DANGER

Read all precautionary statements on label and all first aid statements before use. Add only into water. Do not mix this product with a small amount of water. If product is exposed to small amounts of water, it can react gas. Do not allow product to contact any foreign matter, including other water treatment products, to cause fire, explosion, or the release of toxic gases. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Failure to follow label directions may cause bodily injury. Re-entry into treated pools is prohibited above levels of 4 ppm for risk of bodily injury.

FIRST AID:

1. If in eyes: rinse immediately with plenty of water. If symptoms continue, consult a physician.
2. IF INhaled: move person to fresh air. If person is not breathing, give artificial respiration immediately. If person is unconscious, do not give by mouth. Call a poison control center or doctor for treatment advice.
3. IF on skin or clothing: remove contaminated clothing. Wash skin with soap and water. If irritation occurs, wash with neutralizing solution and consult a physician. Call a poison control center or doctor for treatment advice.
4. IF absorbed: remove to fresh air. If breathing difficulty occurs, call a poison control center or doctor for treatment advice.

WEIGHT BALANCE:

DOSAGE RATE:

Shock at least once a week, and additional shocking to keep water clean and clear is recommended. For crystal clear pool water, the makers of HTH® treats your pool. It is convenient, easy to use, and won’t overstabilize your pool. For additional protection of skin, wear long sleeves and long pants.

WATER CARE.

SHOCK TREATMENT/SUPER CHLORINATION:

If a blue color appears in the treated pool after applying, it is normal. Reduce dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. If any odor or eye irritation occur, after heavy wind and rainstorms, or if you don’t get expected results, please contact your local HTH® Service Center.

For additional protection of skin, wear long sleeves and long pants. Keep out of reach of children. Read all precautionary statements on label and all first aid statements before use. Add only into water. Do not mix this product with a small amount of water. If product is exposed to small amounts of water, it can react gas. Do not allow product to contact any foreign matter, including other water treatment products, to cause fire, explosion, or the release of toxic gases.

Exposure to heat can cause this product to rapidly decompose, leading to fire, explosion, and the release of toxic gases. Keep out of reach of children. Read all precautionary statements on label and all first aid statements before use. Add only into water. Do not mix this product with a small amount of water. If product is exposed to small amounts of water, it can react gas. Do not allow product to contact any foreign matter, including other water treatment products, to cause fire, explosion, or the release of toxic gases.

In case of exposure, wash with soap and water. If irritation occurs, consult a physician. Call a poison control center or doctor for treatment advice.

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

**DANGER.** Corrosive. Causes irreversible eye damage and skin contact leading to severe burns. In case of contamination, wash exposed skin with large amounts of water until the material is dissolved. Do not use soap or detergent. Wash contaminated clothing and shoes separately from other laundry until all traces of the material are removed.

**KEEP OUT OF REACH OF CHILDREN.** MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS.

**DIRECTIONS FOR USE:**

For shock treatment, see the "WATER BALANCE" and "HOW TO USE" sections.  To maintain a healthy, safe pool, sanitize, shock, and treat pool water according to the following directions:

**HOW TO USE:**

1. When shock treatment increases to 4 ppm, re-entry into treated pools is prohibited above levels of 4 ppm for risk of bodily injury.

2. If a pH adjuster is added to the pool, allow the pH adjuster to dissolve and disperse before adding additional products to the pool.

3. Test free available chlorine residual with a pool test kit. Use a reliable test kit that measures all these ranges.

4. Re-entry into treated pools is prohibited above levels of 4 ppm for risk of bodily injury.

5. How to use: To maintain a healthy, safe pool, sanitize, shock, and treat pool water according to the following directions:

6. Test and balance water.

7. Add algaecide as directed.

**SANITIZE:**

1. When shock treatment increases to 4 ppm, re-entry into treated pools is prohibited above levels of 4 ppm for risk of bodily injury.

**POOL SHOCK TREATMENT:**

1. Before shock treatment, you should shock treat your pool once a week to prevent pool problems. In addition, weekly shock treatment helps maintain pool chemistry.

2. After shock treatment, the pH adjuster is added to the pool. When adding this product to your pool, broadcast the product evenly over a wide area of the deepest part of the pool.

