</table>

#### Precautionary Statements and First Aid:

- **HAZARDS TO HUMANS AND DOMESTIC ANIMALS**
  - **Health Hazard:** May cause eye irritation and skin irritation (corrosive).
  - **Physical Hazard:** Corrosive, may damage eyes and skin.

- **FIRST AID:***
  - **Inhalation:** Remove to fresh air. If not breathing, give artificial respiration. Call a poison control center or doctor for treatment advice.
  - **Eye Contact:** Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.
  - **Skin Contact:** Wash with soap and water for 15 - 20 minutes. If skin irritation occurs, get medical advice. Remove contaminated clothing and wash skin with soap and water.
  - **Ingestion:** Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling.

- **Note to Physician:** Probable mucosal damage may contraindicate the use of gastric lavage.

#### Disposal of Infectious Material:

- Wash hands and clean work area before disinfection.
- Apply disinfectant and allow contact time as directed.
- Remove gross filth prior to disinfection.
- Add 1 - 4 oz per gallon of water to kill Adenovirus Type 5 and type 7.

#### Disposal of Rinsate:

- Test rinsate to determine if it does not contain active ingredients.
- If not, you may pour into a sanitary system.
- If rinsate consistent with pesticide disposal instructions. Repeat two more times. Then offer for recycling if available or puncture and dispose in sanitary landfill or by other procedures approved by state and local authorities. Follow pesticide disposal instructions for rinsate. If not triple rinsed, these containers are classified as infectious waste and must be decontaminated according to the EPA or OSHA regulations before disposal.
