Mix 1 gallon of Thiram SC with 1 gallon of water per 100 lbs. seed. Mix 1 gallon of Thiram SC with 1 gallon of water per 1,000 sq. ft.

FRUIT CROP APPLICATIONS

- Peach Scab
- Gray Mold
- Anthracnose
- Taphrina deformans
- Botrytis cinerea
- Mycosphaerella

REI: 24 hours

Preventative: Apply in midspring or early summer for fruit tree damage and disease prevention.

Spray near harvest to control diseases like Black Rock. Venturi sprayers and other high volume, low droplet sprayers are recommended for better coverage and disease control.

Spray in early winter just prior to the first snowfall. Apply at 2-5 gal per 1,000 sq ft specified) for proper coverage.

The tank mixture.

Restrictions and limitations and directions for use on all product labels involved in tank mixing. Users (Typhula sp.)

Keep Out Of Reach Of Children

CAUTION

Application Instructions

1. Mix 1 gallon of Thiram SC with 1 gallon of water per 100 lbs. seed. Mix 1 gallon of Thiram SC with 1 gallon of water per 1,000 sq. ft.

2. Spray applications should be made when temperatures are greater than 40°F and relative humidity is less than 70 percent.

3. Use of the active ingredients indicated above in sufficient water results in a concentration of 10-14 fluid ounces per 1,000 sq ft.

4. Apply Thiram SC as a preventative application for disease control.

5. The addition of a latex based sticker prolongs the residual effectiveness of the treatment. Repellency is the result of rendering the treated plant parts distasteful.

6. This product can be used as a repellent in deterring deer from moving into unwanted areas because of the presence of the active ingredients indicated above in sufficient water.

7. Deer Repellency:

   - DO NOT graze or feed cover crops from treated orchards
   - Thiram SC can be used year-round (January through December) in the following states: AK, AL, AR, AZ, CA, CO, DC, FL, GA, HI, IA, ID, KS, KY, LA, ME, MO, MS, MT, NC, ND, NE, NM, NV, OK, OR, SC, SD, TN, TX, UT, VA, WA, WY, RI, VT, WI, and WV

8. Warranty:

   - Thiram SC is a suspension concentrate [SC] containing 2 lbs. of active ingredient per gal.

   - EPA Reg. No. 017312-09
   - State authorization required in California

   - 20 gal containers (5 gal bag-in-box)
**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

All mixers, loaders, applicators, and other handlers must wear:

- Chemical-resistant gloves, except for pilots and for handlers sewing bags of treated seed,
- Shoes and socks, Chemical-resistant gloves made of any waterproof material, and protective eyewear.

**ENVIRONMENTAL HAZARDS**

- Seeds and bulbs that are treated with this product and are then packaged or bagged for future use are hazardous to fish, birds, and mammals. Do not plant treated seeds by hand or any machinery.
- Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment authority. It is unlawful to discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit or other applicable state and federal permits.
- Do not apply this product using a high pressure hand wand or a rights-of-way sprayer.

**ENDANGERED SPECIES**

Treated seeds and bulbs are hazardous to fish, birds, and mammals. Do not plant treated seeds by hand or any machinery. Do not apply this product where conditions favor drift from the treatment area. In addition to the specific spraying conditions noted in the WPS, the handler must be aware of the potential for such impacts when using this product, consult and follow the instructions provided in the EPA Endangered Species Bulletin for the County or Parish in which you are applying this product. To determine whether your County or Parish has a Bulletin, consult [http://www.epa.gov/espp](http://www.epa.gov/espp) before each season’s use of this product.

**FOR SLURRY-TYPE TREATERS:**

- **For Slurry-Type Treater:**
  - The slurry-type treater must not be used if it is not equipped with an enclosed cockpit that meets the requirements listed in the WPS for agricultural pesticides [40 CFR part 170]. This standard contains requirements for the protection of agricultural workers on farms, forests, and other areas that involve contact with anything that has been treated, such as plants, soil, or water, is: Coveralls, overshoes, and hard hats.
  - The handler PPE requirements may be reduced or modified as specified in the WPS. Pilots must use an enclosed cockpit that meets the requirements listed in the WPS [40 CFR part 170]. This standard contains requirements for the protection of agricultural workers on farms, forests, and other areas that involve contact with anything that has been treated, such as plants, soil, or water, is: Coveralls, overshoes, and hard hats.

