DANGER:
Chemical Carcinogen: Benzalkonium chloride (BKC) and dimethyl benzyl ammonium chloride (DBCM) are known to be toxic. DBCM is a suspected human carcinogen. Exposure to BKC, DBCM, aqueous dimethyl benzyl ammonium chloride (DDBAC) and aqueous dimethyl benzyl dimethyl ammonium chloride (DMA) has been associated with nasal and sinus cancer. Small amounts of benzalkonium chloride, dimethyl benzyl ammonium chloride, DBCM, and aqueous DBCM are used as skin irritants in various topical medications.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Chemically burned skin and eyes. Benzalkonium chloride and dimethyl benzyl ammonium chloride are toxic by ingestion and can cause severe gastrointestinal damage. Benzyl alcohol and benzalkonium chloride are toxic by inhalation and can cause severe respiratory damage.

ENVIRONMENTAL HAZARDS

Streptococcus pyogenes [Strep], Staphylococcus aureus- Vancomycin Intermediate Resistant (VISA), Candida albicans, Trichophyton mentagrophytes (a cause of ringworm). Staphylococcus aureus [AIDS virus], *Hepatitis B Virus (HBV), *Hepatitis C Virus (HCV), and Aspergillus Niger, Can-navirus [SARS][cause of Severe Acute Respiratory Syndrome], *Vaccinia [Pox virus], *HIV-1 Type 1,*Herpes Simplex Virus Type 2, *Human coronavirus, *Influenza A Virus/Hong Kong, Streptococcus pyogenes [Strep], Staphylococcus aureus- Methicillin resistant (MRSA), *Herpes Simplex Virus

PRECAUTIONS FOR USE

STORAGE AND DISPOSAL

Disposal of Infectious Materials: Blood / body fluids must be thoroughly cleaned by means of absorbent materials, such as sponges, Cloths or towels, to remove gross visible blood / body fluids and during decontamination procedures.

Cleaning Procedures: Use a 10-minute contact time for all other viruses, fungi, bacteria, toxins and disease agents. The use-solution can be applied with a cloth, mop, sponge, or coarse spray, or soaking. For sprayer applications, use a 2 oz. per gallon of water to kill Adenovirus Type 7 (room temperature). HBV and HCV are inactivated after a 10 minute contact time.

STORAGE AND DISPOSAL

Dispose of infectious waste in a designated sharps container in areas inaccessible to children. Do not contaminate water, food or feed by storage or disposal. Do not use in water treatment processes involving potable water. Disposal of Pesticide Wastes:}:{

Nonrefillable container. Do not reuse or refill this container. Do not contaminate water, food or feed by storage or disposal. Do not use in water treatment processes involving potable water. Disposal of Pesticide Wastes:}:{
