• Helps reduce algae growth.
• Compatible with all pool sanitizer systems.

Active Ingredient:
Sodium Tetraborate Pentahydrate ......100%

KEEP OUT OF REACH OF CHILDREN

WARNING:

See Precautionary Statements and
First Aid information on back panel.

Net Contents: 9 lbs. (4.1 kg)
DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR INITIAL APPLICATION IN POOLS SANITIZED WITH POOLIFE OR POOL BREEZE PRODUCTS OR BAQUACIL® POOL CARE SYSTEM:
Backwash and clean filter. Balance your pool water and adjust pH between 7.2 - 7.6. Add 2 lbs. of ENDURE per 1,000 gallons of pool water by broadcasting the product over the surface of the pool with the pump running. This initial treatment should be added in three doses with one third of the required amount being added each application. The pH of the pool water will rise as a normal reaction to the introduction of this product; therefore, one hour after each application, adjust the pH to 7.2 - 7.6 with pH decreaser, according to label directions. Allow at least 8 hours between the applications of ENDURE. Do not add additional ENDURE until the pH is between 7.2 - 7.6 (NOTE: For every 2 pounds of ENDURE, approximately 1 pound of pH decreaser will be required for pH adjustment). Within 10 days, take a water sample to your dealer to test for water balance and to determine if an adequate amount of this product has been added.

FOR MAINTENANCE APPLICATION:
This product is stable in pool water and not degraded by sunlight. The primary loss of product is through splash-out, backwashing and dilution from heavy rains. Therefore, once the initial application is made, minor and infrequent additions would be all that is required unless a substantial amount of water is drained from the pool.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN
Probable mucosal damage may contraindicate the use of gastric lavage.

STORAGE AND DISPOSAL:
Keep this product in its tightly closed container when not in use. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment.

PHYSICAL OR CHEMICAL HAZARDS:
Do not mix with other chemicals. Do not add through skimmer. Do not add to any dispensing device.

ENVIRONMENTAL HAZARDS:
Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

IN CASE OF MEDICAL EMERGENCY, CALL 1-800-654-6911.
ENDURE

• Helps reduce algae growth.
• Compatible with all pool sanitizer systems.

Active ingredient: Sodium Thiosulfate Pentahydrate...10%

STORAGE AND DISPOSAL:
Keep this product in its tightly-closed container when not in use. Non-flammable component. Do not refine or refill this container. Reese Engineered Products. Only dispose of container through normal waste disposal, either for recycling or disposal. Do not contaminate land or body of water through improper disposal of this product.

PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING: Causes moderate to severe respiratory irritation. Avoid breathing the dust or smoke. Do not get in eyes or on clothing. Wear goggles or face shield. Wash hands before eating, drinking, smoking, going to bathroom, or handling clothing and wash clothing before reuse.

FIRST AID:

IF IN EYES:
• Hold eye open and then gently and rapidly wash with water for 15-20 minutes.
• Remove contact lenses, if present, after first 5 minutes. Then continue rinsing eye.

IF INHALED:
• Remove from source of exposure.
• Inhalation of the gas will not cause irritation.

IF SWALLOWED:
• Do not induce vomiting.
• Call a poison control center or doctor for medical advice.
• If person is unconscious, call 911 or an ambulance. Do not give artificial respiration. Do not give anything by mouth to an unconscious person.
• Do not give anything by mouth to an unconscious person.

If the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN:

Possible internal damage may occur internally. Do not give anything by mouth to an unconscious person.

DIRECTIONS FOR USE:

It is unlawful to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR INITIAL APPLICATION IN POOLS: SANITIZE WITH POOL BLASTER OR POOL CLEANER PRODUCTS OR BROADSIDE® POOL CIDE SYSTEM

Not to be used in a heat filter. Balance your pool water and adjust pH to between 7.2 - 7.6. Add 3 lbs. of ENDURE per 1,000 gallons of pool water directly to the surface of the pool with the pump running. This initial treatment should be added in three doses with one drop at the required amount being added each application. The pH of the pool water will rise as a normal reaction to the introduction of this product. Therefore, one hour after each application, adjust the pH to 7.2 - 7.6 with pH decreaser, according to local regulations. Allow at least 8 hours between the applications of ENDURE. Do not add additional ENDURE until the pH is between 7.2 - 7.6 (NCE). For every 2 pounds of ENDURE, approximately 1-2 pounds of pH decreaser will be required for pH adjustment. Within 10 days, take a water sample to your dealer to test for water balance and to determine if an adequate amount of this product has been added.

FOR MAINTENANCE APPLICATIONS:

This product is available in pool water and not degraded by sunlight. The primary loss of product is through spillage, volatilization and dilution from heavy rains. Therefore, once the initial application is made, minor and intermittent additions should be made as required unless a substantial amount of water is drained from the pool.
