into the human body, either into or in contact with the bloodstream or disinfectant on any surface or instrument that (1) is introduced directly into the surface remains visibly wet for 2 minutes. This contact time will not be reduced by the use of any force. Cleaning materials used that may contain blood or other body fluids must be autoclaved and disposed of in accordance with federal, state and local regulations for infectious waste. Special Instructions for Cleaning and Decontamination Against Body Fluids:

- Use disposable protective gloves, other appropriate barrier protection such as disposable protective clothing, masks and goggles.
- Wash hands before and after use.
- Use CaviWipesXL† for disinfection.
- For a two-step disinfectant, use one wipe to preclean then a second wipe to disinfect. Repeated use of the same towelette to completely preclean surface of all gross debris.
- Thoroughly wet surface with a new CaviWipesXL† towelette to completely preclean surface of all gross debris.

**RECOGNITION STATEMENTS**

**INERT INGREDIENTS**

- Isopropanol ....................................................................................................17.20%

**TOTAL**: .........................................................................................................100.00%

† Does not include the weight of the dry towelette.

**ACTIVE INGREDIENTS**

- Ethylene Oxide ................................................................................................0.93%

**NEAT INGREDIENTS**:

- Ethylene Oxide

Other, according to weight of dry towelette.

**PRECAUTIONARY STATEMENTS**

- **Hazard Communication**
  - 3.a. PHYSICAL AND CHEMICAL PROPERTIES
  - 3.b. HEALTH HAZARDS
  - 3.c. ENVIRONMENTAL HAZARDS
  - 3.d. REACTIVITY

**Storage and Disposal**

- Store at controlled temperature
- **Disposal**
  - Packed For: REORDER No. 13-1150
  - Offer for recycling, if available.
