TRILUX® 33

PRODUCT DESCRIPTION: TRILUX® 33 was developed for use on aluminum-bonded panels, but can be used on fiberglass, wood and glass surfaces. TRILUX® 33 uses a water-borne, acrylic resin system with a single application. The surface must be prepared before the resin application. This product is for use on industrial or commercial environments below the finish coat temperature recommended.

DIRECTIONS FOR USE: TRILUX® 33 is a water-based, quick-drying coating that can be applied to a wide variety of materials. It is recommended for use on exterior surfaces.

APPLICATION PROCEDURES

1. Thoroughly clean and dry the area to be coated.
2. Apply TRILUX® 33 using a brush or roller until the surface is completely coated. Allow to dry for 24 hours.

PREPARATION

BARE ALUMINUM: On small metal surfaces, or in areas where sandblasting is not practical, the aluminum surface should be cleaned with a non-alkaline detergent and a soft brush. Apply TRILUX® 33 with a paintbrush or roller until the surface is completely coated. Allow to dry for 24 hours.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

KEEP OUT OF THE REACH OF CHILDREN

DANGER

Dangers:

1. Causes skin burns. Causes substantial but temporary eye injury. May be fatal if inhaled. Harmful if ingested.
2. Causes harm by inhalation, contact with skin, and contact with eyes.
3. Wash thoroughly with soap and water after handling and before eating, drinking, or smoking.

STATEMENT OF PRACTICAL TREATMENT

1. If swallowed:
   - Immediately call a poison control center or physician.
   - Do not induce vomiting unless told to do so by a poison control center or physician.
   - Do not give any liquid to the person.
   - Do not give anything by mouth to an unconscious person.

2. In case of contact with skin:
   - Wash thoroughly with soap and water.
   - If on clothes, remove clothes and wash clothing with soap and water.

3. If in eyes:
   - Hold eye open and rinse slowly and gently with water for 15-20 minutes.

4. If on mucous membranes:
   - Rinse thoroughly with water or saline.

5. In case of overdose:
   - Call a poison control center or doctor for further treatment advice.

COMPONENTS

Physical and Chemical Properties:

- Color: Clear, low-solids, water-borne finish
- Viscosity: 35-50 seconds (at 25°C)
- Film dry time: 1 hour
- Film harden: 2 hours
- Film thickness: 0.1 mm (after 24 hours)
- Film density: 0.65 g/cm³
- Film weight: 0.8 kg/m²

APPLICATION

For applications on residential (non-commercial) applications:

- Apply TRILUX® 33 using a brush or roller until the surface is completely coated.
- Allow to dry for 24 hours.

For applications on commercial (non-residential) applications:

- Apply TRILUX® 33 using a spray gun or roller until the surface is completely coated.
- Allow to dry for 24 hours.

For applications on industrial (non-commercial) applications:

- Apply TRILUX® 33 using a brush or roller until the surface is completely coated.
- Allow to dry for 24 hours.

CLEANING

- Clean brushes and rollers with soap and water after each use.
- Do not use TRILUX® 33 on painted surfaces.

PACKAGING

- TRILUX® 33 is supplied in 5-gallon and 55-gallon drums.

DISPOSAL

- Disposal of TRILUX® 33 should be in accordance with local regulations.
