For indoor and outdoor rat, house mouse, and meadow vole control, house mice, meadow voles, and Eastern Harvest Mouse, Golden Mouse, Polynesian Rat, Meadow Vole, rats and mice appearing four or five days after feeding begins.

Bromadiolone

Active ingredient:

Norway rats, roof rats and house mice may consume a lethal dose in a single night's feeding with first dead rats and mice appearing four or five days after feeding begins.

† Contains denatonium benzoate

This product has been treated with S-methoprene to protect the bait from infestation by insects.

This product may only be used inside and within 100 feet of agricultural buildings and manmade agricultural structures

Kills Norway rats, roof rats, house mice, meadow voles and warfarin resistant Norway rats

† Kills Rats & House Mice

Kills Rats & House Mice

Mata ratas y ratones domésticos

For indoor and outdoor rat, house mouse, and meadow vole control

Kills Norway rats, roof rats, house mice, meadow voles and warfarin resistant Norway rats

Note to Veterinarian: Anticoagulant Bromadiolone: If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K by intramuscular or oral route. Repeat as necessary based on monitoring prothrombin times.

**Rats: Rodents & Mice and Meadow voles**

Application Directions:

Place two to eight 2-oz pieces of bar (or one entire bar) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least five days or 10 days if bait stations are used. The hole through the middle allows for mounting in bait stations.

**Rats: Rodents & Mice and Meadow voles**

SELECTION OF TREATMENT AREAS:

Generally, these are along walls, by gnawed openings, in corners and concealed places, between floors and walls, or in locations where rats, mice, or birds might be poisoned if they feed upon animals that have eaten this bait. This pesticide is toxic to fish. Do not apply this product directly to food or feed crops.

Application:

1. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations.

2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations.

FOLLOW-UP:

**Rats: Rodents & Mice and Meadow voles**

If no rats, house mice, or meadow voles have been seen after treatment, repeat application in two weeks.

Individually Wrapped 1 Pound Bars!

Contains 8

CONTAINS 8 Individually Wrapped 1 Pound Bars

Belongs in a designated rodent bait application program. Must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from consuming the bait. Only use in locations accessible to rodents or in tamper-resistant bait stations.

Do not sell this product in Mexico.

First Aid

Have label with you when obtaining treatment advice.

IF SWALLOWED:
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

IF IN EYES:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

NOTICE TO PHYSICIAN: This material may reduce the clotting ability of the blood and cause bleeding. In expired, administer Vitamin K intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.

TREATMENT FOR PET POISONING: If animal eats bait, call veterinarian using the 800 number immediately for emergency medical treatment information.

NOTE TO VETERINARIAN: Anticoagulant Bromadiolone: For animals ingesting a bait or showing poisoning signs (bleeding or elevated prothrombin times), give Vitamin K...need, check prothrombin times every 3 days until values return to normal (up to 36 days). In severe cases, blood transfusions may be needed.
