For preventive applications apply when conditions are favorable for disease. Use the higher rate/shorter interval for curative applications or under severe disease conditions.

Rust
Anthracnose
Pink Snow Mold
Brown Patch
Fusarium Patch
Stemphylium Leaf Spot

Apply one application in late fall before snow cover or early spring after the snow melts. Do not apply on top of snow.

Preventive applications only.

Applications should be watered in with 1/8 to 1/4 inch of irrigation within 3 days of application. Tank-mixing of wetting agents is not recommended with these preventive applications. Tank-mixing of wetting agents may result in an increase in phytotoxicity. Refer to the Precautionary Statements on label for hazards associated with the handling of this material.

Pesticide Storage: Store in a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, foods, and feed. Store in original container and out of the reach of children, pets, and livestock. Keep out of reach of pregnant or nursing women or individuals with respiratory conditions. Do not expose to water or moisture. Do not spray in the presence of other active ingredients.

Precautionary Statements, Directions for Use and Storage and Disposal Instructions.

For control of certain foliar, stem, and root diseases of turfgrass including golf courses, sod farms and sports fields.

Active Ingredient:
Triadimefon (CAS No. 43121-43-7) 20.86%
Trifloxystrobin (CAS No. 141517-21-7) 4.17%

Other Ingredients: ............................................. 74.97%

Total: ................................................................ 100.00%

*Equivalent to 2 pounds of triadimefon and 0.4 pounds of trifloxystrobin per gallon

EPA Reg. No. 432-1446

**TARTAN FUNGICIDE+**

**FUNGICIDE**

TARTAN FUNGICIDE+ is compatible with most insecticide, fungicide, and foliar nutrient products. However, the compatibility of TARTAN™ FUNGICIDE+ with tank mix partners should be tested before use.

To determine biological compatibility with other products, mix the products in the desired proportions, spray on target plants and observe for phytotoxicity seven days after products have been applied.

**Agricultural Use Requirements**

The requirements in this text apply to the use of TARTAN™ FUNGICIDE+ to control diseases on turfgrass, to produce agricultural plants in fields, nurseries, or greenhouses.

**Environmental Hazards**

Do not enter or allow others to enter until sprays have dried.

**Cautions:**

- Do not make applications when weather conditions favor drift from target area.
- Discontinue spraying if weather conditions develop that might reduce drift control.
- Do not apply late in the day or after the treatment has been exposed to the sun. Do not use in conjunction with other tank mix products.
- Do not apply by飞机 or helicopter.

**Personal Protective Equipment (PPE):**

Pilots must use and enclosed cockpit in a manner that is consistent with the WPS for Agricultural Pesticides [40 CFR 170.240(d)(6)]. Pilots must wear the PPE required on this direction.

- Chemical-resistant gloves made of waterproof material such as neoprene, butyl rubber, barrier laminates or nitrile rubber when mixing/loading, when using handheld equipment and when entering treated area. Always use the largest size that can be comfortably worn. Never use gloves that have been damaged or with holes in them.

- Chemical-resistant (such as nitrile or butyl rubber) boots plus socks or shoes plus socks.

- Chemically-resistant (such as nitrile or butyl rubber) pants or coveralls when entering treated areas. Do not re-use chemically-resistant protective clothing.

- Insect repellent when necessary and appropriate.

**FIRST AID**

- Do not give anything by mouth to an unconscious person.
- Have person sip a glass of water if able to swallow.

**Resistant Management for Turfgrass**

Resistance Management:

- Before any fungicide, proper diagnosis of the organism causing the disease is important. Use of diagnostic kits or other means of identification of the disease organism is highly recommended before applying fungicides.
- If any fungicide failure occurs, review use patterns, rates, scheduling, and rotation of the products used.

**Note:**

It is a violation of federal law to use this product in a manner inconsistent with the labeling and the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers and handlers.

**Spray Equipment Requirements:**

- All equipment used for spraying must be in good working order.
- Equipment must be properly maintained and calibrated at intervals not exceeding 14 days.
- Equipment must be labeled to show all tank mix partners used and appropriate mixing instructions.
- Equipment must be thoroughly cleaned after terminating each use.
- Equipment used for mixing and spraying must be pressure tested to 150 psi before use.

**Compatibility:**

- TARTAN™ FUNGICIDE+ can be tank mixed with all commonly used fungicides, bactericides, insecticides, and nutrients.
- Do not mix with or spray resorcinol containing products or in the presence of iron compounds.
- Do not use in conjunction with organophosphate insecticides.

**Resistant Management for Turfgrass:**

Resistance Management:

- Before any fungicide, proper diagnosis of the organism causing the disease is important. Use of diagnostic kits or other means of identification of the disease organism is highly recommended before applying fungicides.
- If any fungicide failure occurs, review use patterns, rates, scheduling, and rotation of the products used.

**Note:**

It is a violation of federal law to use this product in a manner inconsistent with the labeling and the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers and handlers.

