PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Do not get in eyes, on skin, or on clothing. Avoid breathing dust or spray mist. Wash thoroughly with soap and warm water after handling and before eating, drinking, chewing gum, or using tobacco. Remove contaminated clothing and wash before reuse. Wash hands after handling. For broad-spectrum control of crawling and flying insect pests for indoor and outdoor surfaces.

ACTIVE INGREDIENT:
Cyfluthrin, cyano(4-fluorophenyl)imethyl 3-(2,2-dichloroethyl)-2,2-dimethylcyclopropane carboxylate
OTHER INGREDIENTS: 80%

EPA Reg. No. 432-1302-11556
EPA Est. No. 33967-NU-1

If swallowed:
Call a poison control center or doctor immediately for treatment advice.

If in eyes:
Flush eyes with plenty of water for 15 to 30 minutes. Remove contact lenses, if present, after the first 5 minutes. Continue rinsing eye.

If on skin:
Rinse skin immediately with plenty of water for 15 to 30 minutes.

FIRST AID

If inhaled:
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth breathing.

CALL POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

If on skin:
Rinse skin with plenty of water for 15 to 30 minutes.

CALL POISON CONTROL CENTER OR DOCTOR FOR TREATMENT ADVICE.

If swallowed:
Call a poison control center or doctor immediately for treatment advice.

EPA Est. No. 33967-NU-1

ENVIRONMENTAL HAZARDS

This product is toxic to fish and other aquatic organisms. Remove from ponds or other bodies of water. Do not contaminate water when disposing of equipment wash water. Apply this product only as specified on this label. This product is applied toxic to bees exposed to direct treatment or residues on or near crops. Do not apply Tempo® 20 WP insecticide or atrazine in the drift zone where are bees are actively foraging. Additional information may be obtained by consulting your Cooperative Extension Service. See label for complete labeling including Directions for Use and Storage and Disposal.
Tempo®
20 WP Insecticide

For broad-spectrum control of crawling and flying insect pests for indoor and outdoor surfaces.

ACTIVE INGREDIENT:
Cyfluthrin, cyano(4-fluoro-3-phenoxyphenyl)methyl 3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylate ........................................... 20%
OTHER INGREDIENTS ....................................................................................... 80%
.......................................................... 100%

EPA Reg. No. 432-1302-11556
EPA Est. No. 33967-AU-1
STOP – Read the label before use.
CAUTION
PRECAUCION AL USUARIO: Si usted no puede leer o entender inglés, no use este producto hasta que la etiqueta le haya sido explicada ampliamente. (TO THE USER: If you cannot read or understand English, do not use this product until the label has been fully explained to you.)

PRO FACTS

• Quick Knockdown & Residual Control
• Non-staining
• Low Odor

Tempo® 20 WP Insecticide
• Wettable powder containing 20% cyfluthrin

CONTROLS
• Indoor Pests
• Outdoor/Perimeter Pests
For list of specific insects, see directions for use.

WHERE TO APPLY
Apply where pests have been seen or found, or can find shelter.
• In and around buildings and structures

COVERAGE
• Makes up to 42 gallons of finished spray solution for indoors. (420 g size)
• Treats up to 42,000 sq ft. outdoors. (420 g size)

MIXING INFORMATION
• Mix the appropriate amount of Tempo® 20 WP Insecticide with water.
• May tank mix with other pesticides currently registered for similar uses, unless specifically prohibited.

HOW TO APPLY
• General surface spot, mist, or crack & crevice application.

RE-APPLY
• Every 7 to 10 days, if needed.

RE-ENTRY
• Avoid contact with treated surfaces until dry.
• People and pets may re-enter after the treated area is dry.

QUESTIONS
For questions or comments, call toll-free 1-800-633-3796
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**IMPORTANT:** Read entire label and Conditions of Sale before using Tempo® 20 WP Insecticide.

**STRUCTURAL PESTS**

FOR RESIDUAL PEST CONTROL IN AND AROUND BUILDINGS, STRUCTURES AND FOOD/FEED HANDLING ESTABLISHMENTS.

Use Tempo® 20 WP Insecticide as a general surface, spot, mist, or crack and crevice treatment in and around buildings and structures. This includes factories, warehouses, and food processing facilities. For a list of common facilities where this product may be used, see Appendix.

