INSECTICIDE

ACTIVE INGREDIENT:
Lambda-cyhalothrin\(^1\) ............................ 9.7%
(CAS No. 91465-08-6)

OTHER INGREDIENTS: ........................... 90.3%

TOTAL ........................................... 100.0%

\(^1\)Synthetic pyrethroid, capsule suspension (microencapsulated)

Keep Out of Reach of Children

CAUTION / PRECAUCIÓN
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

Net Contents: 8 oz (0.24 L)
their time of treatment. Such applications are not a substitute for mechanical alteration, soil treatment or foundation treatment, treatment labeled termiticides or mechanical alteration to control subterranean termites, or fumigation for extensive infestations. To ensure the effectiveness of the treatment, it is important to follow the application instructions carefully.

In the state of New York, do not apply within 100 ft. of coastal marshes or streams that drain into coastal marshes. Application in these areas can harm aquatic organisms. To protect these organisms, do not apply this pesticide within 25 ft. of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries, and compost areas.

Use of this pesticide adjacent to water may affect aquatic organisms. To protect these organisms, do not apply this pesticide within 25 ft. of lakes, reservoirs, rivers, permanent streams, marshes or natural ponds, estuaries, and compost areas. This product should be applied in areas where thorough mixing with the soil is likely to occur before wind or rain can blow or wash pesticide from the treated area.

Example calculation: to prepare a mid-rate dilution of Grenade® ER Insecticide, mix 3 fl. oz. (88 mL) of concentrate in 100 gallons. This will result in a 1:32 dilution, which is ideal for general surface treatments.

The application volume for this product ranges from 0.4 fl. oz. (12 mL) to 2 fl. oz. (60 mL). Application volume: 0.4 fl. oz. (12 mL): 0.8 fl. oz. (24 mL): 1 fl. oz. (30 mL): 2 fl. oz. (60 mL).

Multiple applications as necessary to keep pest populations under control, using higher rates as pest pressure increases.

In the event of a spill or leak on floor or paved surfaces, soak up with sand, earth, or synthetic absorbent. Remove to chemical waste storage area until proper disposal can be made.

Pesticide Storage

STORAGE AND DISPOSAL

Do not use this product with oil. Do not use water base sprays of Grenade® ER Insecticide in conduits, motor housings, junction boxes, switch boxes, or any other electrical equipment and bases. Clean food contact surfaces and equipment with an effective cleaning compound and rinse with clean water. If pest pressure increases, increase the application rate or increase the frequency of applications.

A full range of applications is possible in various areas:

- Fields (including Trees, Commercial, Agricultural and Industrial buildings; and parks, recreational areas and athletic fields.
- Parks, Recreational Areas
- Livestock/Poultry Housing Structures and Pet Kennels.
- Around Institutional, Commercial, Agricultural and Industrial buildings; and parks, recreational areas and athletic fields.
- Around Institutional, Commercial, Agricultural and Industrial buildings; and parks, recreational areas and athletic fields.
- Pest Control in Non-Residential Buildings

Ants

The effectiveness of this product in controlling ants is due to its ability to destroy their food source. Ants will forage for food, including the food that is provided by the pesticide, until all food in the area is consumed. After the pesticide is applied, the ants will then leave the area, which reduces the effectiveness of the product.

Baits

If baits are used, make sure that they are placed in areas that are untreated by residual insecticides. This will help to ensure that the baits are effective in controlling the pest population.

Insecticide  may be used inside residential buildings as well as in and around carports, garages, and storage sheds; also around institutional, commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields.

Insecticide  may be used inside residential buildings as well as in and around commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields.

The examples of the use of Insecticide  for surface, surface insect control, and for lawns/turfgrass and ornamentals, and for pest control in non-residential buildings. The examples also explain the use of Insecticide  for the control of ants, and the effectiveness of Insecticide  in controlling ants, including the food source and the process of foraging for food.

The examples also explain the use of Insecticide  for the control of ants, and the effectiveness of Insecticide  in controlling ants, including the food source and the process of foraging for food.

The examples also explain the use of Insecticide  for the control of ants, and the effectiveness of Insecticide  in controlling ants, including the food source and the process of foraging for food.
For use in, on and around buildings and structures for the control of listed pests, including on lawns, ornamental trees and shrubs around residential, institutional, public, commercial, agricultural and industrial buildings; and parks, recreational areas and athletic fields. Do not use on golf course turf.
