FIRST AID

If Swallowed:
Call a poison control center or doctor immediately for treatment advice. Know the person is a glass of water if data is available. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

If In Eyes:
Wash eyes open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison control center or doctor immediately for treatment advice.

If on Skin:
Rinse with plenty of water for 15-20 minutes. Call a poison control center or doctor immediately for treatment advice.

If Inhaled:
Move person to fresh air. If person is not breathing, call 911 or an ambulance. Then give artificial respiration promptly may - or mouth-to-mouth if possible. Call a poison control center or doctor immediately for treatment advice.

Before Using Product:
Have the product container or card with you when calling poison control center or doctor, or going for treatment. Know to Physician: Poison control center may recommend the use of gastric lavage.

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. A single lot strength, low odor CLEARVIEW® JUMBO TABS, slow dissolving, stablized tablet will provide 4.97 pound available chlorine by weight per 10,000 gallons of swimming pool water. The recommended dose is based on 3.5 ppm available chlorine. This product is manufactured for use in emulsion-type tablet feeders, through the water supply to the feeding supply. This product is available for use in emulsion-type tablet feeders, where the water flow to the water supply continuously provides a constant chlorine level. Do not place tablets directly into the pool. Contact with concrete and sand may cause staining.

CHLORINATION:
Establish an initial chlorine residual: Establish initial chlorine residual in the 10 - 30 ppm range with a test-disinfect, cartridge product such as CLEARVIEW® GRANULAR CHLORINATING CONCENTRATE 50 as a liquid chlorinating product. Follow directions on the label of these products.

Maintenance of the chlorine residual: When an initial chlorine residual has been established, maintain residual with 1 tablet per 2,000 gallons every 7 - 14 days in a chlorine tablet feeder. The number of tablets used every 7 - 14 days may vary with temperature, wind, pool usage, and feeding method. Test the chlorine residual in the pool water frequently with a reliable test kit. Adjust the total halogen concentration as necessary to maintain the chlorine residual in the 15 - 15 ppm range.

pH: Maintain pH between 7.2 - 7.8 range. pH DOWN lowers pH, pH UP raises pH. Follow directions for use on these tablets.

STORAGE AND DISPOSAL:
Keep product dry in a tightly closed container when not in use. Store in cool, dry, well-ventilated area away from heat or open flame. In case of all materials before discarding. Do not treat portable or contain composite containers. Do not store or use the container. Offer discard in trash.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS:
DANGER: CORROSIVE. Causes irreparable eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or smoke. Harman if swallowed. Do not get in eyes, on skin, or on clothing. Wash glasses thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Environmental Hazards: The position is toxic to fish and other aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, rivers, oceans, or water systems. Before applying this product to water systems without prior authorization of the local sewage treatment plant. For guidance contact your local State Water Board or the regional office of the EPA.

Physical and Chemical Hazards: Strong Oxidizing Agent. Like any water, use dry, clean, dry utensils. Do not store this product in any potentially explosive or flammable atmosphere. Any other containers with unstable, ignitable material or other containers may start a chemical reaction of contamination or dissemination. Do not store this product in a container open or a vented container. If necessary, food will cause a chemical reaction of contamination or dissemination. Do not store this product in a container open or a vented container. If necessary, food will cause a chemical reaction of contamination or dissemination. Do not store this product in a container open or a vented container. If necessary, food will cause a chemical reaction of contamination or dissemination.
