For use in disinfection of spas and hot tubs

Brilliance®

for spas

sanitizer

100% Chlorine Free

Active Ingredient
1,3-dibromo-5,5-dimethylhydantoin...........99.4%
Other Ingredients............................0.6%
TOTAL .........................................100%
Available Bromine ............................111%

KEEP OUT OF REACH OF CHILDREN

DANGER

See side/back panel for additional First Aid and Precautionary Statements.

Net Contents 5 lbs. (2.27kg)
DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with the labeling. Read entire label and use strictly in accord with Precautionary Statements and Directions for Use.

DISINFECTING SPAS AND HOT TUBS
When used as directed, Brilliance for spas Sanitizer is an effective disinfectant for your spa or hot tub water, keeping it clean, clear, and free of odor. Brilliance for spas Sanitizer gives the effectiveness of chlorine without the chlorine odor.

To start up a new spa or one recently drained, clean all surfaces, check filter, chemically balance the calcium hardness and total alkalinity, treat for iron, copper and manganese, if present. Adjust the pH to 7.2-7.8, prior to initiating treatment with Brilliance for spas Sanitizer.

Place Brilliance for spas Sanitizer in suitable feeder. Adjust the feeder according to the manufacturer's directions to maintain an active bromine level between 2-4 ppm in residential spas and 1-2 ppm in commercial spas. Check your feeder regularly and add additional product as needed. Maintenance of residual is dependent on water temperature, light intensity and bather load, and requires frequent checks with a test kit. Use a reliable test kit for the bromine measurements. The pump and filter should be operated at least three hours every day regardless of use. Outdoor hot tubs and spas may require more frequent cleaning and treatment with Brilliance for spas Sanitizer. To maintain clear, clean water and ensure performance of your spa or hot tub chemicals, water should be drained and spa or hot tub refilled with fresh water every 60 days.

SUPEROXIDANT
Water soluble, non-filterable wastes can accumulate in spa and hot tub water causing dull or cloudy water and stimulating algae growth. Superoxidation or superchlorination with a suitable oxidizing shock treatment should be done on a regular basis to remove these wastes and keep your clear sparkling water.

A suitable oxidizing agent is Brilliance Oxidizer.

When using other products as outlined in directions for this product, always follow directions on those products.

Do not mix this product in concentrated form with any other chemicals. Do not add other chemicals in the feeder when using this product. A violent reaction leading to fire and/or explosion could result.

After application, ensure that bromine level is below 1.5 ppm before reentering the spa or hot tub.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER
CORROSIVE: Causes irreversible eye damage and skin burns. Do not get in eyes, on skin, or on clothing. Wear chemical goggles or safety glasses, protective clothing, and rubber gloves. May be fatal if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Harmful if absorbed through skin. Harmful if inhaled. Avoid breathing dust. Remove contaminated clothing and wash clothing separately before reuse.

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present. After the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

FOR EMERGENCY INFORMATION, CALL THE POISON CONTROL CENTER NEAREST YOU OR CALL 1-800-554-6811.

PHYSICAL AND CHEMICAL HAZARDS
STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Avoid exposure to food and drink.

If large volumes of water, if necessary.

STORAGE AND DISPOSAL
STORAGE: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames. Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide is a violation of Federal Law. These wastes cannot be disposed of by use according to label instructions; or if decomposition occurs, isolate container and flood area with large amounts of water to dissolve all material before discarding this container.

CONTAINER DISPOSAL: Do not reuse container in trash collection. Rinse thoroughly before discarding in trash. Do not use to store or transport hazardous materials. Buyer assumes all responsibility for safe use and final treatment of materials. EPA Registration No. 3377-61-2588
