unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) permit. The permitting authority has stated no contamination in existing prior to discharge. Do not discharge effluent containing this product to sewer systems without a valid permit or the approval of a local pollution control authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Disposal: Pesticide waste is toxic. Open dumping is prohibited. Pesticides, spray residue, or debris cannot be used or chemically processed to plug, seal, or cover paint film. Dispose of as required by all federal, state, and local disposal authorities.

Container Disposal: Follow state or local disposal laws and regulations for disposal of storms. Consult Federal, State, and local disposal authorities for approved alternative procedure.
