FIBERGLASS BOTTOMKOTE® AQUA

DIRECTING FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: FIBERGLASS BOTTOMKOTE® AQUA provides a hard, scuff-resistant finish that will give premium protection from algae, stains, bacteria, urchins and most other forms of fouling. FIBERGLASS BOTTOMKOTE® AQUA is perfect for use on either plywood or performance boats, and for those who select a little extra style, the surface can be well-sanded to provide a smooth sailing finish with less drag. FIBERGLASS BOTTOMKOTE® AQUA is also low in Volatile Organic Content (V.O.C.) which limits volatile emission into our atmosphere, with the added benefit of easy clean-up with soap and water. FIBERGLASS BOTTOMKOTE® AQUA is formulated for use below the waterline in fresh, salt and brackish waters on fiberglass, wood and properly painted metal boat hulls and parts. Do not use on aluminum.

COMPATIBILITY: FIBERGLASS BOTTOMKOTE® AQUA can be applied over most antifouling paints as long as the old coating is tightly adhered and in sound condition. When applying over conventional antifouling paints, thoroughly sand with 80 grit wet-or-dry sandpaper. If applying over self-polishing type compound antifouling, heavy sanding is required. Soft varnish based coatings should be sanded prior to application of FIBERGLASS BOTTOMKOTE® AQUA.

V.O.C.: Less than 150 grams per liter.

THINNER: Interlux® Conditioner 616

COATS RECOMMEND 2 coats.

CLEAN UP: Soap and water. Be sure to observe proper disposal procedures for all antifouling paints.

APPLICATION TEMPERATURE: 50°F (10°C) and above.

MAXIMUM DRY TIME: 2 hours after application.

MAXIMUM NUMBER OF DAYS: Maximum 48 days.

APPLICATION SYSTEMS

Spray thoroughly (do not brush). Apply at least 2 coats (2 on rare wood) of FIBERGLASS BOTTOMKOTE® AQUA by synthetic brush or 360° spray roller. Do not apply this coat if, during application, the boat or engine is running, this with Interlux® Conditioner 616 to improve bonding during the drying and curing process may appear to be color changes resulting in an even appearance. This discolored area will disappear as the finish dries to a deep uniform color.

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of old paint and contamination by sanding the entire surface with 80 grit sandpaper; wipe surface clean with tap water. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE® AQUA, allowing proper drying time before any additional coats for additional information.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with Interlux® Fiberglass Primer® 298 or fiberglass and epoxy surfaces, Interlux® Wind® 197 for wood and fiberglass bottoms undercoat metal to near white metal. Proceed with application of system as listed above as described below.

BARE WOOD: FIBERGLASS - SURFACE PREPARATION: POLYESTER AND VINYLESTER: Wash entire surface thoroughly with Interlux® Fiberglass Solvent Wash 298, confirmingvars according to the instructions. Before liquid drainage occurs, wipe with a dry cloth. Use care during and after contamination is removed. Failure to properly clean the surface will result in paint contamination. Sand any imperfections and spoil with Interlux® Surfacing and Filling Compound 417/418/419 and sand and wipe down. Sanding does not remove contamination.

BARE METAL: Prepare surface as described above. Apply a thin, continuous coat of Interlux® AL 220 Fiberglass Primer® with brush or roller. Follow label directions for drying. Apply at least 2 coats of FIBERGLASS BOTTOMKOTE® AQUA allowing a minimum of 6 hours between coats.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as gloves, long-sleeved cotton shirt, long pants and hat. May be flammable if exposed or ignited. Do not breathe dust, or spray into eyes. While spraying and/or sanding boat surface, wear a face mask and respirator rated by the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If swallowed:

• Call a poison control center or doctor immediately for treatment advice.
• Have person sit in a glass of water if able to swallow.
• Do not induce vomiting or gastric lavage.
• Do not give anything by mouth to an unconscious person.

If on skin or clothing:

• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.

• Call a poison control center or doctor for treatment advice.

If inhaled:

• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.

• Call a poison control center or doctor for further treatment advice.

In case of:

• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

• Call a poison control center or doctor for treatment advice.

Other:

Have the product container or label with you when calling a poison control center or doctor or going for treatment.

ENVIRONMENTAL HAZARDS:

This material is toxic to fish. Do not apply directly to water by casting of equipment into water. Do not allow oils and diesel generated during paint removal to enter water. Dispose of paint debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, ditches, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit. The permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Package Disposal: Pesticide wastes are toxic. Open dumping is prohibited. Pesticide, farm mixtures, or residue that cannot be used or chemically reprocessed should be disposed of according to procedures approved by federal, state or local authorities. Contact your local authorities for proper disposal.

Container Disposal: Do not care for or dispose of container in an approved landfill. Consult Federal, State, or local waste disposal agencies for the approved alternative procedure.

CPR/EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE - DAY OR NIGHT - CHEMTRAC 1-800-242-1000. MEDICAL ADVISORY SERVICE - CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-242-1000.