**INDOOR PESTS**

| **Hire** | Merchant grain | Sawtoothed grain |
| **Confused flour** | Larder | Mealworm |

**WHERE TO APPLY**

- Apply where pests have been seen or found, or can find shelter. Use a general surface, spot, mist, or crack and crevice application.

**USE RATE**

- **0.05%—10 g (2 scoops)/gal water**
- **0.1%—20 g (4 scoops)/gal water**
- Use high rate for severe infestations, faster knockdown, and longer residual.
- Always use the high rate for bees, wasps, yellow jackets and hornets.

**HOW TO APPLY**

(Also see APPLICATION FOR INDOOR PESTS)

- Remove or lightly cover fish tanks and disconnect aerators during application.
- Remove pets during application and until treated surfaces are completely dry.
- Avoid contact with treated surfaces until dry.
- Wear safety glasses, goggles, or face shield and a dust/mist respirator when treating overhead areas.

**General Surface Applications**

- Use a low-pressure system (do not exceed 50 psi at nozzle tip), with a fan-type nozzle to apply the dilution uniformly.

**Spot, Mist, or Crack and Crevice Applications**

- Apply directly into voids, cracks and crevices using spray equipment.
- Use a low-pressure system (do not exceed 50 psi at nozzle tip), with a piepoint or variable pattern nozzle or applicator equipment that delivers low volume treatments, such as the Micro-Injector® or Action®.
**WHEN TO APPLY**
- When pests are seen or heard
- Re-apply every 7 to 10 days if needed.

**TODAY INFORMATION**
- Add product when filling spray tank with water; chisel or agitate mixer.
- Diluted spray mixture can be stored overnight. Age this before using.
- Can be used mixed with other pesticides currently registered for similar uses.
- Be sure of physical compatibility; test prep a small area in a break for using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.

**RESTRICTIONS**
- Do not treat entire area of floor or floor covering.
- Do not apply near electrical or heating fixtures.
- Do not apply to furniture or upholstery where prolonged contact may occur.
- Do not apply as a space spray.
- Do not allow children or pets to enter treated areas until surfaces are dry.

**ADDITIONAL DIRECTIONS FOR FOOD AND FEED HANDLING ESTABLISHMENTS**
- Applications may be made to both Food-Filled and non-food areas of food and feed handling establishments.
- Food-filled handling equipment is defined as places other than private residences in which uncooked food is held, processed, prepared, or served. Includes areas for:
  - resealing, storing and packaging food
  - preparing food
  - edible waste storage

**WHERE TO APPLY**
- Enclosed processing systems (kitchen, butchery, equipment, storage, and others)
- Buildings where food is exposed and the facility is in operation are also considered food areas.

**USE NOTE**
- Apply as a general surface spot, mist or crack & crevice application.
- 0.005% – 0.05% (5-50) ounces of water
- 0.005% – 0.05% (5-50) ounces of water
- Use high-waist for severe infestations, lower knockdown, and longer residual.

**HOW TO APPLY**
- Apply to surfaces where food is exposed and the facility is in operation are also considered food areas.

**APPLICATION FOR INDOOR PESTS**
- Use a coarse, low-pressure spray.
- Treat entry points such as around water pipes, doors, windows, and doors.
- Treat areas where pests normally hide such as backyards, corners, and others.

**GENERAL PESTS**
- Around water pipes, under refrigerators, cabinets, sinks, and stoves, being sure to spray cracks and crevices. Spot treat floors or walls beneath furniture, in closets, and storage areas, but do not apply to entire floor area.
- Do not use as a "kitchen spray.
- **Note:** This product can be applied mixed with an insect growth regulator (IGR) for extended control of ants.

**ANTS**
- Apply to the base of walls, e.g., cabinets, around doors, under cabinets, and after places where ants are active.
- Treat entry points such as windows and doors and the outlet perimeter.
- For best results, treat when ants are present.

**PANTRY AND STORED PRODUCT PESTS**
- For best results, clean area before treating. Remove and destroy infested food. Discard food accidentally contaminated with spray.
- For deep storage, dusting, or food storage areas. Remove contents, exposed food, shelf covers, and other items before spraying. When dried, cover shavings with clean paper before replacing items.

