CAUTION
KEEP OUT OF REACH OF CHILDREN

PERMATEK™ IM30

ACTIVE INGREDIENT: Imidacloprid..........................3.00%
INERT INGREDIENTS:...........................................97.00%
TOTAL.............................................................100.00%

Insecticide for the control of borers and termites in wood-based products

FIRST AID

If swallowed
- Call poison control center or doctor immediately for treatment advice.
- Have person sip a glass of water if able to swallow.
- Do not induce vomiting unless told to do so by the poison control center or doctor.
- Do not give anything by mouth to an unconscious person.

If on skin
- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact the National Pesticide Telecommunications Network at 1-800-858-7378 for emergency medical treatment information.

See side panel for other precautionary statements.

PRECAUTIONARY STATEMENTS

SIGNAL WORD: CAUTION
Hazards to Humans and Domestic Animals. Harmful if swallowed. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Wear protective clothing, shoes and gloves. Remove and wash contaminated clothing before use.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
- Coveralls over long-sleeved shirt and long pants;
- Chemical resistant footwear and socks;
- Chemical resistant gloves that are waterproof;
- Protective eyewear;
- Chemical resistant apron when cleaning equipment, mixing or loading;
- Dust/mist filtering respirator (MSHA/NIOSH approval number prefix TC-21C) Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Ensure that the spray unit is correctly maintained and that an effective mist extraction system is used. Treated timber must not come into contact with foodstuffs, e.g. use in packing cases or places where food is prepared or stored. DO NOT spray directly on exposed food, utensils or food preparation surfaces.

Wood-based Composite Products
Permatek™ IM 30 is recommended for the preservation of wood-based composite products, such as waferboard, fibreboard and particleboard when it is important to prevent the attack of insects, including termites and borers, on the composite product. Composite wood treated with Permatek™ IM 30 does not change in appearance and may be painted when dry.
Permatek™ IM 30 may be applied into a wood composite through a number of methods, including:

a) Metering Permatek™ IM 30 into the dried wood flakes, fibres, etc. immediately before the blender. Permatek™ IM 30 is then mixed with flakes in the blender.

b) Mixing Permatek™ IM 30 with the wood flakes in the blender.

c) Mixing Permatek™ IM 30 with the adhesive or wax which is subsequently applied to the flakes in the blender.

The method of incorporation of Permatek™ IM 30 will depend on the specific manufacturing process and wood species for the composite. The use level is 0.167 to 1.67 lbs. Permatek™ IM 30 per cubic yard of wood.

Wood-based Veneer Products
For the treatment of plywood, LVL and oriented-strand board, Permatek™ IM 30 may be used to treat the veneers before lay-up by dipping or spraying. If sprayed, apply as a coarse spray. Alternatively Permatek™ IM 30 may be added to the adhesive prior to application of the veneers.

When treating softwood veneer based products for protection against borers and termites (all termites excluding Mastotemes darwiniensis), the suggested level is 0.045 lbs. Permatek™ IM 30 per cubic foot based on dry board weight.

When treating LVL, some adjustment of use rate may be needed because of the effects of processing conditions.

Millwork and Construction Lumber
For the treatment of millwork and construction lumber Permatek™ IM 30 may be used to treat all exposed surfaces by brushing or dipping. Apply a 1:4 dilution of Permatek™ IM 30 to all surfaces, ensuring complete coverage. Apply to runoff. Millwork and construction lumber treated with Permatek™ IM 30 does not change in appearance and may be painted when dry.

WARRANTY
The manufacturers and vendors of Permatek™ IM 30 warrant the formulation to contain the specific active ingredients within the accepted limits when packed but make no warranty of any kind on the use of this material and accept no responsibility for results, whether the material has been used in accordance with directions or not.