**ENGINEERING CONTROL STATEMENTS**

- Do not graze treated areas or feed clippings to livestock.
- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit or other applicable state and federal permits.

**PRODUCT INFORMATION**

- **Overview:**
  - Thiram SC is a liquid fungicide for the treatment of rice seed in California.
  - It can provide both curative and protective action of common turf diseases. Start preventative applications when disease first appears and repeat at 14-day intervals below. It can provide both curative and protective action of common turf diseases. Start preventative applications when disease first appears and repeat at 14-day intervals.
  - Thiram SC is effective against a wide range of turf diseases, including Claviceps africana, a pathogen that causes red wheat disease.
  - It is also effective against common turf diseases such as hexaconidium, Sphaeropsis, and Rhizoctonia.

- **Applicability:**
  - Thiram SC is effective on a variety of crops, including:
    - Broccoli, Brussels Sprouts, Cabbage, Carrots, Cauliflower, Cucumbers, and Tomatoes
    - Cucurbita**

ENGINEERING CONTROLS

CHEMIGATION:

For Slurry-Type Treater:

- Add the required amount of THIRAM SC and water to the mixing chamber of the treater. Mix for more than 10 minutes, or until a uniform suspension is obtained.

- For small-capacity treaters, add the required amount of THIRAM SC and water to the mixing chamber and mix for at least 3 minutes, or until a uniform suspension is obtained.

- For large-capacity treaters, add the required amount of THIRAM SC and water to the mixing chamber and mix for at least 5 minutes, or until a uniform suspension is obtained.

- For all treaters, ensure that the treater is properly calibrated and adjusted before applying the THIRAM SC solution.

ENVIRONMENTAL HAZARDS

This chemical is toxic to fish, aquatic invertebrates, oysters and shrimp. Do not apply directly to water, or areas that may later be flooded by rain, irrigation or surface water. Do not apply to bodies of water or near watercourses or water intakes.

Hazardous waste:

- Do not mix or pour THIRAM SC into ordinary trash cans, septic tanks, or sewers.
- Do not dispose of THIRAM SC solution in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.
- Do not discharge THIRAM SC solution into bodies of water or dispose of in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.

Chemical precautions:

- Do not mix or pour THIRAM SC into ordinary trash cans, septic tanks, or sewers.
- Do not dispose of THIRAM SC solution in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.
- Do not discharge THIRAM SC solution into bodies of water or dispose of in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.

For the Treatment of Rice Seed in California

- Do not apply THIRAM SC solution to rice seed that is intended for human consumption.
- Do not apply THIRAM SC solution to rice seed that is intended for poultry or livestock feed.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.
- Do not discharge THIRAM SC solution into bodies of water or dispose of in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.

For the Treatment of Ornamental Bulbs, Corms and Tubers:

- Do not apply THIRAM SC solution to ornamental bulbs, corms or tubers that are intended for human consumption.
- Do not apply THIRAM SC solution to ornamental bulbs, corms or tubers that are intended for poultry or livestock feed.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.
- Do not discharge THIRAM SC solution into bodies of water or dispose of in any manner that may cause of pollution of natural waters.
- Do not use THIRAM SC solution as a flood irrigation for any agricultural use.

FOR SLURRY-TYPE TREATER:

- THIRAM SC solution must be compatible with the treater equipment and method of application.
- THIRAM SC solution must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC solution must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC solution must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC solution must be treated with an approved colorant or other means to distinguish it from other materials.

