INSECTICIDE WATER SOLUBLE PACKETS

Tempo Ultra WSP can be tank mixed with pesticides currently registered for use on buildings. For best results, treat entire area of floor or floor coverings. Use high rate to control surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building. Tempo Ultra WSP can be tank mixed with pesticides currently registered for use on buildings. For best results, treat entire area of floor or floor coverings. Use high rate to control surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.

TO APPLY
• Use on food contact surfaces only when facility is in use. Apply to furniture or upholstery where prolonged contact by food may occur.
• Use on food contact surfaces only when facility is in use. Apply to furniture or upholstery where prolonged contact by food may occur.
• Use on food contact surfaces only when facility is in use. Apply to furniture or upholstery where prolonged contact by food may occur.
• Use on food contact surfaces only when facility is in use. Apply to furniture or upholstery where prolonged contact by food may occur.
• Use on food contact surfaces only when facility is in use. Apply to furniture or upholstery where prolonged contact by food may occur.

INDOOR POSTS (Continued)

APPARATUS
• Applies app. 100 sq ft/min without or with 40% air dilution.
• Applies app. 100 sq ft/min without or with 40% air dilution.
• Applies app. 100 sq ft/min without or with 40% air dilution.
• Applies app. 100 sq ft/min without or with 40% air dilution.
• Applies app. 100 sq ft/min without or with 40% air dilution.

INDOR POSTS
General Residential Residues

time to apply:

• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.

FOOD PROCESSING PESTS

• Use Rate: 0.025% to 0.05% concentration.

IF IN TESTS
• Make spot, mist, and crevice applications in hard-to-reach areas of buildings.

SLAUGHTER
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.
• Use high rate for surface insects and perimeter pests such as ants, roaches, and crickets. Apply perimeter treatment to reduce the number of insects from entering the building.

INFESTED MATERIALS DISPOSAL

Q AND A

12" 6" 3"
**First Aid**

**If on Skin:**
- Rinse off contaminated clothing.
- Cover the injured area with a non-adherent dressing.
- Call a poison control center or doctor for treatment advice.

**If In Eyes:**
- Hold the eyelids open and flush with water for 15 to 30 minutes.
- Cover the eyes and seek immediate medical attention.
- Call a poison control center or doctor for treatment advice.

**If Inhaled:**
- Move to fresh air. If breathing is difficult, give artificial respiration.
- Call a poison control center or doctor for treatment advice.

**If Swallowed:**
- Do not give anything to an unconscious person.
- Call a poison control center or doctor for treatment advice. 

**Percent Concentration:**
- **Use Rate:** 0.025% to 0.05% concentration.

**Additional First Aid Measures:**
- Wash exposed skin with soap and water.
- Wash hair with soap and water.
- Provide an eye wash station and make sure everyone knows how to use it.

**Precautionary Statements**

**Hazard to Humans and Domestic Animals:**
- Causes moderate eye irritation. Harmful if swallowed, inhaled, or absorbed through the skin.
- **Environmental Hazards:**
- This product is biodegradable, but it can persist in soil and contaminate ground and surface water if not used as directed. It is a potential source of aquatic toxicity.

**Exposure Controls:**
- Follow local, state, and federal regulations and good housekeeping practices.
- Use personal protective equipment (PPE) when necessary to avoid exposure.
- Use a low-pressure system (do not exceed 50 psi at nozzle tip), with a fan-type nozzle to apply the dilution uniformly.

**Application Directions:**

**Foliar Application of Tempo Ultra WSP:**
- Apply where pests have been seen or found, or can find shelter.
- Cover or remove food from area being treated.
- Apply only as specified on this label.

**Indoor Pests:**
- General Household Pests
  - Ants
  - Bees (Honeybees, Bumblebees, Stingless Bees, and Bumblebees)
  - Black Ants
  - Cockroaches
  - Dust Mites
  - Flies
  - Fruit Flies
  - Gnats
  - Grasshoppers
  - Moths

### INSECTICIDE WATER SOLUBLE PACKETS

**Tempo Ultra WSP**

**Use Rate:** 0.025% to 0.05% concentration.

- Take off contaminated clothing.
- Use Rate: 0.025% to 0.05% concentration.
- Re-apply every 7 to 10 days if needed.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

- This pesticide is highly toxic to bees exposed to direct treatment or residues on crops or in field. Bees are actively foraging. Additional information may be obtained by consulting your local agricultural extension service.

