Timbretreat® ICP-5
KEEP OUT OF REACH OF CHILDREN
WARNING

EPA Reg. No. 270-3280-00061
EPA Est. No. 270-NY-12000

ACTIVE INGREDIENT
*pentachloro-
TOTAL

*Contains xylene range aromatic solvents. Contains petroleum distillates. Contains 3.2 pounds Permethrin per gallon

IF IN EYES
Hold eye open and rinse slowly and gently with water for 15-20 minutes.
Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor for treatment advice.

IF ON SKIN OR ON CLOTHING
Take off contaminated clothing.
Rinse skin immediately with plenty of water for 15-20 minutes.
Call a poison control center or doctor for treatment advice.

IF SWALLOWED
Immediately call poison control center or doctor.
Do not induce vomiting unless told to do so by the poison control center or doctor.
Do not give anything by mouth to an unconscious person.

IF INHALED
Move person to fresh air.
If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
Call a poison control center or doctor for further treatment advice.

Gallons of spray misted desired
Gallons of Timbretreat® ICP-5 to Use

DISSOLUTION CHART

Directions for Application
To protect unassessed and seasoned lumber and logs from wood destroying insects, such as termites, Carpenter ants and beetles [including powder, soft, borer, and powder], commercially treated wood will up to 0.5% to 0.7% concentration of Timbretreat® ICP-5 is advisable. This solution can be applied by various methods including spraying, brushing, dipping, or pressure treatment. For dip treatments, the wood should be totally submerged in the solution until thoroughly wet and then allowed to dry in a suitable location. Dipping solution to which Timbretreat® ICP-5 has been added should be applied before the wood is left in its final location, for up to 1 to 3 weeks, as long periods of time. Lumber, debris, and other debris should be periodically cleaned from woods.
Pressure treatments, the wood should be placed in the treatment chamber, the Timbretreat® ICP-5 solution added to the system and pressurized to 160 psi for at least 1 hour on the diameter and type of wood treated. This target penetration in softwood is 500 to 1,000 gpm (in the top 0.8-inch of wood or a coating of 0.075 to 0.300 pounds per board foot of wood). After the pressure is released and the system drained, the wood should be placed in a suitable location for drying. For spray treatments, the wood should be sprayed thoroughly including both back and ends.

STORAGE AND DISPOSAL
Do not contaminate other pesticides, herbicides, water, food or feed by storage or disposal of product. Do not store below 70°F (21°C).
Do not use or store near open flame or hot surfaces. Keep out of reach of children and animals. Store in original containers only. Store in a cool dry place and avoid extreme heat. Containers should be tightly closed. After use, rinse covers or disposal material into food or suitable containers. When mixing, avoid contact with eyes, mouth, skin and keep out of reach of children. Contain spillage.

Not for use as a soil drench or for irrigation purposes.

Environmental Hazards
This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter into run off into storm drains, drainage ditches, gutters or surface waterways.

Physical or Chemical Hazards
Do not use or store near heat or open flame.

Disclaimer
Seller (whether manufacturer, distributor, or other) makes no warranty express or implied, including the implied warranty of merchantability, regarding this product except as set forth in the ingredient statement herein, and shall not be liable for special or consequential damages, the exclusive remedy being the replacement of the product. Buyer or user assumes all risk of possession, handling or use of this material when such use and/or handling is contrary to label instructions.

Hazardous Substances
Inhalation
Skin
Ingestion
Eye

TOXICITY CLASSES
Acute oral: not toxic. 
Acute dermal: not toxic. 
Acute inhalation: not toxic. 
Acute ingestion: not toxic. 

Dangerous Properties

Precautionary Statements
Hazard to Humans and Domestic Animals
Warning - Causes skin irritation. Do not get on skin or clothing. Harmful if swallowed. Harmful if absorbed through skin. Avoid contact with eyes. Harmful if inhaled. Avoid breathing vapors or spray mist.

Personal Protective Equipment (PPE)
Some materials that are chemical-resistant to this product are barrier laminate or Viton. If you want more options, follow the instructions for Category G on an EPA chemical resistance category selection chart. All labels, orders, applicators and other handlers must wear:
1. Long-sleeved shirt and long pants.
2. Shoes plus socks.
3. Chemical-resistant gloves for all handlers (as barrier laminate or Viton) [Section Category G].
4. Chemical-resistant apron for mixers, loaders, persons cleaning equipment and persons exposed to the concentrate.

User Safety Recommendations
Use suitably equipped clothing and accessories for the category of work to be performed. Use proper respirator, chemical-resistant gloves and protective clothing for all handlers.

Use in closed areas is prohibited. Provide adequate ventilation in the work area. Wash hands and clothing after use.

Environmental Hazards
This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates. To protect the environment, do not allow pesticide to enter into run off into storm drains, drainage ditches, gutters or surface waterways.

Physical or Chemical Hazards
Do not use or store near heat or open flame.
