SANITEX Plus®
Cleaner | Disinfectant | Deodorizer

Bactericidal / Tuberculocidal
Fungicidal / Virucidal*

ACTIVE INGREDIENTS:
n-Alkyl (60% C_{14}, 30% C_{16}, 5% C_{12}, 5% C_{18})
  dimethyl benzyl ammonium chloride.......................... 0.154%
n-Alkyl (68% C_{12}, 32% C_{14})
  dimethyl ethylbenzyl ammonium chloride.................. 0.154%
  Isopropanol .......................................................... 21.000%
OTHER INGREDIENTS ................................................. 78.692%
TOTAL .................................................................. 100.000%

KEEP OUT OF REACH OF CHILDREN
CAUTION

See back panel for First Aid and additional Precautionary Statements.

Net Contents: 1 Quart (0.95 Liters)
EPA Reg. No. 1130-15-64285
EPA Est. 1130-IL-1

CROSSTEX®
A CANTEL MEDICAL COMPANY

Manufactured for: Crosstex International, Inc.
Corporate Office: 10 Ranick Road, Hauppauge, NY 11788-4209 USA
E-mail: crosstex@crosstex.com
STORAGE AND DISPOSAL

Do not contaminate water, food, or feed.

By storage or disposal:

Pesticide Storage: Store in original container in a cool, well-ventilated, preferably locked area, inaccessible to children and pets.

Pesticide Disposal: To avoid waste, use all material in this container by application according to label directions. If wastes cannot be avoided, wastes must be disposed of on site or at an approved waste disposal facility. Container Disposal: Non-refillable container. Do not reuse or refill this container. Triple rinse at least three times as follows: Empty the remaining contents into application equipment or a mix tank and drain wastes after the flow begins to drop. Fill the container to half with water and recirculate. Shake for 10 seconds. Pour remaining into application equipment or a mix tank or store waste for later use or disposal. Drain for 10 seconds after the flow begins to drop. Repeat this procedure two more times. Offer the container for recycling, if available; otherwise dispose of container in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through skin. Causes moderate eye irritation. Avoid breathing vapor and contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID

If Inhaled: Move person to fresh air if person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if necessary.

Physical or Chemical Hazards:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DEFINITIONS FOR USE

This product is not to be used as a terminal or high-level disinfectant on any surface or instrument that is to be exposed directly to the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contains intact mucous membranes which do not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to predisperse or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

Cleaning, Pre-Cleaning and Disinfecting:
Prior to disinfection, pre-clean all surfaces with SaniTea Plus, making sure to remove all gross dirt and heavy soil. Apply solution to surface and allow surface to remain for 10-15 minutes prior to wiping or allow surfaces to air dry. For disinfection of Avian Influenza A, use this product only for surfaces that are not conducive to treatment by immersion or excess liquid. Note: Disinfect food contact surfaces must be rinsed with potable water after cleaning and/or disinfection and before use. After disinfection, critical and semi-critical devices must undergo appropriate terminal sterilization/high-level disinfection.

Triple rinse container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain seconds after the flow begins to drip. Fill the container fully with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer the container for recycling, if available, otherwise dispose of container in trash.

PRECAUTIONARY STATEMENTS
Hazards to Humans and Domestic Animals

CAUTION: Harmful if inhaled or absorbed through skin. Causes moderate eye irritation. Avoid breathing vapors and contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

FIRST AID
If Inhaled: Move person to fresh air if person is not breathing, call 911 or an emergency number or go for treatment. You may also contact 1-800-535-5053 for emergency medical treatment information.

Physical or Chemical Hazards: Do not use or store near heat or open flame.

Sanitex Plus® is a general purpose cleaner, deodorizer and disinfectant to be used where control of cross-contamination from treated surfaces is of prime importance. Sanitex Plus provides a way to effectively clean and disinfect hard, non-porous environmental surfaces. Sanitex Plus aids in the reduction of cross-contamination from treated surfaces. Ready-to-use.

Use Sanitex Plus on all hard, non-porous environmental surfaces including: Chrome, Formica® Brand, glass, painted surfaces, plastics such as polycarbonate, polyvinylchloride, polypropylene and polyethylene, Plexiglas®, glazed porcelain, stainless steel and vinyl. Use Sanitex Plus on: counters/countertops, CPR training mannequins, dental chairs/countertops/instruments/implements/ OR surfaces, exercise equipment/benches/mats, anesthesia equipment, surfaces, ER surfaces, hardshats, headphones, laboratory equipment/surfaces, medical instruments/implements, nail care implements, patient care devices, OR lights/tabs/surfaces, respirators/face pieces, respiratory therapy equipment, tanning beds, telephones, veterinary care surfaces/instruments/implements and devices/surfaces potentially contaminated with disease-causing microorganisms.

This product has demonstrated effectiveness against Influenza Strain A/HK virus and Avian Influenza A and is expected to inactivate all Influenza A viruses including Pandemic 2009 H1N1 (formerly called “swine flu”).

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, whether into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Cleaning, Pre-Cleaning and Deodorizing: Prior to disinfection, pre-clean all surfaces with Sanitex Plus, making sure to remove all gross dirt and heavy soil. Apply solution to surface and allow surface to remain wet for 30 seconds prior to wiping with a paper towel or clean cloth/sponge. Sanitex Plus may be used as a cleaner on all surfaces.

To Disinfect Hard, Non-Porous Surfaces: To Kill Acinetobacter baumannii, Aspergillus niger, Avian Influenza A Virus, Candida albicans, Canine Distemper Virus, Escherichia coli 0157:H7, Hepatitis B Virus* (HBV), Hepatitis C Virus* (HCV), Herpes Simplex Virus Type 2, HIV-1* (AIDS Virus), Influenza Strain A2/HK virus, Mycobacterium bovis BCG, Mycobacterium tuberculosis, Nontuberculous Mycobacterium, Norovirus, Parvovirus B19, Pathogenic Bacteria, Poliovirus, Pseudomonas aeruginosa, Salmonella enterica, Salmonella typhimurium, Staphylococcus aureus, Syphilis, Tuberculosis, and West Nile Virus.

GENERAL DISINFECTION AGAINST HBV, HCV AND HIV-1

Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces/objects contaminated with blood or body fluids are disposable. Remove gloves or mask and wash hands before handling items soiled with blood or body fluids are disposable. Remove gloves and wash hands before handling items soiled with blood or body fluids.

Release Coat - Adheres to Bottle

HBV, HCV and HIV-1 Precautions: Sanitex Plus effectively inactivates HBV, HCV and HIV-1 on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects can be associated with transmission of HBV, HCV and/or the human immunodeficiency virus Type 1 (HIV-1) associated with AIDS.

Personal Protection: Specific barrier protection items to be used when handling items soiled with blood or body fluids are disposable. Latex gloves, masks and eyecoverings are required. Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces/objects contaminated with blood or body fluids.

Contact Time: Thoroughly wet surface. Allow the surface to remain wet for 6 minutes prior to wiping or allowing surface to air dry.

Infectious Materials Disposal: Cleaning materials used that may contain blood/body fluids must be autoclaved and/or disposed of in accordance with local regulations for infectious materials disposal.
