Supplemental Labeling

DuPont Small Grain Herbicides

For Use on Triticale

DuPont Crop Protection

DuPont small grain herbicides (ALLY®, ALLY® XP, ALLY® EXTRA, CANVAS®, CANVAS® XP, EXPRESS®, EXPRESS® XP, FINESSE®, CLEAN® FC, HARMONY®, EXTRA, HARMONY® EXTRA XP, HARMONY® GT and HARMONY® GT XP) can be used for weed control in triticale. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

DIRECTIONS FOR USE

DuPont small grain herbicides may be used as postemergence applications to triticale anytime after crop is in the 2-3 leaf stage but before the flag leaf is visible. Follow the postemergence use rate instructions listed for wheat. Refer to the DuPont herbicide label for information regarding use restrictions, rotational cropping recommendations, sprayer cleanup, use precautions and other information.

Other suitable herbicides, fungicides, and insecticides registered for use on triticale may be tank mixed or used sequentially with these products providing the recommended application timing is the same. Read and follow all manufacturer's label recommendations for the tank mix partner prior to use. The most restrictive provisions on either label apply.

It is a violation of federal law to use any of these products in a manner inconsistent with its labeling.

IMPORTANT

Before using DuPont Small Grain Herbicides, read and follow all applicable directions, restrictions and precautions on the EPA-registered labels.

This label contains new or supplemental instructions for product use which does not appear on the EPA-registered package label. Follow these instructions carefully. This label must be in the possession of the user at the time of application.

* Finesse herbicide is not registered for use in the State of Minnesota.
