Net Contents: 8 oz. (227 g)
DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with the labeling. Read entire label and use strictly in accord with precautionary statements and Directions for Use.

DISINFECTING SPAS AND HOT TUBS WITH THE Mermaid by Brilliance for spas Sanitizer Dispenser.

When used as directed, the Mermaid by Brilliance for spas Sanitizer Dispenser is an effective disinfectant for your spa or hot tub water, keeping it clean, clear and free of odor. The Mermaid by Brilliance for spas Sanitizer Dispenser gives the effectiveness of chlorine without the chlorine odor.

To start up a new spa or one recently drained, clean all surfaces, back flush or clean the filter, chemically balance the calcium hardness and total alkalinity, treat for iron, copper and manganese, if present. Adjust the pH to 7.2 - 7.8, prior to initiating treatment with the Mermaid by Brilliance for spas Sanitizer Dispenser.

Adjust the Mermaid by Brilliance for spas Sanitizer Dispenser according to the manufacturer's directions to maintain an active bromine level between 2 - 4 ppm in residential spas and 3 - 6 ppm in commercial spas. Maintenance of residual is dependent on water temperature, light intensity and bather load, and requires frequent checks with a test kit. Use a reliable test method for the bromine measurements. The pump and filter should be operated at least three hours every day regardless of use. Replace the Mermaid by Brilliance for spas Sanitizer Dispenser when empty.

To maintain clear, clean water and ensure performance of your spa or hot tub chemicals, water should be drained and spa or hot tub refilled with fresh water every 60 days.

SUPEROXIDATION:

Water soluble, non-filterable wastes can accumulate in spa, hot tub and pool water causing dull or cloudy water and stimulating algae growth. Superoxidation or super-chlorination with a suitable oxidizing shock treatment should be done on a regular basis to remove these wastes and maintain clear sparkling water. A suitable oxidizing agent is Brilliance for spas Oxidizer.

When using other products as outlined in directions for this product, always follow directions on those products. Do not directly mix this product in concentrated form with any other chemicals. Do not add other chemicals in the feeder when using this product. A violent reaction leading to fire and/or explosion could result.

After application, ensure that the bromine levels is below 7.5 ppm before reentering the spa or hot tub.

PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGEROUS. Causes irreversible eye damage and skin burns. Do not get in eyes, on skin, or on clothing. Wear chemical goggles or safety glasses, protective clothing, and rubber gloves. May be fatal if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Harmful if absorbed through skin. Harmful if inhaled. Avoid breathing dust. Remove contaminated clothing and wash before reuse.

PHYSICAL AND CHEMICAL HAZARDS.

STRONG OXIDIZING AGENT: Do not mix with other chemicals. Mix only with water. Never add water to product, always add product to large quantities of water. Use clean, dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals may start a chemical reaction with generation of heat, liberation of hazardous gases and possible generation of fire or explosion. In case of contamination or decomposition, reseat container. If possible, isolate container in open air or well ventilated area. Flood with large volumes of water, if necessary.

STORAGE AND DISPOSAL

STORAGE: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Do not contaminate water, food, or feed by storage or disposal.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, or if decomposition occurs, isolate container and flood area with large amounts of water to dissolve all material before discarding this container.

CONTAINER DISPOSAL: Do not reuse empty dispenser. Place in trash collection.

Note: Buyer assumes all responsibility for safety and use not in accord with directions.
