KILLS Mosquitoes in Standing Water Where They Breed

Just place in standing water

Each Mosquito Torpedo® treatment provides 60 days of protection

No float design

No unsightly debris

Can be applied to areas used by or in contact with humans, animals or wildlife

ACTIVE INGREDIENT:
(S)-Methoprene (Dry Weight Basis)
TOTAL: 100.00%
OTHER INGREDIENTS: 91.38%
(CAS# 65733-16-6)

Caution:
NET WEIGHT: 0.95 OZ. (27g)

DIRECTIONS FOR USE:

Introduction: Pre-Strike® Mosquito Torpedo® (Mosquito Torpedo®) is an easy and effective way to kill developing mosquitoes in standing water before they become biting adults. With just one application, adult mosquitoes may be thrust into their final stage of development, and other insects that can cause problems to both people and pets. They may also hinder residents' enjoyment of gardens and other outdoor activities. Mosquito Torpedo® controls mosquitoes in water-holding receptacles and standing water sites around your home.

How to Apply: Simply place Mosquito Torpedo® in standing water where mosquitoes may breed. Remove only enough product from the package for immediate use. For best results, apply Mosquito Torpedo® before the beginning of the mosquito season, and continue as directed below in the Application table.

Example of application sites include, but are not limited to:

- Bird baths
- Water gardens
- Unlined swimming pools or spas
- Ponds
- Garbage cans
- Flowerpots or planters
- Ornamental fountains
- Wheelbarrows
- Standing water in your yard
- Old tires
- Rain barrels
- Man-made depressions
- Standing water in gutters or downspouts
- Any other water-holding container
- Indoor or outdoor drain.

Application Sites: Mosquito Torpedo® controls mosquitoes in water-holding receptacles and standing water sites around your home. Apply the product as a preventative measure (pre-flood treatment) to application sites before they fill with water. Mosquito Torpedo® may also be used in sites that intermittently fill with water. It will begin releasing its active ingredient into water as soon as it becomes wet, and forms a barrier around the sides of the container which prevents mosquitoes from entering treated water when continuously immersed in water. Do not apply to water that drains into public waterways, such as streams or lakes.

How to Apply:

Simply place Mosquito Torpedo® in standing water where mosquitoes may breed. Remove only enough product from the package for immediate use. For best results, apply Mosquito Torpedo® before the beginning of the mosquito season, and continue as directed below in the Application table.

Storage & Disposal: Store in cool, dry place. Disposal: If empty, do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product directly into water or drainage ditches.

Precautionary Statements – Hazards to Humans and Domestic Animals – Caution:
Caution: wash hands after handling. Harmful if absorbed through skin. Avoid contact with eyes, mouth, or clothing. Wash thoroughly with soap and water after handling.

FIRST AID:

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

If on skin or clothing: Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.