**Recommendations for Handling**

- TARTAN FUNGICIDE+ may be applied to the turf sites including golf courses, commercial and institutional lawns, and sports

**Use Restrictions:**

- Do not enter or allow others to enter until sprays have dried.

**Compatibility:**

- TARTAN™ FUNGICIDE+ can be tank mixed with all commonly used fungicides, bactericides, insecticides, and nutrients.
- Do not mix with or spray resorcinol containing products or in the presence of iron compounds.
- Do not use in conjunction with organophosphate insecticides.

Tank Mixes

To determine biological compatibility with other products, mix the products in the desired proportions, spray on target plants and observe for phytotoxicity seven days after application or plant injury may occur. Label directions are based on data with no additives.

### Physical or Chemical Hazards

- Do not apply this product in an area where a flammable or explosive mixture of gases, dust, or fumes may be present.
- Do not use, pour, spill, or store near heat or open flame.
- Do not smoke. Use good ventilation. Keep away from sources of ignition.

### Storage

- Store in original container. Keep away from heat, open flame, or sources of ignition.
- Do not reuse container. Clean empty container by flushing with water until rinsate is clean.
- If container penetrates or breaks, flush with water until rinsate is clean.

It is a violation of law to use this product in a manner not labeled for use. Always read and follow all label directions and precautions. Do not apply this product in any manner other than those permitted on the label. Do not use this product for any purpose other than that for which it is registered. AGRICULTURAL USE REQUIREMENTS

The information in this product is accurate, but the manufacturer cannot be responsible for the illegality or hazard due to improper use. When applications of products referenced on the label are made, all field uses must be made in accordance with EPA and state label directions and precautions. All field uses must be made in accordance with EPA and state label directions and precautions. All field uses must be made in accordance with EPA and state label directions and precautions.

In case of emergency call toll free the Bayer Emergency Response Telephone No. 1-800-334-7577. Have a product container or label with you when calling a poison control center or doctor for treatment advice. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

If inhaled, remove victim to fresh air. If not breathing, administer artificial respiration. If unconscious, do not permit the victim to vomit. Do not give anything by mouth to an unconscious person. For first aid treatment, see the section on first aid treatment. If swallowed, rinse mouth and give 2 to 4 glasses of water. Do not induce vomiting unless told to do so by a poison control center or doctor. For treatment advice, call a poison control center or doctor.

IN CASE OF CONTACT

• Wash the exposed area immediately with soap and water for at least 15 minutes. If the skin is irritated, use a soothing lotion.

IN CASE OF INGESTION

• Do not attempt to induce vomiting unless told to do so by a poison control center or doctor. For treatment advice, call a poison control center or doctor.

IN CASE OF FIRE

• Do not use water or other means as a fire extinguishing medium, but use dry chemical, carbon dioxide, or Class C fire extinguishers. Do not use water灭火 on electrical equipment unless it is dry.

ENVIRONMENTAL HAZARDS

Do not operate machinery or equipment near treated areas, especially in the winter. Do not contaminate water when disposing of equipment or machinery that has been in contact with this product. In case of fire, use dry chemical or carbon dioxide, or Class C fire extinguishers. Do not use water灭火 on electrical equipment unless it is dry.

FIRST AID

If in eyes
• Hold eye open and rinse slowly and gently with water for 15 to 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for treatment advice.

If swallowed
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to do so by a poison control center or doctor.
• Do not give anything by mouth to an unconscious person.

In case of emergency call toll free the Bayer Emergency Response Telephone No. 1-800-334-7577. Have a product container or label with you when calling a poison control center or doctor, or going for treatment.

Note to Physician: If ingested, induce emesis or lavage stomach. Treat symptomatically.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if swallowed. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear protective eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

This product may contaminate water through runoff. This product has a high potential for runoff for several months or more after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product.

Ground Water Advisory: This chemical demonstrates the properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Do not make applications when weather conditions favor drift from target area.

Do not make applications when weather conditions favor drift from target area.

Do not apply when weather conditions favor drift from treated areas. Drift and runoff from treated areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

Container Handling:
Non-refillable container. Do not reuse or refill this container. Offer for recycling, if available. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as decontamination procedures or any other assistance that may be necessary. The Bayer Emergency Response Telephone No. is 1-800-334-7577.

Pesticide Disposal: Pesticide wastes may be toxic. Improper disposal of unused pesticide, spray mixture, or rinse water is a violation of federal law. If these wastes cannot be used according to label instruction, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance in proper disposal methods.

Pesticide Storage:
In a cool, dry place and in such a manner as to prevent cross contamination with other pesticides, fertilizers, food, and feed. Store in original container and out of the reach of children, preferably in a locked storage area.

Precautionary Statements on label for hazards associated with the handling of this material. Do not walk through spilled material. Dispose of pesticide as directed below. In spill or leak incidents, keep unauthorized people away. You may contact the Bayer Emergency Response Team for decontamination procedures or any other assistance that may be necessary. The Bayer Emergency Response Telephone No. is 1-800-334-7577.