THIRAM SC has demonstrated good to excellent compatibility with most commercial film coating equipment and applications. Coating procedures identified by polymer/coating companies and film-coating equipment suppliers are satisfactory for use with THIRAM SC. For additional information, contact the polymer/coating company or film-coating equipment supplier.

For manufacturing and packaging:

- THIRAM SC must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC must be treated with an approved colorant or other means to distinguish it from other materials.
- THIRAM SC must be treated with an approved colorant or other means to distinguish it from other materials.

THIRAM SC has a long history of safe use when applied in accordance with the label directions. It is currently registered for a wide range of uses. Use as directed.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

- Chemical-resistant apron when mixing, loading, participating in dip treatments, cleaning up spills, or after exposure to this product. The consumption of alcohol by the applicator can increase the toxicity of the product.
- Respiratory protection may be needed when handling this product. To ensure your health and safety, always consult the product label for PPE requirements.

UNIQUE PROPERTIES

- THIRAM SC is a liquid fungicide used for the treatment of seeds.

APPLICATION METHODS

- For the Treatment of Ornamental Bulbs, Corms and Tubers:
  - Slowly add to the seed while turning in a tumbler such as a concrete mixer. Tumble seed for several minutes until seed is uniformly coated. Slow application is recommended to avoid seed damage.

PRODUCT INFORMATION

- THIRAM SC may be used in combination with other fungicides or insecticides for added control.

HARMFUL IF SWALLOWED OR INHALED

- IF IN EYES:
  - Rinse eyes immediately with water for 15 minutes, if possible. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

- IF INHALED:
  - Get fresh air. If not breathing, call 911 or an ambulance, then give artificial respiration.

- IF ON SKIN:
  - Wash immediately with soap and water. If not rinsing well, get medical attention immediately.

- IF INGESTED:
  - Do not induce vomiting. Have person sip a glass of water if able to swallow.

EQUIPMENT STATEMENTS

- Engineering control statements:
  - Do not use this product in a manner that exceeds the recommended use rate.

SPECIAL INSTRUCTIONS

- Transport to treatment sites in accordance with all applicable federal, state, and local regulations.

- Keep out of reach of children. Do not store near food or food containers.

- This product is not recommended for use before September 15, 2020.

- Do not enter or allow others to enter treated areas until sprays have dried.

- Do not apply this product through any type of irrigation system.

- Apply this product only as a medium or fine spray (ASAE standard 572) or a volume mean diameter or 300 microns or greater for spinning canopies.

- For the Treatment of RiceSeed in California
  - Do not apply this product on rice fields more than once within a 30-day period.

- For the Treatment of Ornamental Bulbs, Corms and Tubers:
  - Slow application is recommended to avoid seed damage.

- Do not apply this product to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and drift-reducing devices may be necessary. For guidance, contact your State Water Board or Regional Office of the National Marine Fisheries Service.

- Do not apply this product to areas where such drift may injure non-target aquatic plants, wetlands, or other sensitive habitats.

- This product is not recommended for use before September 15, 2020.

- Do not enter treated areas until sprays have dried.

- Do not mix this product with or apply with any other pesticides except as directed by the product label.

- This product is not recommended for use before September 15, 2020.

- Do not apply this product through any type of irrigation system.

- Apply this product only as a medium or fine spray (ASAE standard 572) or a volume mean diameter or 300 microns or greater for spinning canopies.

- For the Treatment of Rice Seed in California
  - Do not apply this product on rice fields more than once within a 30-day period.

- For the Treatment of Ornamental Bulbs, Corms and Tubers:
  - Slow application is recommended to avoid seed damage.

- Do not enter treated areas until sprays have dried.

- Do not mix this product with or apply with any other pesticides except as directed by the product label.
lbs. a.i. per bushel (bu.) OR 100 lbs.
Fluid Ounces of Thiram SC per bushel (bu.) OR 100 lbs.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

• Long sleeved shirt and long pants,
• All mixers, loaders, applicators, and other handlers must wear:
  - Chemical-resistant gloves made of any waterproof material,
  - Protective eyewear,
  - Shoes and socks,

Have the product container or label with you when calling a poison control center or doctor, or going to the nearest health professional even if you do not think there is anything wrong.

