PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS - PELIGRO

CONTRAST: Causes irreversible eye damage. May be fatal if absorbed through skin. Do not eat or drink any contaminated food or drink. Avoid contact with skin and eyes. Do not breathe dust or spray mist. Wear goggles or face shield, long-sleeved shirt and long pants, socks, shoes and chemical resistant gloves made of any waterproof material.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates and may contaminate water through runoff. For terrestrial uses do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or runoff.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in original container and place in locked storage area.

PESTICIDE TRANSPORTATION: Use proper container, not paper bag. Do not re-enter this container. If empty: Place in trash or offer for recycling, if available. If partly filled: Call your local solid waste agency for disposal instructions.

USER SAFETY RECOMMENDATIONS:

Do not allow adults, children or pets to enter the treated area until sprays have dried or dusts have settled. Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift.

SPECIFIC INSTRUCTIONS: SEWAGE TREATMENT - ROOT DESTROYER

ROOT CONTROL GENERAL INFORMATION: Plant roots can penetrate through small cracks and poorly sealed joints of sewer lines. If not controlled, these small roots will continue to grow larger in number causing breakup, reduced flow and eventually, flow stoppage. This product has been known to be an effective means to control roots in residential and commercial sewers.

RESIDENTIAL OR HOUSEHOLD SEWER SYSTEMS:

When a reduced water flow is first noticed, and root growth is thought to be the cause, treat with product. It is important not to wait until a stoppage occurs because some water flow is necessary to move this product to the area of the root growth. Usually, within 3 to 4 weeks, after roots have accumulated sufficient copper sulfate they will die and begin to decay and water flow should increase. As the roots regrow, follow-up treatments with copper sulfate will be required. Applications may be made each year in the spring after plant growth begins, during late summer or early fall, or any time a reduced water flow, thought to be caused by root growth, occurs.

Apply 2 pounds of this product to household sewers. Add product to sewer lines by pouring about 1/2 pound increments into the toilet bowl nearest the sewer line and flush, repeat this process until recommended dose has been added, or remove cleanout plug and pour entire recommended quantity directly into the sewer line. Replace the plug and flush the toilet several times. Repeat in 6 or 12 month intervals, if necessary.

ROOT CONTROL IN SEPTIC TANKS, LEACH LINES AND LEACH LINE PIPES:

The majority of this product will settle in the septic tank itself and little will pass into the leach lines. To treat leach line pipes, add 2 pounds of product to the distribution box located between the septic tank and the leach lines. To achieve effective root control in the leach lines it is necessary to transfer the product from the septic tank to the leach lines. A cleaning plug opening may need to be installed if the distribution box does not have an opening leading to the leach lines.

NOTE: Do not apply this product through sink or tub drains as it will clog the metal drain.

NOTE: This product added to an active 300 gallon septic tank at 2 pounds per treatment will temporarily reduce bacterial action, but it will return to normal approximately 15 days after treatment. Trench and shrubbery growing near a treated line normally are not affected due to only a small portion of their roots being in contact with the product. The crystals kills only those roots inside the leach line.

NOTE: For all sewer line treatment applications do not use more than 2 lbs this product (0.5 lbs. metallic copper) per application. Minimum retreatment interval is 6 months. Make no more than two applications per calendar year. Per EPA guidelines, do not exceed 8 lbs this product (2 lbs metallic copper) per year.

NOTICE: Zep Commercial Sales & Service: warrants that this product conforms to the chemical description as the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with directions under normal use conditions. It is impossible to eliminate all risks inherently associated with use of this product. Crop injury, effectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of Zep Commercial Sales & Service. To the extent consistent with applicable law, Zep Commercial Sales & Service shall not be liable for consequential, special or indirect damages resulting from the use or handling of this product. In the extent consistent with applicable law, all such risks shall be assumed by the buyer. To the extent consistent with applicable law exclusive remedy of any buyer or user of this product for any and all losses, injuries, or damages resulting from or in any way arising from the use, handling or application of this product, whether in contract, warranty, negligence, personal injury or otherwise, shall not exceed the purchase price paid for this product or Zep Commercial Sales & Service’s entire liability, the replacement of this product. Zep Commercial Sales & Service, MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its label. Do not allow adults, children or pets to enter the treated area until sprays have dried or dusts have settled. Do not apply this product in a way that will contact adults, children, or pets, either directly or through drift.
