A Fungicide for the Prevention and Control of Certain Diseases of Turfgrass and Ornamentals.

ACTIVE INGREDIENT:
Iprodione: 3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide* .................................................. 23.3%*
OTHER INGREDIENTS: ........................................................................ 76.7%
TOTAL: ............................................................................................. 100.0%

This product contains petroleum distillate.
*Equivalent to 2 pounds Iprodione per gallon.

EPA Reg. No. 432-888

KEEP OUT OF REACH OF CHILDREN

CAUTION

See Booklet for Complete Precautionary Statements and Directions for Use.
For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE information Call 1-800-331-2867

FIRST AID

If swallowed:  
• Call a poison control center or doctor immediately for treatment advice.
• Do not give any liquid to the person.
• Do not induce vomiting unless told to by a poison control center or doctor.
• Do not give anything to an unconscious person.

If in eyes:  
• Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

If on skin:  
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If inhaled:  
• Move person to fresh air.
• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
• Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency for additional information call toll free 1-800-334-7577.

Note to Physician: This product may pose an aspiration pneumonia hazard. Contains petroleum distillates.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION
Harmful if swallowed, absorbed through skin or inhaled. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT

Merch. distributors, others exposed to the concentrate, cleaners/repairers of equipment, and applicators applying as a dip treatment must wear long-sleeve shirt and long pants, chemical-resistant gloves such as barrier laminate, nitrile rubber (≥ 14 mils), neoprene rubber (≥ 14 mils), or vinyl (≥ 14 mils), chemical-resistant apron, and chemical-resistant footwear plus socks.

Applicants using hand held equipment must wear coveralls over long-sleeve shirt and long pants, chemical-resistant gloves such as barrier laminate, nitrile rubber (≥ 14 mils), neoprene rubber (≥ 14 mils), or vinyl (≥ 14 mils), chemical-resistant footwear plus socks, chemical-resistant headgear for overhead exposures, and a dual/mist filtering respirator (MSA/NOSH approval number prefix TC-210), or a NIOSH-approved respirator with any R, P or HE filter.

Applicants using aircraft or mechanical ground equipment (groundboom, airblow, etc.), and flaggers for aerial applications must wear long-sleeve shirt and long pants, and shoes plus socks.

Applicants using truck-mounted equipment with a handgun at the end of a hose (i.e., for commercial turfgrass or ornamental applications) and all other handlers not specified above must wear long-sleeve shirt and long pants, chemical-resistant gloves such as barrier laminate, nitrile rubber (≥ 14 mils), neoprene rubber (≥ 14 mils), or vinyl (≥ 14 mils), chemical-resistant footwear plus socks, chemical-resistant headgear for overhead exposures, and a dual/mist filtering respirator (MSA/NOSH approval number prefix TC-210), or a NIOSH-approved respirator with any R, P or HE filter.

In order to assure maximum crop tolerance and disease control, follow restrictions and precautions of the package label.

User Safety Recommendations

User should:
• Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

This chemical can contaminate surface water through aerial and ground spray applications. Under some conditions, it may also have a high potential for runoff into surface water after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlaying tile drainage systems that drain to surface water.

This pesticide is toxic to invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label before using this product. Do not apply this product in a way that will contact workers or other persons, either directly or indirectly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval of 12 hours for ornamental uses. The restricted entry interval for all other WPS uses is 24 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, includes coveralls, chemical-resistant gloves such as barrier laminate, nitrile rubber (≥ 14 mils), neoprene rubber (≥ 14 mils), or vinyl (≥ 14 mils), and shoes plus socks.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to ornamental and turf uses (golf courses, landscapes and institutional areas) of this product that are NOT within the scope of the Worker Protection Standard (WPS) for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

In order to assure maximum crop tolerance and disease control, follow restrictions and precautions of the package label.

PRODUCT RESTRICTIONS

Use of this product at residential sites is prohibited. Except for use on golf courses, if applying this product adjacent to a water body such as a lake, reservoir, river, permanent stream, marsh or natural pond, estuary, or commercial fishpond, there must be at least a 25-foot vegetative buffer strip between the water body and the point of application.

Do not apply this product when the wind direction is toward aquatic areas.

TURF

26GT® FUNGICIDE is a foliar applied fungicide, prescribed for turfgrass disease control on golf courses, sod farms, and institutional areas where fine turf is grown. When used in conjunction with good turf management practices, 26GT FUNGICIDE is effective in controlling the following diseases:

Spring, Summer And Fall Diseases: Dollar Spot, Brown Patch, Large Patch, Fusarium Blight and Necrotic Ring Spot*, Leaf Spot and Melting Out, Microdochium Patch, Corticium Red Thread, Curvularia blight and Anthracnose (suppress).
Summer Stress Complex/Summer Decline:
For management of Summer Stress Complex/Summer Decline, apply Chipco® Signature™ Fungicide at 4 to 8 ounces of product per 1000 square feet with 26GT FUNGICIDE at 2 to 4 fluid ounces of product per 1000 square feet.