IF IN EYES
• Remove contaminated clothing immediately. Wash face, exposed skin and clothing with soap and water. Do not rub.
• Call a poison control center or doctor for treatment advice. Use the Emergency Medical Treatment and Active Labor 
  Services Act (EMTALA) hospital nearest you.
• If not wearing protective eyewear, flush eyes immediately with running cold water for 15 minutes. For help, call a 
  poison control center or doctor.
• Use of eyeglasses can protect against flying debris and some liquid splashes. If splashing occurs, use protective
  goggles or these may be protected with eyeglasses.

IF INHALED
• Remove person to fresh air. Loosen clothing around neck and chest. If not wearing protective eyewear, wash 
  face, exposed skin and clothing with soap and water. Do not rub.
• Call a poison control center or doctor for treatment advice. Use the EMTALA hospital nearest you.
• If not wearing protective eyewear, flush eyes immediately with running cold water for 15 minutes. For help, call a 
  poison control center or doctor.
• Use of eyeglasses can protect against flying debris and some liquid splashes. If splashing occurs, use protective
  goggles or these may be protected with eyeglasses.

IF ON SKIN
• Take off contaminated clothing. Wash thoroughly with soap and water. Do not rub.
• Call a poison control center or doctor for treatment advice. Use the EMTALA hospital nearest you.
• If not wearing protective eyewear, flush eyes immediately with running cold water for 15 minutes. For help, call a 
  poison control center or doctor.
• Use of eyeglasses can protect against flying debris and some liquid splashes. If splashing occurs, use protective
  goggles or these may be protected with eyeglasses.

Wash immediately with soap and water, unless otherwise directed. If not wearing protective eyewear, wash face, exposed skin and clothing with soap and water. Do not rub.

PRECAUTIONARY STATEMENTS

Do not enter or allow others to enter treated areas until sprays have dried.

Do not enter or allow workers to enter treated areas that are restricted at the time of application.

Do not enter or allow others to enter treated areas if Treated areas are not being covered by turn areas. If seeds and bulbs are not thoroughly incorporated by the planter during planting, broadcast to soil surface. Ensure that all seeds and bulbs are thoroughly covered with soil, especially in turn areas. If seeds and bulbs are not thoroughly incorporated by the planter during planting, additional incorporation may be required to thoroughly cover exposed seeds and bulbs.

Do not discharge effluent containing this product to sewer systems without previously notifying the State Water Resources Control Board. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters without prior authorization. To limit the potential for such impacts when using this product, consult and follow the engineering control statements:
Fluid Ounces of Thiram SC per bushel (bu.) OR 100 lbs.

See engineering controls for additional requirements and options.

• Long sleeved shirt and long pants,
• Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco

Directions for use

http://www.epa.gov/espp before each season's use of this product.

Tribe, consult the agency responsible for pesticide regulation.

In any cases where applications are to be made outside of the hours from 9:00 AM to 5:00 PM Eastern time.

IF INHALED

• Move person to fresh air.
• Remove contaminated clothing.

IF IN EYES

• Carefully rinse eyes with large amounts of water for at least 15 minutes. Do not attempt to remove contact lens in the first 5 minutes.

CLOTHING

• Wear long-sleeved shirt and pants.

IF ON SKIN OR INHALED

• Wash with soap and water. If irritation is persistent, seek medical care.

IF INHALED OR IN EYES

• If symptoms persist, call a poison control center or doctor immediately.