**PESTS IN LIVESTOCK HOUSES AND STRUCTURES INCLUDING POULTRY HOUSES AND PETS AREAS**
- Apply as a general surface spot to cracks and crevices spray.
- For best results, clean facilities before applying and treat outdoor perimeter areas.
- Do not allow indoor where animals other than cattle or horses are present.
- Do not use on animal feedstuffs or watering equipment.
- For best results in the high alkaline environment of water tanks due to litter content, pre-soak the tank with water to a pH of 5.0 or less prior to mixing with water-resistant (Tambo).

**WHERE TO APPLY**
- Apply where pests have been seen or found, or can find shelter.
- Apply to areas like buildings, porches, patios, garages, fences, and other areas where pests are found.
- To prevent infestations, treat the building foundation, walls, and around doors, windows, and soffits where pests are active or may enter or hide; also treat the soil, turf, or other substrates adjacent to buildings.

**USE RATE**
- 10 to 20 g (2 to 4 scoops) / 1000 sq ft See Table 1 for mixing directions.
- For fire ants and flying pests 0.05% — 10 g (2 scoops) /gal water
- 0.1% — 20 g (4 scoops) /gal water
- Always use the high rate for fire ants, bees, wasps, yellow jackets and hornets.
- Use high rates for severe infestations, faster knockdown, and longer residual.

**HOW TO APPLY**
(Also see *Perimeter Treatment*; To help prevent infestation of structures, treat area adjacent buildings in a band up to 10 feet wide. Also treat the building foundation to a height of 2 to 3 feet in areas where pests are active or can find entrance.

**APPLICATIONS FOR OUTDOOR/PERIMETER PESTS**
- Apply just enough dilution to adequately cover the area without excessive dripping or runoff.
- More spray than bare soil. If mulch is heavy, rake it back to expose soil before treating.
- Avoid contact with treated surfaces until dry.

**WHEN TO APPLY**
- When pests are seen or found
- Re-apply every 7 to 10 days if needed.

**MIXING INFORMATION**
- Add product when filling spray tank with water; shake or agitate mixture.
- Diluted spray mixture can be stored overnight. Agitate before using.
- Can be tank mixed with other pesticides currently registered for similar uses. To be sure of physical compatibility, first prepare a sample in a small jar using the proper proportions of water and products. Follow the most restrictive of labeling directions and precautions. Do not exceed label rates.

*1 level scoop = 5 grams
FORMULA FOR DETERMINING THE PERCENT CONCENTRATION IN THE FINISHED SPRAY
(Scoops of Tempo® 20 WP Insecticide) X 37.85 = Percent Concentration

APPLICATION FOR OUTDOOR/PERIMETER PESTS

**Ants**
Locate and treat ant nests, if possible. Follow trails of foraging workers, check under objects near the structure, and inspect other likely nest sites. If ants are nesting in the soil, thoroughly drench or inject the nest and surrounding soil. Treat ant trails around windows and doors, along sidewalks, or other areas where seen. Apply a perimeter treatment as described above.

**Bees, Wasps, Yellow Jackets, Hornets**
Use Rate: 0.1% concentration.
Make pin stream applications directly to the nester. To help avoid stingers, treat nests in the evening. Use the insecticide while the insects are inside the nest. For best results, check nests within one or two days to ensure complete kill. Remove and destroy treated nests to prevent emergence of newly hatched insects, secondary pest problems, and possible staining from honey. If removal is not possible, retreat nests if necessary.

**Boxelder Bugs**
Apply directly to boxelder bugs that have congregated around doors and windows and similar areas where they may enter structures. Apply perimeter treatment as described above. For best results, treat infested trees early in the season. Tree spraying may require ornamental license—check with your local regulator.

**Centipedes, Millipedes, Pillbugs, sowbugs**
Apply perimeter treatment to reduce the number of insects from entering the structure. Thoroughly drench or inject around the structure.

**Fire Ants**
Use Rate: 0.1% concentration
Thoroughly drench or inject the entire mound. When using injection treatment, you must treat the bottom of the mound. Apply dilution using a downward and upward motion of the injector tool. For complete distribution, inject in several points throughout the mound. Treat new mounds as they appear. Do not use in pastures or areas of food crop production.

**Flies**
Use Rate: 0.05% to 0.1%
Apply low-volume mist or spray to outside surfaces of buildings, porches, patios, garages, fences, and other areas where flies rest.

**Cluster Fly**
Treat in late summer or fall, just before flies begin looking for winter shelter. Spray siding, eaves, around windows and doors, window screens, and attic. To help reduce infestations, treat cracks and crevices, attics, and other indoor winter hiding places.

