RESTRICTED USE PESTICIDE
DUE TO HAZARD TO NON-TARGET SPECIES
For retail sale to and only by those certified applicants or persons under their direct supervision and only for those uses covered by the certified applicator's certification.

SIERRA® Squirrel Bait
For Control of California Ground Squirrels

ACTIVE INGREDIENT:
Diphacinone
(2-Diphenylhydrazino-l,3-Indandione) ........ 0.003%

OTHER INGREDIENTS .................. 99.996%

TOTAL ..................................... 100.000%

EPA Reg. No. 61282-24-7917
EPA Est. No. 61282-W-01-01

KEEP OUT OF REACH OF CHILDREN
CAUTION

NOTE TO PHYSICIANS
If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K₁, intravenously or orally. Repeat as necessary based on monitoring of prothrombin times.

FOR TREATMENT OF POISON INJURY

TREATMENT FOR PET POISONING
If animal consumes bait, call veterinarians at 1-800-498-5743 for assistance.

NOTE TO VETERINARIAN
Contact the veterinarian Diphacinone. If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. For human or animal ingesting bait and/or showing signs of bleeding, administer prothrombin complex (Vitamin K₁) intravenously or orally.

For 24-hour emergency information on this product, call 1-800-498-5743 (US & Canada) or 1-851-523-0138 (all other areas).

NET WEIGHT: 30 LB

Manufactured For:
SIERRA INDUSTRIES, INC.
Chatsworth, CA 91311

SIERRA® is a Registered Trademark of SIERRA INDUSTRIES, INC.
Code (L.B.A.), RR.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ THIS LABEL Before using this product. Follow all directions and use precautions. Use only for the sites, pests, and application methods described on this label.

IMPORTANT: Do not expose children, pets or other non-target animals to the product. To help prevent accidents:
1. Store product not use in a location out of reach of children and pets.
2. Apply this product only in second, temper-resistant bait stations. These stations must be resistant to destruction by dogs and children under 6 years of age, and must be constructed and used in ways which prevent each from reaching into bait compartments and obtaining bait. Even stronger bait stations are needed in areas open to beneficial hawks, raccoons, bears, birds, other potentially destructive animals, or in areas prone to vandalism. Stations must be secured so that they cannot be overturned by young children, pets, or birds. Stations should be placed in areas open to livestock and non-target wildlife; and must be secured so that the stations cannot be moved or overturned by any non-target animals that have access to them.
3. Dispose of product container, and unused, spilled, and unabsorbed bait as specified on this label.

USE RESTRICTIONS
This anticoagulant bait may only be used to control California ground squirrels (Citellus armatus) in second, temper-resistant bait stations. It is not intended for use in or near lever or dial traps, around farm buildings, along fence lines, in orchards, in or near crops, and in vine-yards. DO NOT BROADCAST this bait, apply it directly to food or feed crops, or use it in any manner other than prescribed by this label. Wear waterproof gloves when applying bait. With detergent and hot water, wash all implements used for applying bait. Do not use these implements for eating, handling or preparing foods or feeds.

APPLICATION DIRECTIONS:
Secure bait stations at locations where they will be readily accessible to target ground squirrels, preferably near active burrows. Secure stations 20 to 100 feet apart, depending upon the density of the California ground squirrel population. Use 2 to 4 pounds of bait per station.

Check bait stations frequently to ensure that an uninterrupted supply of bait is always available. Maintain an uninterrupted supply of fresh bait at least 20 days or until all signs of feeding have stopped. Wearing waterproof gloves collect and dispose of all dead, exposed animals and leftover bait properly.

Bait stations may be maintained in permanent bases, but must only be located with toxic bait when California ground squirrels are no active and accepting grain-based foods. Numbers sufficient to promote effective control.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals. Sweep up spillage carefully and dispose of as indicated below.

Pesticide Disposal: Water resulting from the use of this product may be placed in trash or delivered to an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill this container.

Plastic Containers: Offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration.

Paper Containers: Dispose of empty container by placing in trash, at an approved waste disposal facility or by incineration.

LIMITED WARRANTY
To the extent permitted by applicable law, SIERRA INDUSTRIES, INC. makes no warranty concerning uses which extend beyond the use of the product under normal conditions in accord with the statements made on this label. To the extent permitted by applicable law, SIERRA INDUSTRIES, INC. shall not be liable for (1) any consequential, incidental or special damages related in any way to the product or its uses, or (2) any damages related in any way to resistance to insects.

For medical emergencies or questions involving this product, call 1-800-498-5753.

ENVIRONMENTAL HAZARDS
This product is extremely toxic to mammals and birds. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon baits that have eaten this bait. Do not apply directly to water, or to areas where aquatic water is present or to inhabited areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or drain.

ENDANGED SPECIES CONSIDERATIONS
Notice: It is a federal offense to use any pesticide in a manner that results in the death of a member of an endangered species. The use of this product may pose a hazard to Federally designated endangered/bounden species.

In California, obtain a copy of the InsectMeasure Bulletin for your county from the County Commissioner's office or from the following Internet source:
www.cos.agric.ca.gov/exterminators.htm

Soft Surf Harvest Mouse (Ameles alleni anonyzus)
- Do not store this product in critical habitat with 0.5 miles of salt marsh vegetation and/or beachfront waterways which are located: near or adjacent to San Pablo Bay and San Francisco Bay, or in the Sacramento River below or adjacent to confluence of the Sacramento River and the San Francisco River (California).

Moura Day Kangaroo Rat (Dipodomys merriami mearnsii)
- Do not store outdoor bait in critical habitat within 5 miles of Baywood Park which is located on the Moro Bay (California).

Great Kangaroo Rat (Dipodomys spectabilis)
- Follow the InsectMeasure Protocols for protective endangered species in the California Endangered Species Bulletin for the following California counties: Kern, Kings, Merced, Mono, Madera, San Benito, San Luis Obispo, Santa Barbara, and Tulare (California).

To protect endangered kangaroo rats, use one the multiunit station (model "T" with "ebow) or platform stations) developed for this purpose in association with the California Department of Food and Agriculture and the Department of Fish and Game. A publication is available at the vehicle indicated above.

Tipton Kangaroo Rat (Dipodomys nitrativorus nitrativorus)
- Follow the InsectMeasure Protocols for protective endangered species in the California Endangered Species Bulletin for the following California counties: Kern, Kings, and Tulare (California).

Peso Kangaroo Rat (Dipodomys nitrativorus picadoi)
- Follow the InsectMeasure Protocols for protective endangered species in the California Endangered Species Bulletin for the following California counties: Kern, Kings, Madera, and Mono (California).

Stephens Kangaroo Rat (Dipodomys stephensi)
- Follow the InsectMeasure Protocols for protective endangered species in the California Endangered Species Bulletin for the following California counties: San Bernardino, San Diego, and Riverside (California).

Pygmy Rabbit (Oryctolagus pygmaeus)
- Do not set within 1 mile of a subsite filed.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Harmful if swallowed or exposed to the skin. Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Keep away from children, domestic animals and pets.

Personal Protective Equipment (PPE):
All handlers (including applicators) must wear long-sleeved shirt, long pants, shoes, socks and waterproof gloves. Any person who receives cancer or unusual hair falling following application of this product must wear waterproof gloves.

Use Safety Requirements
Follow manufacturer's instructions for cleaning/sanitizing PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying the bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.