**PRODUCT INFORMATION**

- **Active Ingredient:** 20% Thiram SC
- **Formulation:** 20% Thiram SC
- **Solvent:** Water
- **Density:** 1.05 lbs. of a.i. per gallon
- **pH:** 7.5-8.0

**PRODUCT DIRECTIONS**

- **Treatter Tank Concentration:**
  - Dilute Application: 1.0 gallon of Thiram SC per 100 gallons of water
  - Concentrate Application: 1.0 gallon of Thiram SC per 100 lbs. of seed

**TINNITUS APPLICATION**

- **Application Rate:** 0.131 lbs. a.i. per 100 lbs. of seed

**CRUDE APPLICATION**

- **Application Rate:** 4.0 fluid ounces of Thiram SC per 100 lbs. of seed

**SPECIAL APPLICATIONS**

- **Treated Grass Clippings:** Use Thiram SC at a rate of 0.123 lbs. a.i. per 1000 sq ft. for lawn and garden applications.
- **Treated Silage:** Use Thiram SC at a rate of 0.123 lbs. a.i. per 1000 sq ft. for treated silage applications.

**THREATENED SPECIES**

- **Black Mold**
- **Gray Mold**
- **Brown Patch**
- **Dollor Spot**
- **MeltOut, RedThread,**
- **Goes**

**TURF APPLICATIONS**

- **Application Rate:** 3.75 fluid ounces per 1000 square feet
- **Maximum Application Rate:** 5.0 quarts per acre
- **Restrictions:** Not for use on residential turf, parks, athletic fields, or turf grown for sale or other commercial use.

**STORAGE AND DISPOSAL**

- **Container Handling:** Store in original containers only. Keep container closed.
- **Pesticide Disposal:** Rinse containers by pouring contents into a 5-gallon bucket and adding 25 gallons of water. Mix contents, then pour into a 55-gallon steel drum or other suitable container. Seal drum tightly.

**NOTES**

- **Rice seed treatment in California**
- **Restrictions:** Not for use in California or Arizona.
- **Instructions:** Use Thiram SC at a rate of 0.123 lbs. a.i. per 1000 sq ft. for lawn and garden applications.

**INFORMATION**

- **EPA Est. No. 32557-BEL-1**
- **Taminco US LLC**
- **Manufactured by:**

**Thiram SC**

- **Fungicide for Plant Disease Control, Seed Treatment, and Animal Repellency**

**TERMS OF SALE & USE**

- **Active Ingredient:** 12.1% Thiram SC
- **Other Ingredients:**
  - **TOTAL:** Thiram SC is a suspension concentrate (SC) containing 12.1% of active ingredient on a gwa.
- **Supply Contents:** 2.5 Gallons (US Gal)
To mix, fill the spray tank about 2/3 full of water, and with agitator running, pour specified amount of material into spray tank. Finish filling the tank with water and continue agitation until material is thoroughly dispersed in the spray tank. Continue agitation and apply immediately.

Applications of Thiram SC are most effective when made before infection periods. Addition of a spreader/sticker to the finished spray may improve coverage of fruit and foliage. Make fresh spray mixtures for each application.

Thiram SC has a maximum application rate of 5 applications per year (12.5 quarts of product per 1000 square ft). Do not apply more than 2.5 quarts of product per acre per single application (2.6 lbs. of a.i. per acre per single application). Thiram SC cannot be used on crops that will bear fruit within one year of application.

Restrictions:

• Do not apply more than 4 applications per year (4.2 lbs of a.i. per 1000 square ft per year)

• The maximum application rate of Thiram SC is 11.19 gallons (47 lbs. a.i. per acre or 1.08 lbs. a.i. per 1000 sq. ft.) (7.1 fl oz of Thiram SC per 1000 sq. ft).

  - **0.131 lbs. a.i.**

Fruit Rot (Phytophthora erythroseptica)

**Application Rate**

- **2.5**
  - **2.6 lbs. a.i. / Acre**

- **10-14 day intervals as needed.**

- **1.0 application per year.**

- **No more than 2.5 quarts per acre per single application.**

Brown Patch

**Application Rate**

- **2.5**
  - **2.6 lbs. a.i. / Acre**

- **Total of 5 applications per year.**

- **12.5 quarts of product per year.**

Dollar Spot

**Application Rate**

- **2.5**
  - **2.6 lbs. a.i. / Acre**

**Note:** Thiram SC has a maximum application rate of 5 applications per year (12.5 quarts of product per year). Do not apply more than 2.5 quarts of product per acre per single application (2.6 lbs. of a.i. per acre per single application). Application of Thiram SC is most effective when made before infection periods. Addition of a surfactant will aid in settling basins. Not for use on residential turf, parks, athletic fields, or turf grown for sale or other commercial use.
**Thiram SC**