**Mosquitoes**
Spray around landscape plants, turf and ground cover, around decks, around building foundations and other places where mosquitoes may rest.

**Scorpions**
Treat around piles of firewood and other areas where scorpions may hide. When possible, remove piles of materials that can harbor the pests. Apply a perimeter treatment.

**STORAGE AND DISPOSAL**
Do not contaminate water, food, or feed by storage or disposal.
**Pesticide Storage:**
- Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, or feed.
- Protect from freezing.
- Store in original containers and out of reach of children, preferably in a locked storage area.
- Handle and store according to manufacturer's instructions to prevent spillage.

**Pesticide Disposal:**
- Pesticide waste may be hazardous.
- Improper disposal of excess pesticides, spray mixtures, or residue is a violation of federal law.
- If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste hot line at the United EPA Regional Office for assistance.

**Container Disposal:**
- Do not use container in connection with food, feed, or drinking water.
- Completely empty container into application equipment. Triple-rinse, or equivalent.
- Dispose of container by delivering it to a recycling center. Disposal and dispose of container in a sanitary landfill or by incineration, if defined by state and local authorities by burning. If material, stop use.

**Spills:**
- If the container is leaking or material is spilled for any reason or cause, carefully sweep material into a pile. Refer to Precautionary Statements on the label for hazards associated with the handling of this material.
- Thrown walk through soaked material.
- Dispose of or discharged for poisons above.
- Keep unauthorized people away.
- You may contact the Bayer Consumer Services Team to describe related procedures or any other questions at 1-800-647-6740 or contact the store at 1-800-440-9000.

**CONDITIONS OF SALE. Read Before Using.**

The directions on this label were determined through research to be appropriate for the correct use of this product. The product has been placed under different environmental conditions than those outdoors similar to those that are ordinary and customary where the product is to be used. Insecticidal control of pests or plant injury may result from the occurrence of extraordinary or unusual conditions, or on failure to follow label directions. In addition, failure to follow label directions may cause injury to animals, birds, and damage to the environment. Bayer offers, and the buyer accepts and uses, this product subject to the conditions that extraordinary or unusual environmental conditions, or failure to follow label directions are beyond the control of Bayer and are, therefore, the responsibility of the buyer. Bayer, 2000 Bayer HealthCare LLC

APPENDIX

Use Tempo® WP Insecticide as a general surface, soil, and crack and crevice treatment. Permitted areas of use in buildings and structures include, but are not limited to:
- valley fields and dairy-product processing plants
- grain mills
- grain storage
- poultry houses
- warehouses

**PRECAUTIONARY STATEMENTS**

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed. Do not eat, drink or smoke while using this product. Wash hands after handling this product or in areas contaminated with it. Keep out of reach of children. Do not enter treated buildings. Do not transplant or add water to treated areas or move treated material from treated premises. Do not contaminate water, food or feed by storage or disposal. Wash off clothing and equipment immediately with soap and water. Do not use immediately after applying water solutions or when it is raining.

**FIRST AID**

- If swallowed: Flush immediately with plenty of water for at least 30 minutes.
- If skin exposure occurs: Remove contaminated clothing and wash skin with soap and water.
- If eye exposure occurs: Hold eye open and flush with running water for at least 15 minutes. Seek medical attention if irritation continues.

**EPA REGULATORY INFORMATION**

- Labeling and registration information is available in the pesticide registration file. For more information, call 1-800-472-7580 (Arkansas) or your state agriculture or health department.

**ENVIRONMENTAL HAZARDS**

This product is toxic to fish and other aquatic organisms. Remove large or small amounts of the product from water by using one of the following techniques:
- Depletion: Remove large amounts slowly over a long period of time.
- Dilution: Dilute with water, then flush with water.
- Depletion: Remove small amounts slowly over a long period of time.
- Dilution: Dilute with water, then flush with water.

**NOTICE TO APPLICATORS**

- Do not apply Tempo® WP Insecticide or any other insecticide to or near water or on grass or other vegetation in areas where it will be found by children or pets or in areas that are accessible to them.
- Do not apply Tempo® WP Insecticide or any other insecticide to or near water or on grass or other vegetation in areas where it will be found by children or pets or in areas that are accessible to them.
- Do not apply Tempo® WP Insecticide or any other insecticide to or near water or on grass or other vegetation in areas where it will be found by children or pets or in areas that are accessible to them.
