GENERAL DEODORIZATION:
Allow surface to remain wet for 10 minutes.

CONTACT TIME:

PERSONAL PROTECTION:

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1, HBV and HCV ON SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.

KILLS HIV-1, HBV and HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS.

This product has demonstrated effectiveness against Influenza A virus and is expected to inactivate all Influenza A viruses including Pandemic 2009 H1N1 Influenza A virus.

SANITIZATION

FOOD CONTACT SURFACE SANITIZATION DIRECTIONS

To control mold and mildew on pre-cleaned, hard, non-porous surfaces add 3 ounces of this product per 5 gallons of water. Apply solution with a cloth, mop, sponge, brush, or sprayer. Do not wash equipment in sink or dishwasher. Do not wash by hand. Do not apply to painted surfaces, plastic or paper products.

For disinfection of pre-cleaned poultry equipment (brooders, watering founts, feeders, poultry processing tables, egg cartons), apply a use-solution of 3.5 ounces of this product per 5 gallons of water. Remove all poultry, animals, and feed from processing equipment. Cover or remove all food products. For low pressure coarse sprayer and hand pump trigger sprayer applications, spray 6-8 inches from the surface; rub with brush, sponge, or cloth. Do not breathe spray. After treatment has been absorbed, set or dried. All treated equipment that will contact feed or drinking water must be rinsed with potable water before reuse.

DISINFECTION

Disinfection of poultry/turkey equipment, swine quarters, animal quarters and kennels:

For disinfection of pre-cleaned poultry equipment (brooders, watering founts, feeders, poultry processing tables, egg cartons), apply a use-solution of 3.5 ounces of this product per 5 gallons of water. Remove all poultry, animals, and feed from processing equipment. Cover or remove all food products. For low pressure coarse sprayer and hand pump trigger sprayer applications, spray 6-8 inches from the surface; rub with brush, sponge, or cloth. Do not breathe spray. After treatment has been absorbed, set or dried. All treated equipment that will contact feed or drinking water must be rinsed with potable water before reuse.

For disinfection of pre-cleaned dairy processing equipment (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution with a pressure sprayer. This product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3). To sanitize pre-cleaned dairy processing equipment (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution with a pressure sprayer. This product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3). To sanitize pre-cleaned dairy processing equipment (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution with a pressure sprayer. This product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3). To sanitize pre-cleaned dairy processing equipment (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution with a pressure sprayer. This product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3). To sanitize pre-cleaned dairy processing equipment (counters, tables, finished wood or plastic cutting boards), apply a 200-400 ppm active quaternary solution with a pressure sprayer. This product is an effective sanitizer against Klebsiella pneumoniae at a 200 ppm active quaternary concentration when diluted in water up to 500 ppm hardness (CaCO3).
