CLOTHES MOTHS: Locate source of infestation. Treat nearby carpets and crevices and perform a space treatment of the infested area at a rate of 10 - 20 sec/1,000 ft². To protect woolens and other keratin containing materials from treatment, cover or remove. Before treating entirely, treat a small hidden area of fabric to determine if staining will occur. Treat thoroughly by holding dispenser at least 18” from garment. Treated articles should be put in a lidded container or other darkened storage such as code boxes, storage drawers or sealable plastic fabric bags. For best protection clean and treat inside of clothes or storage areas by beating 1 sec/10 ft² before putting treated materials away. Preventative treatment should be repeated every 6 months. To control a present infestation, treatment may be repeated every 3 days if necessary. Do not clean treated clothes before wearing.

For EXPOSED ADULT AND LARVAL STAGES OF CARPET BEETLES, CIGARETTE BEETLES, CONFUSED FLOUR BEETLES, DRUGSTORE BEETLES, GRAIN MITES, GRANARY WEEVILS, RED FLOUR BEETS, RICE WEEVILS and SAW TOOTHED GRAIN BEEDS: Apply as a Crack & Crevice treatment into cracks and crevices of pantries, cabinets, food processing and handling equipment and other places where insects harbor or as a space treatment at a rate of 20 sec/1,000 ft². Apply around containers and containers, and other areas where these insects tend to congregate. Treatment may be repeated every 3 days if necessary. Infested stored products should be fumigated or treated by other effective methods using an approved product intended for this purpose.

ANGOUMOIS GRAIN MOTHS, CHOCOLATE MOTHS, INDIANMEAL MOTHS, MEDITERRANEAN FLOUR MOTHS: Apply as a space treatment at a rate of 5 - 10 sec/1,000 ft². Close all doors and windows. Direct into all parts of room, especially around stored product containers, pallets and darkened areas. Keep area closed for 15 min following treatment. Disperse in all locations. Treatment may be repeated every 3 days if necessary. If infested stored products should be fumigated or treated by other effective methods using an approved product intended for this purpose.

FLEAS IN BUILDINGS: Hold product 36” above floor and direct toward floor and lower walls at a rate of 10 sec/100 ft². In order to achieve 100% infestation, the treated area should be contacted for 15 min. Open and ventilate before reoccupying. Treatment may be repeated daily if necessary.

TICKS: Holding container 36” above the floor, direct toward pet beds and resting quarters. Treat adjacent cracks and crevices such as behind baseboards and edges of carpets and floor cover. Treat higher cracks such as under door jambs and window framing, behind picture frames and other areas where females may crawl to lay eggs. Treatment may be repeated daily if necessary.

OUTDOOR TREATMENTS
GROUND APPLICATION (Flies, Gnats and Mosquitoes): Treat open areas of patios and lawns. Best results are obtained when wind speed is 5 MPH or less. Apply at a rate of 1.5 - 2 sec/1,000 ft². Apply in wide swaths across area to be treated. Allow treatment to penetrate dense below-ground area. Treatment may be repeated daily if necessary.

MUD DAUBER and WASP NESTS: Apply mist directly on insects and their nests. Treat for 3 days at 10 sec/100 ft². Contacted insects will fly away from fog. Avoid misting in buildings, around awnings and eaves, areas near buildings and in campgrounds. Best results are obtained when applied at dusk or later. Treatment may be repeated every 3 days if necessary. Preventative treatment should be repeated every 3 days if necessary. Do not apply as a space treatment.

For USE IN AND AROUND: Apartments, Campgrounds, Food Storage Areas, Homes, Hospitals, Hotels, Motels, Nursing Homes, Resorts, Restaurants and other Food Handling Establishments, Schools, Supermarkets, Transportation Equipment (Buses, Ships, Stills, Trains, Planes), Utility, Warehouses, and other Commercial and Industrial Buildings

The tarsic natural insecticide®

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed or absorbed through skin. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling.

NOTICE TO APPLICATOR: In order to avoid any unpleasant drying of the nose and throat when dispensing this product in confined areas or when prolonged exposure to spray mist occurs, wear a NIOSH approved respirator with an organic vapor (OV) cartridge or canister with any R-P or OP filter.

ENVIRONMENTAL HAZARDS
This product is toxic to fish. Do not apply directly to water, or to areas where surface water may be present or to interior to areas below the high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

PHYSICAL OR CHEMICAL HAZARDS
Extremely Flammable. Contents under pressure. Keep away from heat, sparks and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.

See side panels for Directions for Use and Storage & Disposal.

NET WEIGHT: 1 lb, 4 oz (20 oz)

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

In HOSPITALS and NURSING HOMES: Do not apply this product in hospital rooms while occupied or in any room occupied by the elderly or infirm. Apply according to space directions for pest(s) to be treated. Patients should be removed from room prior to treatment. Room should be ventilated for 2 hr after spraying. Do not return patients to room until after ventilation.

Food Areas of Food Handling Establishments: Apply according to specific directions for pest(s) to be treated. When applying as a space treatment, then give artificial ventilation of fogging area, the food handling operation should be shut down. Foods should be removed or covered during treatment. In food processing areas, all utensils, shelving, etc., where food will be handled should be covered or removed before treatment or thoroughly washed with an effective cleaning compound before a followup treatment. To prevent food product contamination, the treated area should be free of odor before the food product is placed in the area.

Schools: Do not apply to classrooms when in use.

Planes: Do not apply in airplane cabins.

This product is toxic to fish. Do not apply directly to water, or to areas where surface water may be present or to interior to areas below the high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes.

Do not apply this product to classrooms when in use.

SCHOOLS: Do not apply to classrooms when in use.

Space Treatment: Calculate the cubic footage to be treated and apply at the dosage rate specified below for the pest(s) to be treated.

Treatment vented according to indoor treatment conditions.

Indoor Treatments
Flying Insects (Clusters Flies, Flies, Fruit Flies, Gnats, Mosquitoes, Small Flying Moth): Apply as a space treatment. Do not apply directly to water or to areas where surface water may be present at a rate of 1 - 3 sec/100 ft². Disperse in all locations. Keep area closed for 15 min. Open and ventilate before reoccupying. Disperse thoroughly. Preventative treatment should be repeated every 3 days if necessary.

Cluster Flies, Clover Mites, Wasps and Bees Inside Structural voids: For treatment of these pests, locate all insect entry points and apply. Determine size of void. Insecticidal spray should be applied at a rate of 5 – 10 sec/100 ft² of void into remaining opening. For best results, treat at dusk or later. Treatment may be repeated every 3 days if necessary.

Ants, Booklice, Centipedes, Clover Mites, Crickets, Millipedes, Roaches, Silverfish, Sowbugs and Spiders: Apply as a Crack & Crevice treatment into cracks and crevices in all hiding places behind baseboards, sinks, cabinets, meter boxes, door frames, windows or as a space treatment at a rate of 20 sec/1,000 ft². Disperse in all places. Keep area closed for 15 min. Open and ventilate before the treated area before reoccupying. Treatment may be repeated every 3 days if necessary. Inspections may be made on a daily basis.

Bed Bugs: Take bed apart and treat cracks, joints and interior of bed. Do not treat adjacent areas with soap or water during treatment. For treatment of void areas such as attics, false ceilings and crawl spaces, calculate the volume of the void and apply as a space treatment at a rate of 10 sec/100 ft². Treatment may be repeated every 3 days if necessary.

Carpet Beetles (in Residences): Hold product 36” above floor and direct spray toward floor and lower walls treating at a rate of 10 sec/100 ft². Also apply as a Crack & Crevice treatment to cracks and crevices near the base of the furniture.
