Altima® Tb
Disinfectant Cleaner

Ready-To-Use

KEEP OUT OF REACH OF CHILDREN

CAUTION
See Additional Precautionary Statements on Back Panel

FIRST AID:
If ingested: Do not induce vomiting. Do not give anything by mouth if there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids.

For medical assistance, call your Poison Control Center or physician immediately. If medically advisable, give a full stomach lavage with water or milk and washout.

If on skin: Wash skin with soap and water. If irritation occurs, discontinue use.

If in eyes: Rinse with large amounts of water for 15 minutes, then contact your physician.

If on clothing: Remove clothing and wash appropriately.

IN CASE OF EMERGENCY, CALL A POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

1. Remove all animals and feed from areas being treated.
2. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities occupied or traversed by animals.
3. Remove gross filth or heavy soil prior to application of the product. Hold container six to eight inches from surface to be treated. Spray area until it is covered with the solution. Allow product to saturate the surface and remain wet for 5 minutes. Wipe off with a clean cloth, mop or sponge.
4. For disinfection of feed racks, troughs, automatic feeders, fountains and watering appliances scrub with soap or detergent, rinse with water after handling.
5. Apply fresh use solution to floors, walls, cages and other washable hard, non-porous environmental surfaces.
6. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as brushes, brooms and other similar implements and tools used in cleaning or_feed areas, in the solution.
7. For use in treatment of animal housing facilities: Effectively kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with a 2 minute contact time. Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time. *Bacterial spores (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.
8. For disinfection of all the following areas within the livestock environment: floors, walls, doors, doorways, windows, glass, countertops, equipment, feeders, waterers, mangers, chutes, feed troughs, hay mangers, hay blocks, feed bins, manure scrapers, manure removal equipment, animal feeding equipment, mineral and vitamin blocks, feed, and the like. This product may be used as a general non-acid cleaner and disinfectant for use in hospitals, nursing homes, schools and hotels. It is formulated to disinfect hard non-porous environmental surfaces such as walls, ceilings, floors, wood, furniture, windows, fan grills, metal, plastic, tile, porcelain, electronics, metal, glass, wood, and other inanimate surfaces. Resort to the label for disinfection of specific types of surfaces. In addition, this product is designed for use in the kitchen on counters, sinks, appliances, and stovetops. A rinse with potable water is required for surfaces in direct contact with food. Do not use on eating utensils, plates or glasses.

STORAGE AND DISPOSAL

STORAGE:
Store in a cool, dry place. Do not freeze. Do not allow solution to freeze. Do not expose to temperatures below 32°F or above 120°F. Solution is stable for 6 months at room temperature. Solution is stable for 3 months when refrigerated. Do not use solution after the expiration date on the label.

KEEP OUT OF REACH OF CHILDREN

CAUTION
See Additional Precautionary Statements on Back Panel

DISPOSAL OF INFECTIOUS MATERIAL:
SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

If there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the object is not to be excited or disposed of, immediately follow these cleaning procedures:
1. After using the disinfectant, let treated surfaces remain wet for 10 minutes. Wipe with a clean cloth, mop or sponge.
2. If there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the object is to be excited or disposed of, immediately follow these cleaning procedures:
3. Remove blood and body fluids from hard non-porous environmental surfaces. Resort to the label for disinfection of specific types of surfaces. In addition, this product is designed for use in the kitchen on counters, sinks, appliances, and stovetops. A rinse with potable water is required for surfaces in direct contact with food. Do not use on eating utensils, plates or glasses.

PRESкриPTION STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:
Read and check carefully all information, including the specifications in this box. The job will not be sent to print until final okay is received. All information contained on the label and in this box are the responsibility of the final approver.

FIGURE 3-2

1. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
2. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
3. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
4. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
5. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
6. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
7. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.
8. Apply fresh use solution, wash, rinse and the sanitized environmental surfaces.

To disinfect non-food contact surfaces:

Spray evenly over surface. Be sure to wet all surfaces thoroughly. Let product remain on surface for 3 minutes. For Hepatitis A, let surface remain wet for 10 minutes. Wipe with clean cloth, mop or sponge.

To use as a Tuberculocide:

Spray evenly over surface. Be sure to wet all surfaces thoroughly. Let product remain on surface for 3 minutes. For Mycobacterium tuberculosis (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.

For use in treatment of animal housing facilities:

Effectively kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with a 2 minute contact time. Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time. *Bacterial spores (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.

For use in treatment of animal housing facilities:

Effectively kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with a 2 minute contact time. Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time. *Bacterial spores (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.

For use in treatment of animal housing facilities:

Effectively kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with a 2 minute contact time. Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time. *Bacterial spores (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.

Effectively kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with a 2 minute contact time. Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time. *Bacterial spores (BCG) in 5 minutes at 20°C when used as directed on previously cleaned hard, non-porous environmental surfaces.
When used as directed, this product contains 2100 ppm of active germicide making it highly effective against a wide variety of pathogenic microorganisms including bacteria, antibiotic resistant bacteria, viruses, fungi, mold and mildew.