Pythium Blight:
Pythium blight will be controlled by the tank mixing of Chipco® Signature™ Fungicide or Banol Fungicide with 26GT FUNGICIDE. If a tank mixture is used, follow label directions for the use of that product and apply at the rate prescribed for control of the target disease organism.

Gray Snow Mold:
Tank mix with a labeled rate of fungicide for the preventive control of Gray Snow Mold. Application must be made in autumn before snow cover occurs. Apply with sufficient water to obtain adequate coverage (1 to 5 gallons of spray solution per 1000 square feet). Use the higher rate if the turf remains frozen prior to snow cover. For optimal control, reapply this treatment if a winter thaw and loss of snow cover occurs.

DIRECTIONS FOR USE ON TURF

Begin applications when conditions favor disease development or when the disease first appears unless otherwise noted.

</table>

Do not exceed a total of 35 fluid oz. product/1000 ft² per year (24 lbs a.i./A/year).
Do not make more than 6 applications per year.
Under severe conditions, the higher rate and/or shorter interval of applications are prescribed for all diseases. When disease pressure is light to moderate, the lower rates and longer intervals are prescribed.

*Not registered for use in California to control this disease.

TANK MIXTURES

If turf is threatened by additional diseases, 26GT FUNGICIDE is compatible with most commonly used fungicides such as ProStar®, Compass®, and Heritage®. If a tank mixture is used, follow label directions for the use of that product.
Do not exceed a total of 35 fluid oz. 26GT FUNGICIDE per 1000 ft² per year (24 lbs a.i./A/year) with a maximum of 6 applications.

Use as a preventative every 14 days.
Use only preventative foliar applications when conditions first become favorable for disease development. Make additional applications at 28 day intervals if needed.

NOTE: On Fairways, for Dollar Spot Control use 2 to 4 Fluid Ounces/1000 FT²

Summertime Complex/Summer Decline:
For management of Summertime Complex/Summer Decline, apply Chipco® Signature™ Fungicide at 4 to 8 ounces of product per 1000 square feet with 26GT FUNGICIDE at 2 to 4 fluid ounces of product per 1000 square feet.

Pythium Blight:
Pythium blight will be controlled by the tank mixing of Chipco® Signature™ Fungicide or Banol Fungicide with 26GT FUNGICIDE. If a tank mixture is used, follow label directions for the use of that product and apply at the rate prescribed for control of the target disease organism.

Gray Snow Mold:
Tank mix with a labeled rate of fungicide for the preventive control of Gray Snow Mold. Application must be made in autumn before snow cover occurs. Apply with sufficient water to obtain adequate coverage (1 to 5 gallons of spray solution per 1000 square feet). Use the higher rate if the turf remains frozen prior to snow cover. For optimal control, reapply this treatment if a winter thaw and loss of snow cover occurs.

ADDITIONAL DISEASE CONTROL

If turf is threatened by additional diseases, 26GT FUNGICIDE is compatible with most commonly used fungicides such as ProStar®, Compass®, and Heritage®. If a tank mixture is used, follow label directions for the use of that product.
DIRECTIONS FOR USE ON ORNAMENTALS

NOT FOR RESIDENTIAL USE

FIELD, LANDSCAPE AND GREENHOUSE ORNAMENTALS AND CONIFER NURSERIES

26GT FUNGICIDE is a broad spectrum fungicide that may be applied safely to a wide range of ornamental flowering and foliage plants, either as a foliar spray, drench or dip. Please read specific instructions and use only as directed.

PLANT TOLERANCE: Plant tolerances to 26GT FUNGICIDE have been found to be acceptable in the specific genera and species listed on this label. It is not possible to evaluate every species or variety of ornamental plant for its tolerance to 26GT FUNGICIDE. The user must test for possible phytotoxic responses in other plants on a small area basis using prescribed rates prior to commercial use.

HOW TO USE 26GT FUNGICIDE AS A FOLIAR SPRAY or DRENCH

Foliar Spray: When conditions become favorable for disease development, apply 26GT FUNGICIDE as a foliar spray to insure thorough coverage of the plant foliage.

Under severe disease pressure, use the highest prescribed rate and/or the shortest spray interval. When disease pressure is light to moderate, the lower rates and longer intervals are prescribed.

RESTRICTIONS:
- Do not apply more than 2.5 (1.25 lbs a.i./A) quarts product/acre per application.
- Do not make more than 4 applications per crop per year.

