Sanitization of food processing equipment: Equipment and utensils must be thoroughly sanitized after each and every use. To sanitize, prepare a solution of 2 ounces of sanitizer per 8 gallons of water (200 ppm active quaternary). Allow the solution to remain in equipment for at least 60 seconds. Ice Machines: Sanitization should occur after initial installation, after the machine is disassembled and cleaned, and after the water supply lines begin to drip. Repeat procedure two more times. Then offer for recycling or disposal. NOTE: A user’s solution must be in accordance with Section 2 of this product. A user’s solution containing 1-2 ounces of this product per 4 gallons of water (250-500 ppm active quaternary). Allow surfaces to remain wet for at least 35 minutes. To sanitize pre-cleaned and potable water-rinsed, non-porous public eating establishment surfaces (tanks, tables, refrigerated and non-refrigerated storage) apply a 200-400 ppm active quaternary solution directly to the surface. To sanitize pre-cleaned mobile food processing utensils (knives, grinders, cutting boards) immerse in a 200-400 ppm active quaternary solution for at least 60 seconds, making sure to immerse completely. Remove tests, clean the area-restored to the surface and air dry. Do not rinse.

To sanitize pre-cleaned food processing areas (bowls, griddles, conveyors) flood the surface with a 200-400 ppm active quaternary solution and let air dry. Do not rinse.

To sanitize pre-cleaned food processing equipment (steam tables, grills, ovens, conveyors, cooking equipment, etc.) flood the area with a 200-400 ppm active quaternary solution. Make sure to flood all surfaces and allow a minimum contact of 35 minutes. To sanitize pre-cleaned public eating establishment surfaces (counter tops, tables, refrigerated and non-refrigerated storage) apply a 200-400 ppm active quaternary solution directly to the surface. To sanitize pre-cleaned mobile food processing utensils (knives, grinders, cutting boards) immerse in a 200-400 ppm active quaternary solution for at least 60 seconds, making sure to immerse completely. Remove tests, clean the area-restored to the surface and air dry. Do not rinse.

Precautionary Statements: Hazards to humans and domestic animals. Storage and disposal:USR22925v2

Storage and Disposal: Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. Pesticide Storage: Store in a dry place no lower in temperature than 50°F or higher than 120°F. Store in a tightly closed container in an area inaccessible to children. Pesticide Disposal: Do not reuse containers that have contained this material. Pesticide wastes are acutely hazardous. Improper disposal of pesticides, spray mixtures, or rinsates is a violation of Federal Law. If these wastes cannot be disposed of in accordance with label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Program of your local government. Excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of in accordance with label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Program of your local government.