**Fungicide for Plant Disease Control, Seed Treatment, and Animal Repellency**

**SPECIFIC APPLICATIONS FOR THIRAM SC**

**FRUIT CROP APPLICATIONS**

**PRODUCT INFORMATION**

Thiram SC is a systemic, broad-spectrum fungicide designed for use on a wide range of crops, including peaches, strawberries, and turf grasses. It is effective against a variety of diseases, including peach leaf curl, strawberries, and turf grasses. The product is available in a concentrate formulation, which requires dilution before use.

**PRODUCT DIRECTIONS**

Thiram SC is systemic, meaning it is absorbed by the plant and translocated throughout the plant. Hence, the product should be applied to the leaves and stems rather than the soil. For best results, Thiram SC should be applied at the correct rate and according to the instructions provided on the label.

**Rice seed treatment in California**

Thiram SC is preferred, especially when full canopy of foliage exists. For dilute application, use Thiram SC at the directed rate listed in the "Quarts per Acre" column of the Specific Applications table. Remember to use the high rate when climatic conditions are favorable for disease.

**How to Use**

Thiram SC is a systemic fungicide that is absorbed by the plant and translocated throughout the plant. Therefore, it should be applied to the leaves and stems rather than the soil. For best results, Thiram SC should be applied at the correct rate and according to the instructions provided on the label.

**Mixing and Application**

To mix, fill the spray tank about 2/3 full of water, and with agitator running, pour specified amount of Thiram SC at the directed rate listed in the "Quarts per Acre" column of the Specific Applications table. Continue agitation and apply immediately.

**Container Handling**

- **Storage:** Store Thiram SC in a cool, dry place. Do not store near food or feeds. Keep out of reach of children.
- **Disposal:** Disposal of this product must comply with federal, state, and local laws and regulations. Do not reuse the container after emptying. Rinse empty container thoroughly with water and dispose of properly.

**Restrictions**

- **Agricultural Use:** Not for agricultural use in California.
- **Environmental Concerns:** Thiram SC is a volatile organic compound (VOC) and is classified as a hazardous air pollutant (HAP) under the California Air Resources Board (CARB) and the Environmental Protection Agency (EPA).

**PHI:** 7 days

**REI:** 24 hours

**Maximum Application Rate:**

- **PEACHES:** 2.6 lbs. a.i./Acre (5 quarts per acre)
- **CURATIVE Rate:** 3.75 fl oz per 1000 sq ft
- **Preventative:** 1.05 lbs. of a.i. (1 quart)
- **7.1 fl oz per 1000 sq ft**

**OTHER INGREDIENTS**

- **Thiram SC** is a fungicide that controls disease in a variety of crops. It is a white to off-white powder that is insoluble in water but is soluble in alcohol.

**TERMS OF SALE OR USE:**

- **Usage:** For the treatment or control of disease in the following conditions:
- **PEACHES:** Diseases such as peach leaf curl, peach leaf spot, and peach blight.
- **STRAWBERRIES:** Diseases such as strawberry leaf spot, strawberry gray mold, and strawberry root rot.
- **TURF APPLICATIONS:** Diseases such as brown patch, dollar spot, and pink snow mold.

**ADD ON INGREDIENTS:**

- **LaGard 360:** A plant growth regulator that controls plant growth and improves yield.

**Equipment:**

- **Equipment:** Use a calibrated mix tank or spray model to mix the appropriate amount of Thiram SC with water. Be sure spray equipment is clean before use.

**TIME OF APPLICATION:**

**Break On Application:**

- **Fruit and Vegetables:** Applications can be made at any time before harvest. Avoid application during hot, dry conditions to prevent damage to the plant. For better results, always follow the instructions provided on the label.

