Liquid Fruit Tree Spray

CONTROLS BOTH LISTED INSECTS AND LISTED DISEASES ON FRUIT TREES, FLOWERS, ORNAMENTAL EVERGREENS, AND STRAWBERRIES

CONCENTRATE

Makes up to 42 gallons

ACTIVE INGREDIENTS:
- Captan (CAS No. 133-06-2) ................. 11.76%
- Related Derivatives ......................... 0.24%
- Malathion (CAS No. 121-75-5) ............ 6.00%
- Carbaryl (CAS No. 63-25-2) ............... 0.30%
- *OTHER INGREDIENTS .................... 81.70%

*Contains Petroleum Distillate

TOTAL 100.00%

See back panel for First Aid and additional Precautionary Statements.

KEEP OUT OF REACH OF CHILDREN

WARNING

NET CONTENTS:
ONE QUART (32 FL. OZ.)
**FRUIT TREE STAGES**

- **Green Tip Stage:** When branch tips show green tissue.
- **Pre Bloom Stage:** When blossom buds show full color before opening.
- **Bloom:** When blossoms are open. Do not apply to plants in bloom.
- **Petal Fall Stage:** When last petals have fallen from blossoms.
- **Peaks:** Stages to Harvest: 1st Cover; 7-10 days after petal fall. 2nd Cover to Harvest: Cut-off date before harvest.

**PEACHES**

Insect/Diseases:

APPLES
Apple maggots, codling moths, Japanese beetles, leaf hoppers, plum curculios, aphids, mildew, black cherry aphid, fruit tree leaf blight.

CHERRIES
Plum curculios, cherry fruit flies, cherry fruit worms, black cherry aphid, fruit tree leaf blight.

PEARS
Cherry leaf spot.

GRAPES
Botrytis rot, brown rot blossom blight and fruit rot, cherry leaf spot.

PEARS
Cherry leaf spot.

CHERRIES
Plum curculios, cherry fruit flies, cherry fruit worms, black cherry aphid, fruit tree leaf blight.

PEARS
Cherry leaf spot.

GRAPES
Botrytis rot, brown rot blossom blight and fruit rot, cherry leaf spot.
All rates in chart below are given Tablespoons per gallon. Shake well before using.

**PEACHES**

Insects/Diseases: Plum curculio, Japanese beetle, spider mite, oriental fruit moth; green, peach, black cherry, black peach, nasty plum aphids, brown rot (fruit), thrips, spider, scab, brown rot (blossom blight), coryneum blight.

**FRUIT TREE STAGES**

**Dormant:** Absence of growth fall, winter or spring.

**Green Tip Stage:** When branch tips show green tissue.

**Pre Bloom Stage:** When blossom buds show full color before opening.

**Bloom:** When blossoms are open. Do not apply to plants in bloom.

**Petal Fall Stage:** When last petals have fallen from blossoms.

**1st Cover:** To Harvest: 7-10 days after petal fall.

**2nd Cover to Harvest:** To cut-off date before harvest.

**STRAWBERRIES**

Insects/Diseases: Strawberry weevils, aphids, spider mites, lygus bugs, flea beetles, ornate leafhopper, spittle bugs, Japanese beetles, field crickets, Botrytis rot (gray mold), leaf spots. Use 2 1⁄2 teaspoons concentrate per gal. of water. Do not use more than 3 qts. of spray suspension per 100 sq. ft. of strawberry beds (broadcast spray) or per 100 linear feet of band or row 1 ft. wide (banded or directed) spray per single application. Multiple use of 4 applications per growing season. Do not apply within 14 days of harvest. Minimum retreatment interval 7 days. Not for use in California.

**ROSES, ORNAMENTAL EVERGREENS AND FLOWERS**

Mix 10 Tablespoons per gallon of water.

Insects: Aphids, apple maggot, bagworm, black cucumber, bud moth, cherry fruit fly and worm, crawling moth, plum curculio, flea beetle, fruit tree bud roller, gypsy moth, Japanese beetles, leaf hoppers, lesser peach aphid, lygus bugs, mealybug, mites, peach leaf curl, peach leaf curl mummy, pear slugs, psylla, red banded leaf roller, scale (Forbes, Putman, San Jose), spittle bug, tent caterpillars.

Diseases: CARNA TION (Rust, Alternaria Leaf Spot), CHRYSANTHEMUMS (Botrytis Flower Blight), ROSE (Black Spot) — Apply at first sign of disease. Repeat at 7 to 10 day intervals. Use the shorter interval under conditions favorable to infection.

Begin applications when pests or disease symptoms first appear or conditions favor their development and repeat at weekly intervals or as necessary to maintain control. Remember, it is easier to prevent damage than to cure it. Therefore, a preventative spray schedule is recommended, starting at early signs of plant growth. Do not use within 14 days of harvest. Minimum retreatment interval 7 days.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: This product should be stored in the original unopened container in a secure, dry place. Do not contaminate with other pesticides or fertilizers. The product should never be heated above 55°C (131°F). Do not store for long periods of time at a temperature in excess of 25°C (77°F). Store and transport in an upright position.

PESTICIDE DISPOSAL: If partly filled: Call your local solid waste agency for disposal instructions. If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

DISCLAIMER: To the extent consistent with applicable law, buyer assumes all risks or use, storage or disposal.

PECTICIDE DISPOSAL: This product should be stored in the original unopened container in a secure, dry place. Do not contaminate with other pesticides or fertilizers. The product should never be heated above 55°C (131°F) and should not be stored for long periods of time at a temperature in excess of 25°C (77°F). Store and transport in an upright position.

PESTICIDE DISPOSAL: If partly filled: Call your local solid waste agency for disposal instructions. If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

In the event consistent with applicable law, buyer assumes all risks or use, storage or disposal.
