PRE-M 0.86% Plus Fertilizer

GENERAL INFORMATION

This product is a combination of ammonium nitrate and urea to provide a balanced source of nitrogen and potassium. This product is applied to drinking water at a rate of 50 lbs of nitrogen per acre. This product is not intended for use on grass or turf

PRECAUTIONS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes eye irritation. Harmful if inhaled through skin. Avoid contact with eyes, skin, or clothing. Wash thoroughly with soap and water after handling. Avoid breathing dust.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID:

If swallowed:

- Call a poison control center or doctor immediately for treatment advice.
- If necessary, give 1/2 cup of water with 1 tablespoon of vegetable oil.
- Do not induce vomiting unless told to do so by a poison control center or doctor.
- Remove contaminated clothing and wash exposed skin with soap and water.
- Provide adequate ventilation if exposure is prolonged.

If inhaled:

- Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.
- Do not give by mouth if person is unconscious.

If on skin:

- Wash exposed skin with soap and water.
- Avoid contact with the eyes and clothing.

If on eyes:

- Wash eyes with plenty of water for 15 to 30 minutes.
- Remove contaminated contact lenses and wash with soap and water.

Ingestion:

- If you feel dizzy, weak, or sick, call a physician immediately. Avail of all first-aid advice.

If you are contaminated:

- Do not use this product for the same area in the near future.

If you have the product container with you when calling a poison control center or doctor for treatment, they also can ask for chemical name, mixes, or trade name.

If you have the product container with you when calling a poison control center or doctor for treatment, they also can ask for chemical name, mixes, or trade name.

APPLICATION: Use only on well-established turf with a dense and uniform stand. On newly planted areas, application should not be made until the turf has become established and is not subject to damage by wind or weather. The rate of application should be such that the turf becomes green within 3 to 4 weeks of treatment but not before. Application rates and times vary depending on the stage of growth and the environment. Application should be made as soon as possible after the last irrigation of the season.

APPLICATION TOlluminate:

- Apply at the rate of 0.86 lbs of nitrogen per acre when the turf is actively growing. This product is not intended for use on grass or turf.
