PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Painful if absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles, face shield, or a respirator (only approved by the Mining Enforcement and Safety Administration and the National Institute of Occupational Safety and Health). Wear protective clothing and rubber gloves. Prolonged or frequent repeated skin contact may cause allergic reaction in some individuals. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

FIRST AID

(Applies to both products below individually)
- VC 17m EXTRA - Original [EPA Reg. No. 2693-107]
- VC 17m EXTRA - Copper Powder V900 [EPA Reg. No. 2693-109]

IF SWALLOWED: Call a Poison Control Center or doctor immediately for treatment advice.

IF IN EYES: Hold open eye and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes. Then continue rinsing eyes. Call a Poison Control Center or doctor for treatment advice.

IF INHALED: Move air to fresh air. If person is not breathing, call 911 or an ambulance, give artificial respiration preferably mouth-to-mouth if possible. Call a Poison Control Center or doctor for treatment advice.

IF ON SKIN AND CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a Poison Control Center or doctor for treatment advice.

ENVIRONMENTAL HAZARDS

This material is hazardous to fish. Do not apply directly to water by cleaning or disposal of wastes. Do not allow chips and chippings generated during point removal to enter water. Dispose of point debris in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, rivers, oceans, seas and other water bodies in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without pre-stripping all the local sewage treatment plant authority. For guidance contact your State Water Board or the Federal Office of the EPA:

STORAGE AND DISPOSAL

Do not store water, fuel, or heat in storage and disposal. Open dumping is prohibited. PESTICIDE DISPOSAL: Pesticides or insecticides that cannot be used or chemically repackaged should be disposed of according to procedures approved by federal, state or local disposal authorities.

CONTAINER DISPOSAL: Inert material equivalent and dispose at an approved landfill. Contact federal, state or local disposal authorities for approved alternative procedures.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL-FREE DAY OR NIGHT: CHEMTREC 1-800-424-9300 MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-845-6913

ORIGINAL

Part A (Base) of a Two Part Antifouling Paint System
VC®17m EXTRA

Product Description

VC®17m EXTRA is a faster drying, low-glaze, high performance antifouling paint formulated with "Select". When applied, the VC®17m EXTRA will immediately give a thin, super smooth, racing finish that would normally take days of expensive sanding. VC®17m EXTRA incorporates the Select® technology along with the metallic copper to radiate antifouling protection against marine stresses, wear, slipperiness, and slime building. This is especially helpful in freshwater or low fouling saltwater. The applied thickness of VC®17m EXTRA is eight times thinner than traditional paint, which virtually eliminates barnacle buildup.

Directions For Use

This is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Preparation

BARE FIBERGLASS (POLYESTER OR VINYLESTER): Scrub the surface thoroughly with soap and water using a stiff brush. Flush well with fresh water. Use Interlux® Fiberglass Solvent Wash 202 to remove any wax or other contaminants from the surface.

- UNDERWATER METALS: Underwater metals must be prepared to avoid contact with copper bottom paint. DO NOT USE ALUMINUM. Clean or sandblast to bright metal, clean thoroughly with Special Thinner 216, and prime within one hour with VC TAR. Apply 3-5 additional coats of VC TAR taking care to follow the label directions. If you cannot apply VC TAR within one hour of blending, apply one thin coat of Interlux® Vivylux Primer 351/354 prior to application of VC TAR.

PREVIOUSLY PAINTED, GOOD CONDITION

- WITH VC 17m: Clean with fresh water. Sand any loose or failing paint with 220 grit sandpaper and wipe all sanding grit with VC®17m Thinner V72.

- HARD ANTIFOULING: Due to the porosity of hard antifouling paints, it is advisable to sandblast several times to reach an acceptable surface for application of VC®17m EXTRA. Begin sanding with 220 grit sandpaper and work through the sandpaper grades until a final sanding with 220 grit sandpaper is finished. Wipe the surface with Special Thinner 216 to remove sanding residue.

- SOFT ANTIFOULING: Soft antifouling bottoms should be removed prior to application of VC®17m EXTRA.

PREVIOUSLY PAINTED, POOR CONDITION

- Remove all antifouling paint and prepare with system for bare surface.

Application

MIXING: VC®17m EXTRA is a two part product that must be mixed prior to use. Mix VC®17m EXTRA Part A base with Part B copper 100% by weight in a large container. Mix thoroughly. Stir occasionally during application.

APPLICATION: VC®17m EXTRA is applied with a short nap roller or solvent resistant foam roller, 4-6 wide on an electric or hand spray gun.

Low fouling, cold saltwater: Three coats: the first season and two coats each season to follow. Freshwater: two coats, the last season and one coat each season after.

COLOR: VC®17m EXTRA changes color after several weeks of immersion. YBA405 (Original): At application - copper bronze. Changes to brownish grey.

YBA405 (Blue): At application - dark copper bronze. Changes to dark blue.

Hints:

1. When rolling, pour only small amounts into a steel roller tray.

2. Roll quickly and in one direction only.

3. When spraying, make sure the nozzle is not more than 6 inches from the hull.

4. Do not use conventional spray equipment as this may result in dry spots.

5. Use VC®17m Thinner V72 if needed. 10% by volume minimum.

6. VC®17m EXTRA covers 85 sq. ft. per quart.
