PROVENT MOSQUITOES FROM BECOMING BREEDING, BITING ADULTS
30 DAY PROTECTION
EASY TO APPLY GRANULES
TREATS UP TO 5,455 SQUARE FEET OR 20,183 GALLONS OF WATER

LATIVICIDE PRODUCT TO PREVENT ADULT MOSQUITO EMERGENCE
(INCLUDING Aedes spp. AND THOSE WHICH MAY TRANSMIT WEST NILE VIRUS, ZIKA, DENGUE, CHIKUNGUNYA AND OTHER MOSQUITO-BORNE DISEASES)

300521768
Granules may be applied prior to flooding e.g., ‘pre-hatch’ or ‘pre-flood’) in areas which flood intermittently. In such areas,

Do not use food utensils such as teaspoons, place, or measuring cups for food purposes after use with insecticides.

**NOTE:** ALTOSID® insect growth regulator has no effect on mosquitoes which have reached the pupal or adult stage prior to treatment.

**APPLICATION TIME:** Use Altosid® Pro-G at any stage of larval mosquito development. Applications may be made to temporary or permanent depressions, e.g., ‘pre-hatch’ or ‘pre-flood’) in areas which flood intermittently. In such areas,

**APPLICATION TIME:** Use Altosid® Pro-G at any stage of larval mosquito development. Applications may be made to temporary or permanent depressions, e.g., ‘pre-hatch’ or ‘pre-flood’) in areas which flood intermittently. In such areas,

**APPLICATION SITE:** Altosid® Pro-G may be applied as directed above to temporary and permanent sites which support mosquito larval development. Examples of such sites include: irrigated croplands, pastures, tangles, vineyards, rice fields (domestic and wild), date palm, citrus, nut orchards, berry fields and ponds.

**NOTE:** Application of Altosid® Pro-G to sites subject to water flow or exchange will diminish the product’s effectiveness and may require higher application rates and/or more frequent applications.

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store closed containers of Altosid® Pro-G in a cool, dry place. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Pesticide Container Disposal: Non-refillable container. Do not reuse or refill this container. Triple rinse before reuse. 

**Disposal:** 
Pesticides must be disposed of by an authorized waste disposal facility. Central Garden & Pet and its logo are trademarks of Central Garden & Pet Company.

**Altosid, Zoecon and the Zoecon logo are registered trademarks of Zoecon Corporation.**

**STORAGE AND DISPOSAL:** Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store closed containers of Altosid® Pro-G in a cool, dry place. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Pesticide Container Disposal: Non-refillable container. Do not reuse or refill this container. Triple rinse before reuse.
Granules may be applied prior to flooding or at any stage of larval mosquito development. Applications should be continued throughout the entire season to maintain adequate control. Treated larvae continue to develop normally to the pupal stage where they die. Apply Altosid® Pro-G uniformly and repeat application as necessary. Measure and then sprinkle the appropriate amount of Altosid® Pro-G evenly over the surface of the water to be treated in order to control mosquitoes before they become breeding, biting adults. Measure the surface area of the water and follow the table below for the appropriate amount of product to use. Emptying or discarding small containers that are holding water will ensure the best results. In instances where small containers cannot be emptied or discarded and for locations such as flower pots, old tires, urns, etc. use approximately 80 granules for every gallon of water.

**NOTE:** Application of Altosid® Pro-G to sites subject to water flow or exchange will diminish the product’s effectiveness and may require higher application rates and/or more frequent applications.

**APPLICATION SITES:**
- Non-Crop Areas: Altosid® Pro-G may be applied as directed above to temporary and permanent sites which support mosquito larval development. Examples of such sites include: irrigated croplands, pastures, trapeziums, vineyards, rice fields (domestic and wild), date palm, citrus, fruit, nut orchards, berry fields and bogs.
- **Crop Areas:** Altosid® Pro-G may be applied as directed above to temporary and permanent sites which support mosquito larval development. Examples of such sites include: snow pools, salt and tidal marshes, freshwater swamps and marshes (cattail, red cedar, white maple marshes), woodland pools and meadows, dredging spoil sites, drainage areas, ditches, wastewater treatment facilities, livestock runoff lagoons, retention ponds, harvested timber stacks, swales, storm water drainage areas, sewers, catch basins, tree holes, animal watering troughs, water-holding ponds, beaver ponds, marsh edges, marshes, and manmade water-holding depressions.

Altosid®

Pro-G Insect Growth Regulator

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

GENERAL DIRECTIONS: Zocon® Altosid® Pro-G Insect Growth Regulator (Altosid® Pro–G) releases effective levels of ALTOSID® Insect growth regulator for up to 30 days after application.

For information, call 1-800-248-7763 www.zocon.com

Wastes resulting from the use of this product may contaminate water, food or feed by storage or disposal. Tripe rinse (or equivalent). Then offer for recycling, if available, or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

APPLICATION SITES:

Non-Crop Areas: Altosid® Pro–G may be applied as directed above to temporary and permanent sites which support mosquito larval development. Examples of such sites include: irrigated croplands, pastures, trampled land, ponds, manmade water-holding depressions (i.e., “pre-hatch” or “pre-flood”) in areas which flood intermittently. In such areas, Altosid® Pro-G can prevent adult mosquito emergence from several subsequent floodings. The actual length of control depends on the duration and frequency of flooding events.

Application should be continued throughout the entire season to maintain adequate control. Treated larvae continue to develop normally to the pupal stage where they die.

Apply Altosid® Pro-G uniformly and repeat application as necessary. Measure and then sprinkle the appropriate amount of Altosid® Pro-G evenly over the surface of the water to be treated in order to control mosquitoes before they become breeding, biting adults.

Measure the surface area of the water to be treated with a graduated bucket (i.e., “pre-hatch” or “pre-flood”) in areas which flood intermittently. In such areas, Altosid® Pro–G can prevent adult mosquito emergence from several subsequent floodings. The actual length of control depends on the duration and frequency of flooding events.

Do not use food utensils such as tablespoons, or measuring cups for food purposes after use with insecticides.

NOTE: Altosid® insect growth regulator has no effect on mosquitoes which have reached the pupal or adult stage prior to treatment.

APPLICATION TIME:

In any stage of larval mosquito development, granules may be applied prior to flooding e.g., “pre-hatch” or “pre-flood) in areas which flood intermittently. In such areas, Altosid® Pro-G can prevent adult mosquito emergence from several subsequent floodings. The actual length of control depends on the duration and frequency of flooding events.