Drench: Apply 26GT FUNGICIDE as a drench at seeding and/or after transplanting for Rhizoctonia control. Under severe disease pressure, use the highest prescribed rate. When disease pressure is light to moderate, the lower rate is prescribed.

RESTRICTIONS
- Do not exceed a total of 35 fl oz product /1000 sq ft per year (24 lbs a.i./A/Year).
- Do not make more than 6 applications per year.

NOTE: Do not use 26GT FUNGICIDE on Spathiphyllum.
*Do not use 26GT FUNGICIDE as a drench on impatiens, and pothos.

Aerial Web Blight (Rhizoctonia sp.)
Alternaria Leaf Blight (Alternaria euphorbiae)
Alternaria Leaf Spot (Alternaria panax, Alternaria tenuissima)

TANK MIXTURES
Additional Disease Control: If ornamentals are threatened by additional diseases, 26GT FUNGICIDE is compatible with most commonly used fungicides. For control of diseases caused by Pythium and Phytophthora, 26GT FUNGICIDE can be tank-mixed with ALIETTE® brand fungicide. Consult the ALIETTE label for a complete listing of diseases controlled and for application rates.

INFORMATION ON DROPLET SIZE

- **Volume** – Use high flow rate nozzles to apply the highest practical spray volume. Nozzles with higher rates produce larger droplets.
- **Pressure** – Do not exceed the nozzle manufacturer’s prescribed pressures. For many nozzle types lower pressure produces larger droplets. When higher flow rates are needed, use higher flow rate nozzles instead of increasing pressure.
- **Number of nozzles** – Use the minimum number of nozzles that provide uniform coverage.
- **Nuzzle Orientation** – Orienting nozzles so that the spray is released parallel to the airstream produces larger droplets than other orientations and is the prescribed practice. Significant deflection from horizontal will reduce droplet size and increase drift potential.

BOOM LENGTH

- **Volume** – Use high flow rate nozzles to apply the highest practical spray volume. Nozzles with higher rates produce larger droplets.
- **Pressure** – Do not exceed the nozzle manufacturer’s prescribed pressures. For many nozzle types lower pressure produces larger droplets. When higher flow rates are needed, use higher flow rate nozzles instead of increasing pressure.
- **Number of nozzles** – Use the minimum number of nozzles that provide uniform coverage.
- **Nuzzle Orientation** – Orienting nozzles so that the spray is released parallel to the airstream produces larger droplets than other orientations and is the prescribed practice. Significant deflection from horizontal will reduce droplet size and increase drift potential.

Note: This section is advisory in nature and does not supersede the mandatory label requirements.

APPLICATION HEIGHT

- **Volume** – Use high flow rate nozzles to apply the highest practical spray volume. Nozzles with higher rates produce larger droplets.
- **Pressure** – Do not exceed the nozzle manufacturer’s prescribed pressures. For many nozzle types lower pressure produces larger droplets. When higher flow rates are needed, use higher flow rate nozzles instead of increasing pressure.
- **Number of nozzles** – Use the minimum number of nozzles that provide uniform coverage.
- **Nuzzle Orientation** – Orienting nozzles so that the spray is released parallel to the airstream produces larger droplets than other orientations and is the prescribed practice. Significant deflection from horizontal will reduce droplet size and increase drift potential.

Note: This section is advisory in nature and does not supersede the mandatory label requirements.
Applications must not be made at a height greater than 10 feet above the top of the largest plants unless a greater height is required for aircraft safety. Making applications at the lowest height that is safe reduces exposure of droplets to evaporation and wind.

SHANTH ADJUSTMENT: (This section is advisory in nature and does not supersede the mandatory label requirements)

When applications are made with a crosswind, the swath will be displaced downwind. Therefore, on the up and downwind edges of the field, the applicator must compensate for this displacement by adjusting the path of the aircraft upwind. Swath adjustment distance must increase, with increasing drift potential (higher wind, smaller drops, etc.).

WIND: (This section is advisory in nature and does not supersede the mandatory label requirements)

Drift potential is lowest between wind speeds of 2 – 10 mph. However, many factors, including droplet size and equipment type determine drift potential at any given speed. Application must be avoided below 2 mph due to variable wind direction and high inversion potential. NOTE: Local terrain can influence wind patterns. Every applicator must be familiar with local wind patterns and how they affect spray drift.

TEMPERATURE AND HUMIDITY: (This section is advisory in nature and does not supersede the mandatory label requirements)

• When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation.
• Droplet evaporation is most severe when conditions are both hot and dry.

