This product is designed specifically as a general purpose, ready-to-use cleaner and disinfectant for use in hospital, nursing home, home, transportation terminals, office buildings, manufacturing facilities, lodging establishments, retail businesses and athletic/entertainment facilities where housekeeping is of prime importance in controlling the hazard of cross contamination. It is formulated to disinfect hard, non-porous inanimate environmental surfaces: Restrooms, walls, metal surfaces, stainless steel surfaces, glazed porcelains, glazed ceramic tile, plastic surfaces, shower stalls, bathtubs, and cabinets. For plastic and painted surfaces, spot test on an inconspicuous area before use. May be used in the kitchen on counters, dishes, appliances, and stovetops. A moist poof is possible due to surfaces in direct contact with food. In addition, active ingredients are incorporated into the product to destroy these areas which generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, basements, restrooms and other areas which are prone to odors by microorganisms.

This product contains no phosphates or phosphorus.
