ClearView Quat Power
For Control of Algae and Algal Slime Growth in Swimming Pools.

ACTIVE INGREDIENTS:
- Akylox (60% C8H17O3N, 50% C10H17O3N, 5% C12H17O3N)
- Diacyl (60% C8H17O3N, 50% C10H17O3N, 5% C12H17O3N)
- Methylene benzyl ammonium chloride 2%-0.2%

INERT INGREDIENTS:

TOTAL: 100.0%

Weight approx. 5lbs/gallon

DIRECTIONS FOR USE - SWIMMING POOLS:

This product is efficient and stable in use dilution. This product is compatible with most chemicals used in pool water and will not damage tile, concrete, metal or plastic. This product keeps pool water free and sparkling, clear of visible green and blue-green algae, slime and green-brown algae. This product improves filter operation and reduces need for other chemicals. This product imports tone and a pleasant "feel" to swimming pool water. This product is formulated to complement swimming pool water being treated with normal chlorine systems. It is especially effective against growth of algae and being non-volatile, adds just enough pool water clarity and sparkle. The residual effectiveness of this algicide tends to stabilize the total chemical treatment system. This product is compatible with most chemicals normally used in swimming pool maintenance; however, in its concentrated form, this chemical must not come in contact with high concentrations of chlorine or any other oxidant. Do NOT MIX THIS PRODUCT AND CHLORINE OR ANY OTHER OXIDIZER TOGETHER before adding to the pool. These chemicals must be handled separately. This product was formulated to complement most swimming pool sanitizers. This product is not a stand-alone product. It must be used with either halogen based or non-halogen based pool sanitizers.

INSTRUCTIONS FOR USE WITH HALOGEN BASED POOL SANITIZERS:

This product is formulated to complement most swimming pool sanitizers. When using other products as outlined in Directions For Use on those products, always follow Directions For Use of those products. This product is effective against the growth of algae. This product is efficient and non-staining when used as directed. This product will not deposit and its algae fighting abilities actually increase as pool water temperature increases. Ensure all pool equipment is working properly. Backwash the filter system following manufacturers directions. Adjust pH between 7.2-7.8. Adjust chlorine residual to 1-3 ppm. In a chlorinated treated pool, add stabilizer to maintain a minimum level of 40-50 ppm to reduce the degradative effects of sunlight on the chlorine residual. Check for metals and if present add acid and scale inhibitor to prevent staining of pool surface due to metals. Check chlorine residual and adjust to 1-3 ppm. Maintain sanitizer residual in accordance with local directions found in your sanitizer of choice. When using other products as outlined in Directions For Use of this product, always follow directions on those products. Add this product directly into pool by pouring around entire perimeter of pool. Avoid the filter to run for at least 6 hours after adding algicide. During this period, swimmers must not be allowed into the water.

OPTIONAL INSTRUCTIONS FOR USE WITH NON-HALOGEN BASED POOL SANITIZERS:

This product is formulated to complement swimming pool water being treated with the BioGuard® System, Bacquard and other non-halogen systems. When using other products as outlined in Directions For Use for this product, always follow Directions For Use of those products. This product is efficient and non-staining when used as directed. This product will not deposit and its algae fighting abilities actually increase as pool water temperature increases. The residual effectiveness of this product tends to stabilize the total chemical treatment system. Ensure all pool equipment is working properly. Backwash the filter system following manufacturers directions. Adjust pH between 7.2-7.8. Check for metals and if present add acid and scale inhibitor to prevent staining of pool surface due to metals. Add this product directly into pool by pouring around entire perimeter of pool. Avoid the filter to run for at least 6 hours after adding algicide. During this period, swimmers must not be allowed into the water.

INITIAL APPLICATION FOR SWIMMING POOLS:
1. Backwash the filter thoroughly.
2. Vacuum algae debris and thoroughly brush pool.
3. Add 24 ounces of this product to each 10,000 gallons of water (5.2 ounces per 1,000 gallons) or more thereof.
4. Vacuum pool after 24-hours to remove dead algae. If algae is visible after test, add 3 & 4 as necessary until pool is free of visible algae. Once algae is under control, clean filter and return to normal operation.

MAINTENANCE APPLICATION:
Add 6.5 ounces of this product in 5,000 gallons of water every 3 to 5 days as needed.

BOOSTER APPLICATION:
Add 52 ounces of this product in 80,000 gallons of water after a heavy or prolonged rainfall or when there is a heavy basting load. These directions must be followed even when the pool is not in use if algae growth is noticeable, or if initial blemish.

PRECAUTIONARY STATEMENTS:

HAZARDOUS TO HUMANS AND DOMESTIC ANIMALS:

DANGERS: Keep out of reach of children. Controllable, Causes irreversible eye damage and skin burns. May be fatal if inhaled, swallowed or absorbed through skin. Do not get into eyes or on skin or clothing. Do not breathe vapor or spray mist. Wear protective aprons, gloves, safety glasses or face shield. Protective clothing, and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

ENVIRONMENTAL HAZARD:
This product is toxic to fish.

PHYSICAL OR CHEMICAL HAZARDS:
Do not use or store near heat or open flame or in or on metal, do not mix with, arson, deligents or coolers.

STORAGE AND DISPOSAL:

Do not contaminate the environment,初次, keep out of reach of children. Material must be disposed of by storage and disposal facilities.

PESTICIDE STORAGE:
Store in original container and place in locked storage area. Keep from freezing.

SPILL OR LEAK PROCEDURES:
Small spills may be mopped up or flushed away with water or absorbed on some absorbent material and then removed.

PESTICIDE DISPOSAL:
Contact the local government or waste disposal facility. Be sure to dispose of any unused container. Dispose of in a sanitary landfill or by other procedures approved by state and local authorities.
