Plant-Incorporated Protectant Label
MON 810
Corn Borer-Protected Corn Seed
(Alternate brand name: YieldGard® Corn Borer)
(OECD Unique Identifier: MON-00810-6)

Active Ingredient:

*Bacillus thuringiensis Cry1Ab delta-endotoxin and the genetic material necessary for its production (Vector PV-ZMCT01) in event MON 810 corn (OECD Unique Identifier: MON-00810-6).......................................................................................... ≤ 0.0014%*

*Percentage (wt/wt) on a dry weight basis for whole plant (forage).

KEEP OUT OF REACH OF CHILDREN

CAUTION

EPA Registration No. 524-489
EPA Establishment No. 524-MO-002

Monsanto Company
800 North Lindbergh Blvd.
St. Louis, MO 63198

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Seed containing MON 810 may only be planted for the purposes of agronomic evaluation, seed increase and production in breeding nurseries as specified in the terms and conditions of this registration and on the labeling. Commercial plantings of this product for the purposes of grain production and controlling insect pests are prohibited.

This plant-incorporated protectant (PIP) may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

Plants that contain the pesticide product may be grown on 20,000 acres per county and a total of 250,000 acres or less in total per year in the U.S.

Harvested seed are not allowed for sale as commercial seed in the U.S. under the current conditions of this registration but any grain containing MON 810 may be handled in accordance with legal and regulatory requirements (non-treated seed can be sold as grain).

There are no refuge requirements for planting of MON 810 Corn.

CORN INSECTS CONTROLLED OR SUPPRESSED

Field corn has been genetically transformed to produce the B.t. Cry1Ab protein for the control or suppression of the following lepidopteran insects:

- European corn borer (Ostrinia nubilalis)
- Southwestern corn borer (Diatraea grandiosella)
- Southern cornstalk borer (Diatraea crambidoides)
- Corn earworm (Helicoverpa zea)
- Fall armyworm (Spodoptera frugiperda)
- Stalk borer (Papaipema nebris)

MON 810 is a product of Monsanto’s research program offering unique genetic characteristics for specific grower needs and may be protected by one or more U.S. Patents found at the following web page: www.monsantotechnology.com.
