ELIMINATOR Snail & Slug Bait II

**PRODUCT USAGE**

**Use On:**
- Around fruit and vegetable plants, flower gardens and ground covers
- Around vegetable plants, flower gardens, hiding places: vegetable gardens
- Protecting vegetable gardens
- Ideal for vegetable gardens
- Not affected by rain

**Amount to Use:**
- One pound per 2,000 sq. ft.

**TO APPLY:**
- This product requires no mixing, spraying or special applicators. Just scatter lightly on the soil surface in infested areas. Apply heavier if infestation is severe. If slugs and snails are moving from adjacent properties, a pencil-thin line the entire length of the infested area will form a barrier resulting in excellent control. This bait is extremely attractive to slugs and snails and actually lures them from their hiding places and kills them. Reapply bait every two weeks – more often during heavy infestations or in areas likely to become wet. All likely slugs should be treated as these pests migrate. They favor damp places over dry areas and prefer to eat vegetation at night. For best results, be sure area to be baited is dry, in very dry weather, water well before baiting. Use approximately one pound per 2000 square feet. ELIMINATOR Snail & Slug Bait II can be used to protect the following fruit and vegetable plants. Apply only to the soil surface. Do not apply to the foliage or edible parts of the plant. Use ELIMINATOR Snail & Slug Bait II to protect asparagus, beans, cabbage, carrots, celery, cucumbers, lettuce, melons, onions, peas, peppers, potatoes, radishes, spinach, squash, tomatoes, turnips, garlic, radishes, blackberries, cherries, citrus, grapes, peaches, plums, and strawberries.