3. Adjustment of the pool 

4. Adjust and maintain pH to 7.2 to 7.6 range. Allow the pH adjusters to dissolve and disperse before adding additional products to the pool.

5. Strong oxidizing agent. This product can increase fire intensity.

**KEEP OUT OF REACH OF CHILDREN.** MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS.

**STORAGE & DISPOSAL:**

Always wear ANSI-approved safety glasses and appropriate personal protective equipment.

**WHEN IN CONTACT WITH SKIN:**

1. Wash hands after handling and before eating, drinking, chewing gum, using tobacco or eating the works. Remove contaminated clothing and wash exposed skin with large amounts of water until the material is dissolved. Do not use soap or detergent. Wash contaminated clothing and shoes separately from other laundry until all traces of the material are removed.

2. Remove contaminated clothing and wash exposed skin with large amounts of water until the material is dissolved. Do not use soap or detergent. Wash contaminated clothing and shoes separately from other laundry until all traces of the material are removed.

**WHEN IN CONTACT WITH EYES:**

1. Wash eyes with large amounts of water until the material is dissolved. Do not use soap or detergent. Wash contaminated clothing and shoes separately from other laundry until all traces of the material are removed.

**KEEP OUT OF REACH OF CHILDREN.** MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS.
**EMERGENCY HANDLING:**

**IF INHALED:**
Remove person to fresh air. If person is not conscious, give artificial respiration, preferably mouth-to-mouth breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing.

**IF SWALLOWED:**
Rinse mouth and swallow 1/2–1 cup water. Call a poison control center or doctor for additional directions.

**IF ON SKIN OR CLOTHING:**
Wash skin immediately with plenty of water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for additional directions.

**FIRST AID:**

- **If in eyes:**
  Hold eye open and rinse slowly and gently with water for 15–20 minutes. Call a poison control center or doctor for additional directions.
- **If inhaled:**
  Remove person to fresh air. If person is not conscious, give artificial respiration, preferably mouth-to-mouth breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing.
- **If swallowed:**
  Rinse mouth and swallow 1/2–1 cup water. Call a poison control center or doctor for additional directions.
- **If skin or clothing:**
  Wash skin immediately with plenty of water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for additional directions.

**FIRST AID: A 15–20 minute rinse is the minimum time to
remove all of the product. Call a poison control center. Do not use any
absorbent materials. Do not remove contaminated clothing without
washing.**

**PAINT LINES ON FLAP SHOULD BE DRAWN ON PAPER TO PROTECT USE OF THIS DIGITAL FILE FOR COLOR TRIMMERS.**

**STORAGE & DISPOSAL:**

- **Application:**
  For best results, see the "WATER BALANCE" section above before treatment. Adjust and maintain pH in the 7.2 to 7.6 range. Allow the pH to adjust naturally and do not adjust the pH for 24 hours after treatment. If necessary, adjust the pH using a pH increaser or decreaser as needed. A balanced water pH is necessary to prevent scale or corrosion damage. Refer to pH Increaser / Decreaser chart in the "WATER BALANCE" section above before treatment. For best results, see the "WATER BALANCE" section above before treatment.

- **Removal:**
  For best results, see the "WATER BALANCE" section above before treatment. Adjust and maintain pH in the 7.2 to 7.6 range. Allow the pH to adjust naturally and do not adjust the pH for 24 hours after treatment. If necessary, adjust the pH using a pH increaser or decreaser as needed. A balanced water pH is necessary to prevent scale or corrosion damage. Refer to pH Increaser / Decreaser chart in the "WATER BALANCE" section above before treatment.

- **Disposal:**
  Provide normal emergency, environmental, and personal safety information. Do not dispose of this product while the filter pump is running. Adjust and maintain pH to 7.2 to 7.6. Allow the pH to adjust naturally and do not adjust the pH for 24 hours after treatment. If necessary, adjust the pH using a pH increaser or decreaser as needed. A balanced water pH is necessary to prevent scale or corrosion damage. Refer to pH Increaser / Decreaser chart in the "WATER BALANCE" section above before treatment.