Using approved AOAC test methods under Good Laboratory Practices, in the presence of 10% serum load and 3 minute contact time (unless otherwise noted); this product kills the following on hard non-porous inanimate (environmental) surfaces:

**Bacteria:**
- Pseudomonas aeruginosa, (ATCC 15442)
- Staphylococcus aureus, (ATCC 6538)
- Salmonella enterica, (ATCC 10708) formerly known as Salmonella choleraesuis
- Acinetobacter calcoaceticus, (ATCC 23055)
- Burkholderia cepacia, (ATCC 25416) formerly known as Pseudomonas cepacia
- Campylobacter jejuni, (ATCC 9341)
- Citrobacter freundii, (ATCC 8090)
- Escherichia coli, (ATCC 11229)
- Escherichia coli O157:H7, (ATCC 43890)
- Klebsiella pneumoniae, (ATCC 13883)
- Legionella pneumophila, (ATCC 33153)
- Listeria monocytogenes, (ATCC 15313)
- Micrococcus luteus, (ATCC 4698)
- Morganella morganii, (ATCC 25830)
- Neisseria gonorrhoeae, (ATCC 10541)
- Proteus mirabilis, (ATCC 13358)
- Proteus vulgaris, (ATCC 13315)
- Salmonella enteritidis, (ATCC 4931)
- Salmonella schottmuelleri, (ATCC 10719)
- Salmonella typhi, (ATCC 6539)
- Serratia liquefaciens, (ATCC 35556)
- Shigella dysenteriae, (ATCC 33133)
- Shigella flexneri, (ATCC 9380)
- Streptococcus pyogenes (clinical isolate)
- Vibrio cholera, (ATCC 11623)
- Yersinia enterocolitica, (ATCC 23715)

**Antibiotic-Resistant Bacteria:**
- Enterococcus faecalis, (ATCC 51299); Resistant to Vancomycin [VRE]
- Staphylococcus aureus, (ATCC 33591); Resistant to Methicillin [MRSA]
- Staphylococcus epidermidis, (ATCC 51625); Resistant to Methicillin [MRSE]
- Streptococcus pneumoniae, (ATCC 51915); Resistant to Penicillin [PRSP]

**Viruses:**
- Adenovirus Type 2, (VR-846)
- Herpes Simplex Virus Type 1 (HSV-1), (VR-733)
- Herpes Simplex Virus Type 2 (HSV-2), (VR-734)
- Human Coronavirus, (VR-740)
- Influenza Virus Type A2 (Hong Kong), (VR-544)
- Poliovirus Type 1, (VR-192)
- Rhinovirus Type 39, (VR-540)
- Respiratory syncytial virus, (VR-26)
- Rotavirus, (Strain WA)

Kills *Hepatitis B Virus (HBV), *Hepatitis C Virus (HCV) and *HIV-1 (AIDS virus) (HTLV-IIIB) when used as directed on hard, non-porous inanimate surfaces with a 1 minute contact time.

Kills *Hepatitis A Virus (HAV) when used as directed on hard, non-porous inanimate surfaces with a 10 minute contact time.

Kills *Norwalk virus and *Feline Calicivirus when used as directed on hard, non-porous inanimate surfaces with a 30 second contact time.

Kills *Human Coronavirus, (VR-740) when used as directed on hard, non-porous inanimate surfaces with 2 minute contact time.

**Veterinary viruses:**
- Avian Influenza Virus, (VR-2072)
- Canine parvovirus, (VR-2017)
- Feline panleukopenia Virus, (VR-648)
- Pseudorabies Virus, (VR-135)

**Fungi/Yeast:**
- Aspergillus niger, (ATCC 16404)
- Candida albicans, (ATCC 18804)
- Trichophyton mentagrophytes, (ATCC 9533)

**Tuberculocidal Activity** – This product exhibits disinfectant efficacy against Mycobacterium tuberculosis (BCG) in 5 minutes at 20° C when used as directed on previously cleaned hard non-porous environmental surfaces.

**Fungicidal Activity** – This product is fungicidal against the pathogenic fungi, Trichophyton mentagrophytes (the fungus which causes Athlete's Foot Fungus) in 3 minutes when used as directed on hard surfaces found in bathrooms, shower stalls, locker rooms, or other clean, non-porous, hard surfaces commonly contacted by bare feet.

**Mold/Mildewstatic Activity** – controls and prevents the growth of mold and mildew Aspergillus niger [ATCC 6275] and the odors caused by them when applied to hard, non-porous environmental surfaces.

**Non-Food Contact Surface Sanitizer for hard non-porous surfaces –** effective against Enterobacter aerogenes (ATCC 15038) and Staphylococcus aureus (ATCC 6538) in 30 seconds.

**Malodors** – eliminates odors and odor-causing bacteria on hard, nonporous surfaces in restroom areas, behind and under sinks and counters, and storage areas and other places where bacterial growth can cause malodors.
