CHLORINATING TABLETS

- For routine use in CCH feeders
- Will not cause over stabilization
- Scale control additive to reduce maintenance

ACTIVE INGREDIENT: CALCIUM HYPOCHLORITE: .............. 68%
OTHER INGREDIENTS: .............................................. 32%
TOTAL: ...................................................................... 100%
MINIMUM AVAILABLE CHLORINE: ............... 65%

KEEP OUT OF REACH OF CHILDREN
MANTÉNGASE FUERA DEL ALCANCE DE LOS NIÑOS

DANGER
Contamination or improper use may cause intense fire, explosion, or the release of toxic gases. DO NOT allow product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product.
Add only into water. Highly corrosive. Causes skin and eye damage. May be fatal if swallowed.
Read all precautionary statements on label and first aid statements before use.
DO NOT ADD THIS PRODUCT TO ANY FLOATER OR FEEDER THAT CONTAINS ANY OTHER PRODUCT.

Net Wt. 30 lbs. (13.6 kg.)

FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. IF INHALED: Move person to fresh air.
If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment.
NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.
IN CASE OF EMERGENCY CALL: 1-800-654-6911.
DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling. READ ALL PRECAUTIONARY STATEMENTS BEFORE USE

This product is designed to dissolve slowly providing a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants. For best results, follow a weekly program with our CCH® System. Consult your authorized CCH® dealer for advice on the system that best suits your pool and your lifestyle.

HOW TO USE: Do not allow this product to contact other water treatment products. Do not mix with other products or dissolve before use. Do not pre-mix this product. Once tabled, approximately 10 ounces. Add the recommended dosages of this product during evening hours while the filter pump is running. You may place the product into your pool in the following ways:

1. Use a floating dispenser or feeder designed for this product. Use only new feeders or floaters or ones that have previously contained only this product.

2. Use the skimmer. Skimmer basket should be clean and free of all other water treatment products by adding recommended amount of this product.

Do not reuse feeders or feeders from other brands of dry chlorinator tablets. Do not throw tablets directly into pool or use in any chlorinating device that has been used with other chlorinating compounds.

Alternate Directions for use in CCH® Feeders: Before use, read the appropriate installation instructions and operating manual for your CCH® Feeder. 1. Start the filter pump and check chlorine residual with a reliable test kit. 2. Fill the container with this product only. Adjust chlorine feed rate setting according to the operating instructions in the feeder manual. After 24 hours, check the chlorine residual. If 1 to 4 ppm, leave the feed rate setting as shown. If below 1 ppm, increase the feed rate. Allow sufficient time (eg, one day) after changing the feed rate setting for the chlorine residual to readjust. The pool should not be re-entered until 1 to 4 ppm chlorine residual is established. 3. Always maintain pH between 7.2 and 7.6 by using a suitable pH buffer according to directions on the label for such products. 4. If cyanuric acid is used to stabilize available chlorine, follow label directions for this product and maintain chlorine residual at 1 to 4 ppm as determined by the test kit. 5. Refer to operating manuals for feed rate information.

WATER BALANCE: Maintain total alkalinity in the 50-128 parts per million (ppm) range. Maintain calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Use Pool Care Prods for adjustments. Follow label directions for each product.

OPENING YOUR POOL: Adjust and maintain pH in the 7.2 to 7.8 range. Follow "SHOCK TREATMENT" directions on this package. Test free available chlorine residual with a pool test kit. Do NOT re-enter pool until the free available chlorine residual is 1 to 4 ppm. Reenter pool when residual is 1-4 ppm, or when chlorine residual micro local public health guidelines. Repeat treatment as needed. See directions for use in feeder for routine chlorination.

ROUTINE CHLORINATION: Throughout the pool season, adjust and maintain pH to 7.2-7.6.

FOR UNSTABILIZED POOLS: Begin by using 3 tablets per 10,000 gallons of pool water. FOR POOLS STABILIZED USING STABILIZER CONDITIONER: Begin by using 1 tablet per 10,000 gallons of pool water.

FOR UNSTABILIZED AND STABILIZED POOLS: After each day, use a suitable test kit to check free available chlorine residual. Increase or decrease the number of tablets to maintain a free available chlorine residual of 1-4 ppm. Do not remove product from skimmer or feeder until completely dissolved. Follow "HOW TO USE" directions on this package.

SHOCK TREATMENT / SUPERCHLORINATION: For best results, use "WATER BALANCE" and "HOW TO USE" sections above before treatment. Every 7 days, or as necessary to prevent pool problems, shock treat/superchlorinate the pool by adding one tablet of this product per 1,000 gal of water to provide 10 ppm of available chlorine. Place tablets in the pool skimmer with the pump operating until completely dissolved. Additional shock treatments may be required to correct problems which are caused by visible algae, high chlorination load, heavy wind, and rainstorms, also to correct problems such as unpleasant odors and eye irritation. Check the available chlorine with a suitable test kit. DO NOT re-enter pool until the free available chlorine residual is 1 to 4 parts per million (ppm) as measured by a suitable pool test kit.

ALGAE CONTROL: Follow "SHOCK TREATMENT" directions on this label. DO NOT enter pool until the free available chlorine residual is 1-4 ppm. If necessary, repeat the treatment. To prevent possible staining take the following steps immediately after treatment: Thoroughly clean pool by brushing surface of algae growth, vacuum and cycle through filter.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Irritating to nose and throat.
• Open in a well ventilated area. Avoid breathing dust and fumes. Do not get in eyes, on skin, or on clothing. Do not handle bare hands. Wear goggles and use rubber gloves. For additional protection of skin, wear long sleeves and long pants. Remove and wash contaminated clothing before reuse. Only use utensils that are thoroughly clean and dry.

PHYSICAL AND CHEMICAL HAZARDS:
If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only to water. Do not allow to become wet or damp before use. Can react with other chemicals, including other water treatment products, to cause product fire, explosion, and the release of toxic gases. Keep all foreign matter, including other water treatment products, away from this product. Do not use this product in a floater or feeder that has been used with any other product. Do not allow this product to contact other water treatment products. If used with a skimmer, make sure skimmer is completely clean and free of residue from other water treatment products before putting this product in a skimmer. Exposure to heat can cause this product to rapidly decompose, leading to intense fire, explosion, and the release of toxic gases. Store in a cool, dry, well-ventilated area. Wear a respirator. This product can increase fire intensity. Keep away from flame or burning material (like a lighted cigarette).

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. STORAGE & DISPOSAL: Keep this product dry in its tightly-closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat or open flame. Do not contaminate food or feed by storage or disposal of恩包清理。FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE "EMERGENCY HANDLING". Non-refillable container. Do not reuse this container. Offer for recycling if available. Rinse empty container thoroughly with water to dissolve all material prior to disposal.

EMERGENCY HANDLING: In case of contamination or decomposition – Do not release container. Immediately remove container to an open and well-ventilated outdoor area by itself. Food with large amounts of water. Dispose of the container and any remaining contaminated material in an approved landfill area.
