This pesticide is toxic to aquatic plants, fish and aquatic invertebrates. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARD**

This product is corrosive to mild steel.

**STORAGE AND DISPOSAL**

Non-refillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple rinse as follows: [For containers < 5 gallons in size] - Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. [For containers > 5 gallons in size] - Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Repeat and tighten caps. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by other procedures approved by state and local authorities. Do not apply this product in a way that will contact workers or other persons.

**CONDITIONS OF SALE AND WARRANTY**

Thor GmbH warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label only when used in accordance with label directions under normal conditions of use. THOR GMBH MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY EITHER OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Handling, storage and use of the product by Buyer or User are beyond the control of Thor GmbH and Seller. Risks such as ineffectiveness or other unintended consequences resulting from, but not limited to, failure to follow label directions will be assumed by the Buyer or User. IN NO CASE WILL THOR GMBH OR SELLER BE HELD LIABLE FOR CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE HANDLING, STORAGE OR USE OF THIS PRODUCT.

**UN 3265, CORROSIVE LIQUID**

ACIDIC, ORGANIC, N.O.S. (mixture containing 5-Chloro-2-methyl-4-isothiazolin-3-one and 2-Methyl-4-isothiazolin-3-one (3:1)), 8, PG-II

**KEEP OUT OF REACH OF CHILDREN**

**DANGER - PELIGRO**

See Side panel for additional precautionary statements

**Note to physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

**HOT LINE NUMBER:** In case of emergency, for additional information call toll free 1-800-424-9300. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

**Precautionary Statements:** Hazards to Humans and Domestic Animals

**DANGER**

CORROSIVE. CAUSES IRREVERSIBLE EYE DAMAGE. HARMFUL IF ABSORBED THROUGH SKIN. DO NOT GET IN EYES, ON SKIN OR ON CLOTHING. AVOID CONTACT WITH SKIN. PROLONGED OR FREQUENTLY REPEATED SKIN CONTACT MAY CAUSE ALLERGIC REACTION IN SOME INDIVIDUALS. REMOVE CONTAMINATED CLOTHING AND WASH BEFORE REUSE.

Mixers, loaders, and others exposed to methylisothiazolinone must wear:
- Long-sleeve shirt and long pants
- Socks and Shoes
- Goggles or face shield
- Chemical-resistant gloves (such as rubber or made out of any waterproof material)

Follow manufacturer’s instructions for cleaning / maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

**User Safety Recommendations:** users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly. Discard clothing or other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Industrial microbiocide for use in metal working fluids, “metal cleaning fluids, “hydraulic fluids, adhesives, tackifiers, paints, building materials, polymer latices, “aqueous compositions, dispersed pigments and in liquid household consumer, industrial, janitorial-products and semi-solid/solid household consumer, industrial, janitorial-products which are classified as indoor non-food and non-food applications. READ AND FOLLOW THE DIRECTIONS FOR USE ON THE ACCOMPANYING INFORMATION SHEET.

* Not approved for this use in the State of California

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

Typical applications and suggested range of use concentrations based on total weight of product are as follows:

**PRESERVATIVE FOR METAL WORKING FLUIDS**

ACTICIDE® SPX microbiocide is recommended for the control of bacteria and fungi in aqueous metal working fluid solutions and emulsions.

The preservative should be dispensed into the use dilution of the metal working fluid using a metering pump and uniformly dispersed throughout the system.

For a noticeably fouled system use an initial dose of 64 to 160 fluid ounces (4.5 to 10 lb) per 1000 gallons of emulsion followed by subsequent maintenance dosage. A higher dosage rate and/or increased frequency of treatment may be required depending upon the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

**PRESERVATIVE FOR ADHESIVES AND TACKIFIERS**

ACTICIDE® SPX microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene and acrylic latices.

ACTICIDE® SPX microbiocide is recommended as a preservative for tackifiers derived from rosin and hydrocarbon resins.

For storage during extremely high temperatures and humidity, use up to 0.3% (3.0 lb per 1000 lbs formulation).

**PRESERVATIVE FOR BUILDING MATERIALS**

ACTICIDE® SPX microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, spackling, grouting, and concrete admixtures.

### PRESERVATIVE FOR LATICES

**ACTICIDE® SPX microbiocide** is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices including: acrylics, styrene/butadiene, carboxylated styrene/butadiene, ethylene/vinyl acetate and biopolymers intended for industrial use such as xanthan gum, gum arabic, guar gum, protein derived polymers, starches and casein derived polymers.

