The active ingredient, Bacillus israelensis subsp. thuringiensis, is a highly selective microbial insecticide, effective against mosquito larvae in standing water. This product contains tritiated Bacillus israelensis subsp. thuringiensis (or Bti) kills mosquito larvae upon ingesting.

PRECAUTIONARY STATEMENTS - HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through the skin. Avoid contact with skin or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

FIRST AID:

If Inhaled:

Get person into fresh air. If not breathing, give artificial respiration. Call a poison control center or doctor for further treatment advice.

If swallowed:

Do not induce vomiting. Give 1 or 2 tablespoons of water or milk. Call a poison control center or doctor for treatment advice.

If on Skin:

Rinse skin immediately with plenty of water for 15-20 minutes. Take off contaminated clothing. Call a poison control center or doctor for treatment advice.

If on Clothing:

Remove contaminated clothing and wash before reuse. Call a poison control center or doctor for further treatment advice.

ENVIRONMENTAL HAZARDS:

Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

CAUTION:

Harmful if inhaled or absorbed through the skin. Avoid contact with skin or clothing. Avoid breathing spray mist.

For intermediate cases, use the lower rate of 0.2 oz per 50 sq. ft. The pouch will float on the water surface and dissolve within a few minutes, releasing granules coated with Bti. These granules uniformly on the water surface to ensure adequate dispersion of the granules. Lower rate (0.2 oz/50 sq. ft.) can be used in clear water, or when treating small areas such as bird baths, tree holes, etc…

HOW TO APPLY:

BONIDE® Mosquito Beater® WSP™ is provided in a water-soluble pouch to be placed directly on the surface of the water to be treated. The pouch will float on the water surface and dissolve within a few minutes, releasing granules coated with Bti. These granules are ideal for the long-term Bti treatments.

HOW TO APPLY:

• 0.2 oz will treat up to 50 sq. ft. of water. An area approximately 7’ x 7’. When treating larger areas, distribute the pouches throughout the water surface to ensure adequate dispersion of the granules. Lower rate (0.2 oz/50 sq. ft.) can be used in clear water, or when treating small areas such as bird baths, tree holes, etc…

The following table can be used as a guide for determining how much BONIDE® Mosquito Beater® WSP™ to use in a particular situation. Application rates for areas smaller than 50 sq. ft. are listed after the table.