**APPLICATION**

- Spot, Mist, or Crack and Crevice Applications
  - To help prevent emergence of adults, treat nests and other areas where pests are present. If needed, re-treat the treated area to prevent hatching of eggs. Apply after the spray has dried and the treated insects have been killed.

**DIRECTIONS FOR USE**

- It is a solution of technical fluvalinate in a suitable diluent and is labeled for outdoor use.
- Do not mix Tempo Ultra WSP with products that contain boron or chlorine.

**Frequently Asked Questions (FAQs)**

- Do not apply to food areas.
- Do not use to control cockroaches and flour beetles.
- Do not apply to furniture or upholstery where prolonged contact by humans is expected.

**First Aid Information**

- For questions or comments, call toll-free 1-800-331-2867.
- Have person sip a glass of water if able to swallow.
- If person is unable to swallow, do not induce vomiting.
- Do not give anything by mouth to an unconscious person.

**Precautionary Statements**

- CAUTION: Poison, Harmful if swallowed, inhaled, or absorbed through the skin.
- CAUTION: Harmful or fatal if swallowed, inhaled, or absorbed through the skin.

**Environmental Hazards**

- Pesticides that are highly toxic to bees exposed to direct treatment or residues on crops or in field are not recommended for use near food processing facilities, and modes of transport. For a list of common facilities where this product is used, contact your local agricultural extension service.

**Read Entire Directions Before Using**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- Read entire directions before using.

**Use Tempo Ultra WSP as a general surface, spot, mist, or crack and crevice treatment to control indoor and outdoor insects.**

**INDOOR USE**

- Do not use in areas where food is prepared or served.
- Do not apply to furniture or upholstery where prolonged contact with humans is expected.

**Facts & Figures**

- Tempo Ultra WSP is a general surface, spot, mist, or crack and crevice treatment.
- It is a solution of technical fluvalinate in a suitable diluent and is labeled for outdoor use.
- Use high rate for severe infestations, faster knockdown, and longer residual.

**How to Apply**

1. Spot, Mist, or Crack and Crevice Applications
2. Applications to Outdoor Pest Control
3. Applications to Food Processing Areas
4. Applications to Food and Feed Handling Establishments

**Additional Directions for Food and Feed Handling Establishments**

- Do not apply to food areas.
- Do not apply to food service areas.
- Do not apply to food service areas.

- Do not apply to food areas.
- Do not apply to food service areas.
- Do not apply to food service areas.
- Do not apply to food service areas.
Apply dilution to the swarm or area to the extent consistent with applicable law.

**NOTICE:** This product cannot be mixed with an insect growth regulator for effective control of most pests.

Apply to the base, tree trunks, fruit trees, grapevines, and other structures. To control ants, apply as a Thuricide bait. For similar uses, follow the most restrictive of labeling directions and posting restrictions.

**GENERAL INSTRUCTIONS**

- Apply to make a tree trunk or fruit tree application. Thoroughly coat the tree with Thuricide bait to achieve the desired result.
- Apply to the base of trees and shrubbery. Apply as a Thuricide bait to achieve the desired result.
- Apply to the base of trees and shrubbery. Apply as a Thuricide bait to achieve the desired result.

**USE RATE**

- 1 packet = 1 g (1 packet = 2 g water)
- 1 packet = 1 g (1 packet = 2 g water)
- 1 packet = 1 g (1 packet = 2 g water)
- 1 packet = 1 g (1 packet = 2 g water)

**WASTE DISPOSAL**

- Do not apply to the water supply or to the water from a well. Dilute the mixture in a separate container before applying.
- Do not apply to the water supply or to the water from a well. Dilute the mixture in a separate container before applying.
