HempeL's Antifouling GLOBIC 81950 is an advanced antifouling paint containing cuprous oxide and an organic bioactive material for the prevention of barnacles, algae, coral, and other marine fouling organisms. Recommended for the underwater surfaces of steel, fiberglass and wood vessels operated in all navigable waters. May be applied to all available non-tin containing paints and may be applied to all available aluminum hulls and vessels painted with proper barrier coatings.

DIRECTIONS FOR USE:

If you choose to use this product in a manner inconsistent with its labeling, APPLICATION INSTRUCTIONS: For application by brush, roller, or airless spray equipment. This product is to be used on the underwater surfaces of steel, fiberglass and wood vessels operated in all navigable waters. Anti-fouling properties are tested on newly built vessels and in the repair and maintenance of such vessels as needed. Thoroughly and apply to a dry surface with a temperature above the dew point. Apply over previous coating (examples: primer, sealer, anti-fouling paint) according to the written painting specifications described in the back of this document. Film thickness (measured by a film thickness gauge) and the number of coats required to be applied depend upon vessel design and the designated purpose for the coating. After application, water service life allow at least 10 hours dry time between coats of this product at 20°C / 68°F. Drying time is proportionally longer at lower temperatures. If thinning is required for brush, roller or airless spray, then conventional spray or airless spray equipment is recommended. Use a properly selected air or paint spray gun with a pattern size of 12. Choke the air valve on the air regulator to approximately 10psi when operating with a standard pressure tank. Application using airless equipment should be limited to 100 psi. All required air pressure equipment must be supplied in accordance with local and regional regulations. Prolonged exposure to the atmosphere may affect the properties of this product, and the entire application process should not be attempted unless proper ventilation and air circulation are provided.

WARRANTY: This labeling must be in the possession of the user at the time of pesticide application. While all HEMPEL products are manufactured under the best possible conditions, HEMPEL cannot assume liability for any injury or damage, whether to persons or property, caused by the use of this product.

FOR USE IN COMMERCIAL OR NAVY SHipyards ONLY. NOT FOR SALE FOR USE OR STORAGE BY PRIVATE APPLICATORS OR MARINA PERSONNEL. Only for use on commercial vessels. Not for use on recreational vessels. Not for stationary structures.
