PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
KEEP OUT OF REACH OF CHILDREN

DANGER

Corrosive. Causes irreversible eye damage or skin burns. Harmful if absorbed through skin. Do not get in eyes, on skin or on clothing. Harmful if swallowed or inhaled. Do not breathe dust, vapor or spray mist. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

Residential (non-commercial) users are advised to wear chemical resistant gloves, protective eyewear (goggles, safety glasses, or face shield), long-sleeved shirt and long pants, socks and shoes. In addition to these minimum PPE, commercial users must wear a disposable coverall with hood and chemical resistant footwear.

While removing existing paint by sanding or blasting, or applying new antifouling paint, commercial users must wear a respirator with an organic vapor removing cartridge with a prefilters approved for pesticides (MSHA/NIOSH approval number TC-236), or a canister approved for pesticides (MSHA/NIOSH approval number TC-146), or a NIOSH approved full face respirator with an organic vapor removing cartridge with a P100 prefilter. Residential (non-commercial) users are advised to wear the same respirators, cartridges, and prefilters as required by commercial users.

FIRST AID

If Swallowed:
- Immediately call a poison control center or doctor.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Do not give any liquid to the person.
- Do not give anything by mouth to an unconscious person.

If on Skin or Clothing:
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

If Inhaled:
- Move person to fresh air.
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible.
- Call a poison control center or doctor for further treatment advice.

If in Eyes:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
- Call a poison control center or doctor for treatment advice.

Other:
- Have the product container or label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains petroleum distillate – vomiting may cause aspiration pneumonia.

ENVIRONMENTAL HAZARDS: This material is toxic to fish. Do not apply directly to water by cleaning of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. Dispose of paint drums in an approved landfill. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer system without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: FLAMMABLE! Keep away from heat and open flame.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide wastes are toxic. Open dumping is prohibited. Pesticide spray mixture, or rinsate that cannot be used or chemically reprocessed should be disposed of according to procedures approved by Federal, State or local disposal authorities.

CONTAINER DISPOSAL: Triple rinse (or equivalent) and dispose of in an approved landfill. Consult federal, state or local disposal authorities for approved alternative procedures.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: A high performance, self-polishing copolymer (SPC) antifouling paint with patented Copper Acrylate technology.

INTENDED USES: Specifically designed for Deep Sea Vessels. For use and application by professionals at Maintenance and Repair facilities.

PRODUCT INFORMATION:
- Fields/Sheets: Not Applicable
- Carrier/Drying Agent: Not Applicable
- Volume Solids: 40% ± 2% (ISO 12632-1998)
- Typical Film Thickness: 4.0 mils dry (163, 3 mm)
- Theoretical Coverage: 130 sq. ft. (U.S.) or 15, 000 sq. mi (dry film thickness), allows appropriate loss factors.
- Method of Application: Airless Spray; Brush, Roller (small areas only)
- Flash Point: Single Panel TCF

Temperature:
- Substrate Temperature: 61°F - 80°F

Drying Information:
- Touch Dry (ISO 5157:73): 2 hrs
- Roadable: 2 hrs
- Before Immersion: 30 hrs

LIMITATIONS: Coating lifetime is directly proportional to thickness applied. Performance of this product is dependent upon the specified film thickness being achieved. The Minimum Time Before Fouling and Overcoating Time is dependent upon film thickness and vessel speed. Please refer to the note in the Drying and Overcoating Information Section.

Recommended maximum drying time before immersion:
- Temperatures: 72°F - 108°F (22°C - 42°C)
- Tropical conditions: 25 days

If these times are exceeded the antifouling performance may be impaired. On immersion, Intumescent 469 will exhibit a slight color change. Consult International for overcoating Intumescent 469 with TBT copolymer antifoulings. Overcoating is given for guidance only and is subject to regional variation depending upon local climate and environmental conditions. Consult your local International Representative for specific recommendations.

In good weather, temperature of the surface to be coated must be at least 5°F (2°C) above the dew point. For optimum application properties, bring the product to 72°F - 80°F (22°C - 30°C), unless specifically instructed otherwise, prior to mixing and application. Unmixed material (in closed containers) should be maintained in protected storage in accordance with information given in the STORAGE Section of this label. Technical and application data herein is for the purpose of establishing a general guideline of the coating application procedures. Test performance results were obtained in a controlled laboratory environment and International makes no claim that the exhibited published test results, or any other tests, accurately represent results found in all field environments. As application, environmental, and design factors can vary significantly, due care should be exercised in the selection, verification of performance and use of the coating.

APPLICATION:

Mixing: This product is a dry pack coating without additional components. Always mix thoroughly with a power agitator before application.

Thinning: Not recommended. Use International GI3007 only in exceptional circumstances (max 5% by volume). Do not thin more than allowed by local environmental legislation.

Applicator: Airless Spray

Brush and Roller: Application by brush or roller is for small areas only. Multiple coats may be required to achieve specified film thickness.

Cleaner: International GI3007

Work Stoppages & Clean-up: Thoroughly flush all equipment with International GI3007. All unused product should be stored in tightly closed containers. Partially filled containers may show surface skimming and/or a viscosity increase of the product after storage. Product should be filtered prior to use.

Welding: In the event welding or flame cutting is performed on metal coated with this product, dust and fumes will be generated which may require the use of appropriate personal protective equipment and adequate local exhaust ventilation. In North America do so in accordance with instructions in ANSI/ASC 249.1 "Safety in Welding and Cutting".

SAFETY: All work involving the application and use of this product should be performed in compliance with all relevant National Health, Safety & Environmental standards and regulations. Prior use, obtain, consult and follow the Material Safety Data Sheet for this product concerning health and safety information. Read and follow all precautionary notices on the MSDS and container labels. If you do not fully understand these warning and instructions or if you cannot strictly comply with them, do not use this product. Proper ventilation and protective measures must be provided during application and drying to keep solvent vapor concentrations within safe limits and to protect against toxic or oxygen deficient hazards. Take the precautions to avoid skin and eye contact (i.e., gloves, goggles, face masks, barrier creams, etc.). Actual safety measures are dependent on application methods and work environment. EMERGENCY CONTACT NUMBERS:

USA/Canada - Medical Advisory Number 1-800-654-5813

STORAGE: Shelf Life from date of manufacture:
- 6 months minimum at temperatures up to 77°F (25°C)
- 3 months minimum at temperatures greater than 77°F (25°C)

Subject to re-inspection thereafter. Store in dry, shaded conditions away from sources of heat and ignition.

NOTE: Active ingredients remain stable, but application properties may be affected.

DISCLAIMER:

All representations and statements concerning the product on this label are accurate to the best of International's knowledge. Any statements herein are not intended to be specific recommendations or warranties of any product, combination of products, or fitness for any particular purpose. Any warranty, if given, or specific Terms and Conditions of Sale are contained in International's Terms and Conditions of Sale. You should request a copy of this document and review it carefully.