Note: To insure uniform mixing, add **ACTICIDE® SPX microbiocide** to latex or solutions slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.

### PRESERVATIVE FOR PAINTS AND COATINGS

**ACTICIDE® SPX microbiocide** is recommended as an in-container preservative for the control of bacteria and fungi in water based coatings such as paper, wood coatings and paints used for architectural, product finishes and special purpose coatings.

A higher dosage rate may be required for storage during extremely high temperatures and humidity.

*Special purpose coating uses*

Use as a preservative for:
- Electrodeposition paints or solutions
- Photoplating solutions or coatings
- Fount (or fountain) solutions used in the printing process as a maintenance fluid/coating and as a special coating for printing plates
- Spin finish coatings for fibers.

*Not approved for these uses in the State of California*

The application/addition directions for these special purpose coating uses are:
**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

### ELECTRODEPOSITION

ACTICIDE® SPX microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE® SPX microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.

*Not approved for this use in the State of California*

**Tankside Addition to Electrodeposition Systems:**

ACTICIDE® SPX microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing.

When the system is noticeably fouled, add 650 to 2245 ppm ACTICIDE® SPX microbiocide (6.4 to 22.9 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved.

When microbial control is evident, add 321 to 962 ppm ACTICIDE® SPX microbiocide (3.2 to 10.1 gallons per 10,000 gallons of fluid in the system) weekly or as needed to maintain the system.

A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

*Not approved for this use in the State of California*

**TREATMENT OF ELECTRODEPOSITION PAINT COMPONENTS**

**Initial Dose of Paint Components:**

ACTICIDE® SPX microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain 321 to 2245 ppm product.

*Not approved for this use in the State of California*

**Supplemental Tanked Dosing of Electrodeposition System:**

If additional microbial control is necessary, ACTICIDE® SPX microbiocide may be added to the electrodeposition system tankside to supplement the microbiocide incorporated through paint components.

If the system becomes noticeably fouled, add 650 to 2245 ppm ACTICIDE® SPX microbiocide (6.4 to 22.9 gallons per 10,000 gallons of fluid in the system). Repeat until control is achieved.

When microbial control is evident, the system can be maintained by addition of 321 to 962 ppm ACTICIDE® SPX microbiocide (3.2 to 10.1 gallons per 10,000 gallons of fluid in the system) weekly or as needed.

*Not approved for this use in the State of California*

**NOTE:** Regardless of the manner of incorporation, the total level in the system should never exceed 2245 ppm ACTICIDE® SPX or 22.9 gallons per 10,000 gallons of system fluid.
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*INK/INK COMPONENTS, *PHOTOPLATE PROCESSING/PHOTO PROCESSING, and *FOUNTAIN SOLUTIONS:

ACTICIDE® SPX microbiocide is recommended for the control of bacteria and fungi in photofilm processing such as stabilizer solutions and in fountain solutions. ACTICIDE® SPX is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® SPX is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners.

ACTICIDE® SPX should be added to achieve the recommended dosage range for ink, ink components, fountain solutions and photofilm processing chemical of 0.1 to 1.0% on a total weight basis. The optimum level range for acidic fountain solutions is 0.2% to 0.5%; the optimum level range for neutral fountain solutions is 0.5% to 0.8%. A level adjustment may be necessary to accommodate the slight change in solution formulations.

*Not approved for this use in the State of California

NOTE: To insure uniform mixing, add ACTICIDE® SPX microbiocide to latex or solution slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required.

*INDUSTRIAL PROCESS WASH WATER

ACTICIDE® SPX microbiocide is recommended for the control of bacteria and fungi in the storage of process wash waters.

*Not approved for this use in the State of California

*PRESERVATIVE FOR AQUEOUS COMPOSITIONS

ACTICIDE® SPX microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in aqueous products such as aqueous emulsions and dispersions including:

* surfactants
* stabilized oil/water emulsions
* surface preparation compounds
* foam control products
* nutrient solutions
* pesticide formulations.

CONCENTRATES:

ACTICIDE® SPX microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 0.05 and 0.33% ACTICIDE® SPX microbiocide.

*Not approved for this use in the State of California

*INK/INK COMPONENTS, *PHOTOPLATE PROCESSING/PHOTO PROCESSING, and *FOUNTAIN SOLUTIONS:

ACTICIDE® SPX microbiocide is recommended for the control of bacteria and fungi in photofilm processing such as stabilizer solutions and in fountain solutions.