TEMPERATURE INVERSIONS: (This section is advisory in nature and does not supersede the mandatory label requirements)

Applications must not occur during a temperature inversion because drift potential is high. Temperature inversions restrict vertical air mixing, which causes small-suspended droplets to remain in a concentrated cloud. This cloud can move in unpredictable directions due to the light variable winds common during inversions. Temperature inversions are characterized by increasing temperatures with altitude and are common on nights with limited cloud cover and light to no wind. They begin to form as the sun sets and often continue into the morning. Their presence can be indicated by ground fog; however, if fog is not present, inversions can also be identified by the movement of smoke from a ground source or an aircraft smoke generator. Smoke that travels laterally in a concentrated cloud (under low wind conditions) indicates an inversion, while smoke that moves upward and rapidly dissipates indicates good vertical air mixing.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE STORAGE

Store in a cool dry location.

PESTICIDE DISPOSAL

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER HANDLING

Non-refillable container. Do not reuse or refill this container. Offer for reconditioning, if appropriate. Triple rinse container (or equivalent) promptly after emptying.

NOTE:

Local weather conditions and wind can influence drift patterns. Every applicator must be familiar with local wind patterns and how they affect spray drift.

GUIDELINES:

• When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation.
• Droplet evaporation is most severe when conditions are both hot and dry.

• When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation.

• Droplet evaporation is most severe when conditions are both hot and dry.

• When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation.

• Droplet evaporation is most severe when conditions are both hot and dry.

• When making applications in low relative humidity, set up equipment to produce larger droplets to compensate for evaporation.

• Droplet evaporation is most severe when conditions are both hot and dry.

IMPORTANT: READ BEFORE USE

Read the entire Directions for Use, Conditions, Disclaimer of Warranties and Limitations of Liability before using this product. If terms are not acceptable, return the unopened product container to date. By using this product, user or buyer accepts the following Conditions, Disclaimer of Warranties and Limitations of Liability.

CONDITIONS: The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Bayer CropScience LP. All such risks shall be assumed by the user or buyer.

DISCLAIMER OF WARRANTIES: TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BAYER CROPSCIENCE LP MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, OF MERCHANTABILITY OR OF FITNESS FOR A PARTICULAR PURPOSE OR OTHERWISE, THAT EXTEND BEYOND THE STATEMENTS MADE ON THIS LABEL. No agent of Bayer CropScience LP is authorized to make any warranties beyond those contained herein or to modify the warranties contained herein. A Fungicide for the Prevention and Control of Certain Diseases of Turfgrass and Ornamentals.

**ACTIVE INGREDIENT:**

Iprodione: 3-(3,5-dichlorophenyl)-N-(1-methylethyl)-2,4-dioxo-1-imidazolidinecarboxamide) \(\ldots\) 23.3%*

**OTHER INGREDIENTS:** \ldots \ldots. \ldots 76.7%

**TOTAL:** 100.0%

This product contains petroleum distillate.

*Equivalent to 2 pounds Iprodione per gallon.

**KEEP OUT OF REACH OF CHILDREN**

**CAUTION**

Harmful if swallowed, absorbed through skin or inhaled. Avoid contact with skin, eyes, or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS**

This chemical can contaminate surface water through aerial and ground spray applications. Under some conditions, it may also have a high potential for runoff into surface water after application. These include poorly draining or wet soils with readily visible slopes toward adjacent surface waters, frequently flooded areas, areas overlaying extremely shallow ground water, areas with in-field canals or ditches that drain to surface water, areas not separated from adjacent surface waters with vegetated filter strips, and areas overlaying tile drainage systems that drain to surface water.

This pesticide is toxic to invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Drift and runoff may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment washwater or rinsate.

See the booklet for complete precautionary statements and directions for use.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE**

Store in a cool dry location.

**PESTICIDE DISPOSAL**

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER HANDLING**

Non-refillable container. Do not reuse or refill this container. Offer for reconditioning, if appropriate. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill or by other procedures approved by State and local authorities.

This product contains a chemical known to the state of California to cause cancer.

**FIRST AID**

If swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- Do not give any liquid to the person.
- Do not induce vomiting unless told to by a poison control center or doctor.
- Do not give anything to an unconscious person.

If in eyes:

- Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
- Call a poison control center or doctor for treatment advice.

If on skin:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If inhaled:

- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor or going for treatment. In case of medical emergency for additional information call toll free 1-800-334-7577.

**Note to Physician:** This product may pose an aspiration pneumonia hazard. Contains petroleum distillates.

**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**CAUTION**

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**PESTICIDE STORAGE**

Store in a cool dry location.

**PESTICIDE DISPOSAL**

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER HANDLING**

Non-refillable container. Do not reuse or refill this container. Offer for reconditioning, if appropriate. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Offer for recycling, if available, or puncture and dispose of in a sanitary landfill or by other procedures approved by State and local authorities.

This product contains a chemical known to the state of California to cause cancer.
