PRECAUTIONARY STATEMENTS

Hazard Statements:
DANGEROUS: Causes serious eye damage, serious skin damage, serious dermal damage, serious eye irritation, serious skin irritation, serious respiratory irritation, severe damage to organs, severe eye damage, severe respiratory damage, severe respiratory irritation, specific target organ toxicity (dietary), specific target organ toxicity (inhalation).

Physical/Chemical Hazards:
Corrosive liquid, strong acid, strong oxidizing agent, strong reducing agent, strong oxidizer, strong reducing agent.

HAZARD TO HUMANS AND DOMESTIC ANIMALS

FIRST AID:

IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses (if worn). If irritation persists, consult a doctor.

IF ON SKIN: Rinse with plenty of water for 15-20 minutes. If irritation remains, consult a doctor.

IF INHALED: Remove to fresh air. Give 2-4 liters of oxygen per minute. If breathing stops, call 911 or an ambulance and begin CPR immediately. If still not breathing, continue CPR until paramedics take over or a hospital is reached.

IF SWALLOWED: Do not induce vomiting unless told to do so by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person.

General Advice: Call a Poison Control Center or doctor immediately if exposure has occurred. For symptoms that do not require medical attention, see first-aid treatment advice.

NOTES:
- If irritation persist, consult a doctor.
- If breathing stops, call 911 or an ambulance and begin CPR immediately. If still not breathing, continue CPR until paramedics take over or a hospital is reached.

HAZARDous TO THE ENVIRONMENT

STORAGE AND DISPOSAL

STORAGE: Keep container in a cool, dry place. Do not allow to come into contact with food or feed or place in a location accessible to children or pets.

DISPOSAL: Use a non-flammable solvent to remove the acid from surfaces. Wash the equipment with water and detergent, rinse well with potable water, then dispose of the solution in a sanitary landfill, or by incineration.

NOTES:
- Do not dispose of in landfills or by incineration.
- Do not discharge into the environment.
- Do not contaminate water, food or feed by storage or disposal.

COMPONENTS:

INERT INGREDIENTS

DISSOLVING AGENT

ACID ANALYSIS

RINSE THOROUGHLY WITH POTABLE WATER AFTER USE

APPLICATION:

USE CONCERNING DISINFECTANTS:

On pre-cleaned, hard, non-porous food-contact surfaces at 90 – 180 ppm of decanoic and nonanoic acids combined. Circulate sanitizing solution through CIP or COP systems for a minimum of 2 minutes contact time. Sanitizing solution must have a pH of 4 or below. Adequately drain solution. For mechanical operations, the application of the sanitizing solution.

2. Clean all hard, non-porous surfaces with an appropriate chlorinated alkaline cleaner, followed by a potable water rinse prior to.

1. Remove gross food particles and soil by a pre-flush or pre-scrape and when necessary, pre-soak treatment.

Listeria monocytogenes

Salmonella enterica

Escherichia coli,

Regular use of TSA ACID SANITIZER on dairy equipment will prevent formation of milkstone and mineral stone on hard, non-porous surfaces. On pre-cleaned, hard, non-porous food-contact surfaces at 68 ppm decanoic and.

Food Processing – Descaling and Sanitizing:

3. Sanitize equipment prior to use with a solution of 1 oz. - 2 oz. of TSA Acid Sanitizer in 6 gallons of water, to provide 90 - 180 ppm of decanoic and

operations, fresh sanitizing solution should be prepared daily or more often if the solution becomes dirty or soiled. Prepared use solution may not be reused for sanitizing, but may be re-used for other purposes such as cleaning. For manual

Prepare the solution with water if able to swallow. Do not induce vomiting unless told to do so by a Poison Control Center or doctor.

IF SWALLOWED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give

IF INHALED:

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

IF IN EYES:

RINSE EYES IMMEDIATELY WITH POTABLE WATER FOR 15-20 MINUTES.

Sodium hydroxide ........................................................................................................................................................................... 0.1%

Phosphoric acid ........................................................................................................................................................................ 8.5%
