MICRON® 66® with BioluX®

PRODUCT DESCRIPTION: Micron® 66® is a long lasting self-polishing copolymer that is formulated to provide superior polishing and polishing performance. This self-polishing copolymer resin and BioluX® technology enables this product to provide a level of antifouling protection not previously available in any paint system. This technology also allows the boat to be hoisted and launched without wetting. Because Micron® 66® polishes itself when brought into contact with water, it will reduce the drag and fuel consumption. The polishing action of Micron® 66® also reduces build-up of algae and grime and minimizes sanding at repainting. Micron® 66® is also superior to traditional wooden and plywood surfaces. Wash thoroughly with soap and water after handling. In addition to these minimum PPE, commercial users must wear a disposable coverall with hood and chemical resistant booties.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF REACH OF CHILDREN

DANGER

Toxic. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed or inhaled. Do not breathe dust, vapor or spray mist. Remove clothing and wash skin thoroughly with soap and water after handling. Get medical attention immediately. Do not introduce into drainage systems. If swallowed, do not induce vomiting unless told to do so by a poison control center or doctor. Do not give any liquid or food. Do not give anything by mouth to an unconscious person. If in eyes: Hold open eyes and rinse slowly and gently with water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

APPLICATION

For applications by residential (non-commercial) users:

Do not apply by airless spray
Do not apply more than one coat of this product within 24 hours
Do not apply outdoors, in non-ventilated areas

MIXING AND THINNING INSTRUCTIONS: Shake and mix well. Stir thoroughly while using.

Mix only as a spray or in a spray applicator. Apply at a rate of 1.5 gallons per 100 square feet.

CLEAN UP:

Special Thinner 216 or Interlux® Brush-Ease 433

TECHNICAL COVERAGE: 300 square feet per gallon, at 2.0 ml per DFT, V.O.C. less than 350 grams/liter

APPLICATION TEMPERATURE: 40°F (5°C) and above (air and hull)

CLEAN UP:

For tools, equipment, etc. use Interlux® Special Thinner 216 or Interlux® Brush-Ease 433.

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PREPARATION

PREVIOUSLY PAINTED - GOOD CONDITION CONTAINING:

TBD Copolymer: Sand the surface with 80 grit sandpaper to a clean, smooth surface. Use Special Thinner 216. Apply one coat of Interlux® FTP-4.

Non-TBD Copolymer: Sand the surface with 80 grit sandpaper to a clean, smooth surface. Use Special Thinner 216. Apply one coat of Interlux® FTP-4.

PREVIOUSLY PAINTED - POOR CONDITION: Remove all old antifouling paint using Interester™ 299F. Sand and wipe clean with Fiberglass Solvent Wash 202.

SURFACE PREPARATION: Wipe surface with Fiberglass Solvent Wash 202 or use Fiberglass Surface Prep YANCO.

BARE FIBERGLASS - NO SAND SYSTEM: Repair any surface imperfections using Watertex® Sand and wipe clean. Apply one thin, continuous coat of Interlux® Fiberglass No-Sand Primer. Follow application directions on primer.

BARE THERMOPLASTIC: Sand the surface with 80 grit sandpaper, wipe with Special Thinner 216. Apply the first coat 10% with Special Thinner 216 or Brush-Ease 433. Fill small imperfections with Interlux® Saun Compound 301 (see next page). Repair imperfections with Watertex® Sand and wipe clean. Apply 2 additional coats.

ALUMINUM AND STEEL: Contact the Interlux® Technical Service Department at 1-800-468-7299 for full information on how to properly prime underwater metal.

APPLICATOR