**Spray Applications:**

- **Fruit and Vegetables:** Applications can be made at any time before harvest. Avoid application during hot, dry conditions to prevent damage to the plant. For better results, always follow the instructions provided on the label.

**Spray Applications:**

- **Turf Applications:** Applications can be made at any time before harvest. Avoid application during hot, dry conditions to prevent damage to the plant. For better results, always follow the instructions provided on the label.

**DRY APPLICATIONS:**

- **Fruit and Vegetables:** Applications can be made at any time before harvest. Avoid application during hot, dry conditions to prevent damage to the plant. For better results, always follow the instructions provided on the label.

**Note:** To prevent water contamination in irrigation or drainage canals soak water must be retained with 1 gallon of water.
To mix, fill the spray tank about 2/3 full of water, and with agitator running, pour specified amount of Thiram SC. Begin agitation and apply immediately. Thiram SC may be mixed with other copper fungicides for application in a single tank. Thiram SC is a broad spectrum foliar fungicide for plant disease control or suppression in peaches, pears, plums, apricots, cherries, almonds, and strawberries. Thiram SC is effective against a variety of diseases, including leaf spot, blight, and mold. To use Thiram SC, follow the directions for each application:

</tbody>
</table>

**How to Use:**

For best results, Thiram SC should be used immediately after planting, before disease pressure builds up. The growth stage is a major factor in determining the spray volume required to obtain the desired effectiveness. The addition of a latex-based sticker may improve coverage of fruit and foliage. Make fresh spray mixtures in settling basins. Be sure spray equipment is clean before use. If it is contaminated with any material, crop injury or sprayer inactivation will result. If water is contaminated with pesticides or other chemicals, it should be disposed of properly according to local regulations.

**Crop Rotation:**

Thiram SC can be used to protect nursery stock, shrubs, ornamentals, non-bearing orchards and vines that do not bear fruit within one year of application. Thiram SC cannot be used on crops that will bear fruit within one year of application.

**Restrictions:**

- Thiram SC cannot be used on crops that will bear fruit within one year of application.
- Thiram SC is not for use in California.
- The maximum annual application rate of Thiram SC is 11.19 gallons (47 lbs. a.i. per acre or 1.08 lbs. a.i. per 1000 sq. ft.) (7.1 fl oz of Thiram SC per 1000 sq. ft).

**Note:**

To prevent water contamination in irrigation or drainage canals, soak water must be retained in settling basins. **How to Use:**

For best results, Thiram SC should be used immediately after planting, before disease pressure builds up. The growth stage is a major factor in determining the spray volume required to obtain the desired effectiveness. The addition of a latex-based sticker may improve coverage of fruit and foliage. Make fresh spray mixtures in settling basins. Be sure spray equipment is clean before use. If it is contaminated with any material, crop injury or sprayer inactivation will result. If water is contaminated with pesticides or other chemicals, it should be disposed of properly according to local regulations.

**Crop Rotation:**

Thiram SC can be used to protect nursery stock, shrubs, ornamentals, non-bearing orchards and vines that do not bear fruit within one year of application. Thiram SC cannot be used on crops that will bear fruit within one year of application.

**Restrictions:**

- Thiram SC cannot be used on crops that will bear fruit within one year of application.
- Thiram SC is not for use in California.
- The maximum annual application rate of Thiram SC is 11.19 gallons (47 lbs. a.i. per acre or 1.08 lbs. a.i. per 1000 sq. ft.) (7.1 fl oz of Thiram SC per 1000 sq. ft).

**Note:**

To prevent water contamination in irrigation or drainage canals, soak water must be retained in settling basins. Thiram SC is a broad spectrum foliar fungicide for plant disease control or suppression in peaches, pears, plums, apricots, cherries, almonds, and strawberries. Thiram SC is effective against a variety of diseases, including leaf spot, blight, and mold. To use Thiram SC, follow the directions for each application:
