explosion, and the release of toxic gases. 
- Keep all foreign material, including other water treatment products, away from this product. 
- Do not use this product in a faucet or leaker that has been used with any other product. 
- Do not allow this product to contact other water treatment products. Do not mix this product in a faucet or leaker that has been used with any other product. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer. 

**Environment:** 
- Exposure to heat can cause this product to rapidly decompose, leading to intense fire, explosion, and the release of toxic gases. 
- Store in a cool, dry, well-ventilated area. 

**Strong oxidizing agent:** 
- This product can increase fire intensity. Keep away from heat and from flammable and burning material (like a lighted cigarette).

**Emergency Handling:** 
- In case of contamination or decomposition: Do not report container. Place the container in an open and well-ventilated area by itself (if possible). Flood with large amounts of water until the material is diluted. Dispose of container and any remaining contaminated material in an approved landfill area.

**Storage & Disposal:** 
- Place this product dry in its tightly closed container. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame,odore, or other fires. Do not reuse or refill this container. Rinse and discard empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. Do not contaminate food or feed by storage or disposal or cleaning of equipment. For disposal of a contaminated or decomposing product see "Emergency Handling".

- Do not allow to come in contact with eyes, skin, or clothing. 

**Precautionary Statements:** 
- Keep out of reach of children. 
- Do not mix with other products or dissolve before use.

**Active Ingredient:** 
- Calcium Hypochlorite: 62.4%

**Other Ingredients:** 
- 37.6%

**Total:** 
- 100.0%

**Available Chlorine:** 
- 60%

Net Wt. 1 lb. (453.6 g)

---

**Physical & Chemical Hazards:** 
- If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water. Do not mix this product with a small amount of water. Only add this product directly to your pool. Do not allow to come in contact with eyes, skin, or clothing. 

---

**Method of Application, How to Use:** 
- Do not pre-mix this product. Only add this product directly to your pool. For single use bag, use entire contents when opened.

**Take a Pool Water Sample to your Authorized "Pool Breeze" dealer regularly for a detailed water analysis.**

**Method for closing directly into pool:** 
- Add the recommended dosage of this product during evening hours when the filter pump is running. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool. If any granules settle to the bottom of the pool use a skimmer to catch these.

**Method for skimmer addition:** 
- Make sure that filter pump is on and properly recirculating through skimmer. Empty skimmer of all chemicals and/or debris. Contamination may cause an explosion or the release of toxic gases. Do not use this method when an automatic chemical dispensing device (e.g. feeder) is present. Pour this product slowly into skimmer, making sure that the material is drawn into the system at the system at the rate of: do not allow this material to accumulate as toxic gases may be generated.

**Pool Shock Treatment:** 
- Add the recommended dosage of this product while the filter pump is running. See METHOD OF APPLICATION. When adding this product to your pool, broadcast the product evenly over a wide area in the deepest part of the pool.

**Dosage Rate:** 
- Adjust and maintain at 2 oz to 7 oz with Pool Breeze B1 increaser or B1 Deconser. 
- Follow label directions. Allow pH adjustment chemicals to dispense and add one bag (16 ounces) per 14,000 gallons of water weekly to help prevent pool problems. Use entire contents when opened.

**Additional shock treatments:** 
- Bags of sodium should be removed to correspond with a visible algae.

**Bacterial Load:** 
- Heavy and wide restraints.

**Additional shocks treatments:** 
- Use unbleached odors, eye irritation.

Do not reenter until the free available chlorine residual is 1 to 4 ppm.

Shock treat your pool when opening, then weekly to prevent pool problems.

**Aloe Control:** 
- If the sides or bottom of your pool develop algae spots, direct this product as close as possible.

**Follow Shock Treatment Directions: Note:** 
- Preformed product with pool surfaces may cause staining or blistering. Immediately after treatment thoroughly clear pool by brushing surface of algae growth, vacuum, and cycle through filter. If necessary, repeat the treatment. Pool should not be entered until the chlorine residual is 1 to 4 ppm.

**Winterizing:** 
- While the water is still clear and clean. Prepare as long periods of closure by gradually, adding 1 lb of this product per 8,000 gallons of pool water. Follow "Method of Application," Run the filter until completely dissolved. Cover the pool with a pool cover and place the heater, pump and filter components for winterizing by following manufacturers directions.

**Precautionary Statements:** 
- Keep out of reach of children. 
- Do not mix with other products or dissolve before use.
