Kills Rats & House Mice
Mata ratas y ratones domésticos

Kills Norway rats, roof rats, house mice, meadow voles** and warfarin resistant Norway rats

**Not permitted for use against the following species in California: Cotton Rat, Eastern Harvest Mouse, Golden Mouse, Polynesian Rat, Meadow Vole, White-Throated Woodrat, Southern Plains Woodrat, and Mexican Woodrat

ACTIVE INGREDIENT:
Bromadiolone .........................................................................................................0.005%

OTHER INGREDIENTS†: ............................................................................................99.995%

TOTAL: ......................................................................................................................100.000%

†Contains denatonium benzoate
†This product has been treated with S-methoprene to protect the bait from infestation by insects.

*Norway rats, roof rats and house mice may consume a lethal dose in a single night’s feeding with first dead rats and mice appearing four or five days after feeding begins

This product may only be used inside and within 100 feet of agricultural buildings and manmade agricultural structures

For indoor and outdoor rat, house mouse and meadow vole** control

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back panel for additional Precautionary Statements

EPA Reg. No. 270-373
EPA Est. No. 61282-WI-01

NET CONTENTS:
8 lbs (64, 2 oz chunks)
**APPLICATION DIRECTIONS:**  
Each Just One Bite® II Bait Chunk weighs 2 oz.

**NOTICE:** Place 3 to 16 bait chunks at intervals of 15 to 30 feet per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of rat activity cease.

**MICE AND MEADOW VOLES:**** Place one chunk per placement. Space placements at 8 to 12 feet intervals in infested areas. Two chunks may be needed per pest of very high activity. Maintain an uninterrupted supply of fresh bait for at least 15 days or until signs of mouse or meadow vole activity cease.

**FOLLOW-UP:** Replace consumed or spoiled bait immediately. Moisten, compact, and dispose of all empty bait containers and refuse bait property. To prevent reinfection, eliminate food, water, and harborage as much as possible. If reinfection does occur, repeat treatment. When a continuous source of infection is present, establishing permanent bait stations and replacing bait as needed.

**STORAGE AND DISPOSAL:**
Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE:** Store only in original container. As a caustic, dry solid substance, it is highly toxic to children and pets. If containers closed and away from other chemicals. **RESTRICTIONS:** Dispose of empty container resulting from the use of this product in a trash or at an approved waste disposal facility. CONTAINER HANDLING:** Nonrefillable container. Do not reuse or refill this container. Place in a sanitary landfill or by incineration. In most states, burning is not allowed. **DISPOSAL:** Dispose of empty container by placing it in trash or at an approved waste disposal facility or by incineration.

**CONDITIONS OF SALE:** The vendor agrees to sell to the buyer, on the condition that the buyer shall not sell, offer for sale, deliver, transfer, or otherwise dispose of the product other than as indicated in the label. To the extent consistent with applicable law, this warranty does not extend to the handling or use of this product contrary to label instructions or under abnormal conditions or conditions not reasonably foreseeable to seller, and buyer assumes all risk of any such use. This product may only be used to control the following rodent pests in and around agricultural buildings and manage agricultural structures: House mouse (Mus musculus), Norway rat (Mus norvegicus), Field rat (Rattus norvegicus), Cotton rat (Sigmodon hispidus), Eastern harvest mouse (Reithrodontomys humuli), Roof rat (Rattus rattus), White-throated woodrat (Neotoma albigula), Southern plains woodrat (Neotoma micropus), and Mexican woodrat (Neotoma lepida). This product is not to be used in and within 100 feet of agricultural buildings and manage agricultural structures in a manner so as to be submersible to comminuted rodent infestation vector for hamstringing or attracting unintended infestations. Fence and perimeter baiting beyond 150 feet from an agricultural structure as defined above, is prohibited. This product must not be applied blindly to food or feed crops. Burrow baiting with Just One Bite® II Bait Chunks is prohibited.

**ENVIRONMENTAL HAZARDS:** Can be harmful to invertebrates. Can be harmful to birds, fish, and aquatic invertebrates. Potential for run-off may also be hazardous to aquatic organisms and ground water. Use in and around agricultural buildings is prohibited.

**USER SAFETY REQUIREMENTS:** Follow manufacturer’s instructions for cleaning/maintaining PPE. If instructions for washing, user determines and must be followed. Cannot be cleaned and must be discarded. Principal constituent of this product is D-Benfluralin. This product is hazardous if swallowed or absorbed through the skin. Harmful if swallowed. Keep away from children, domestic animals and pets. Causes moderate eye irritation. Do not get in eyes or on clothing. All handlers, including participants, must wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco, or using the toilet.

**PRECAUTIONARY STATEMENTS:**
Hazardous to humans and domestic animals.
